1. User Guide

1.1. Passwords

As required by the Australian Government's Protective Security Policy Framework passwords have to be changed every 3 months. If you do not change your password it will expire and you will not be able to login to the system without resetting your password.

Passwords are to be:

- 13 or more characters with no complexity requirements, or
- a minimum of 10 characters with at least 3 of the following character sets
 - lowercase characters (a-z)
 - uppercase characters (A-Z)
 - digits (0-9)
 - punctuation and special characters
- changed at least every 90 days
- changed by users no more than once a day
- not reused from any of the preceding eight changes

Please note: Users will be reminded via an email sent from support@strategicdata.com.au 14 days prior to when their password is due to expire, and on PMHC MDS login 7 days prior to the password expiry.

If a password expires the user will not be able to access the PMHC MDS until they reset their password - see [Forgotten or Expired Password](#).

1.2. Home

To use the PMHC MDS navigate to <https://pmhc-mds.net>.

The first page you will see is the Home page. The home page shows you the most recent announcements made via the [PMHC mailing list](#).

Primary Mental Health Care Minimum Data Set

Home

The Primary Mental Health Care Minimum Data Set (PMHC MDS) will provide the basis for PHNs and the Department of Health to monitor and report on the quantity and quality of service delivery, and to inform future improvements in the planning and funding of primary mental health care services funded by the Australian Government.

For more information please visit www.pmhc-mds.com

Announcements

UPDATE regarding the Primary Mental Health Care Minimum Data Set - Request for nominations to be early adopters October 14, 2016

PMHC MDS Data Specifications Update v1.0.1 was released on October 6, 2016. This update includes the following changes: Episode - Principal Focus of Treatment Plan - Updated response 4 from 'Complex care package for adults' to 'Complex care package'. Episode - Source of Cash Income - Added 0 as a valid response. This is to be used when the client is aged less than 16 years. Added a field to all data items to specify whether a response value is required.

Update to the PMHC MDS Data Specifications - 6/10/2016

The below circular was sent to PHN CEOs on Friday 14 October 2016. ----- Dear PHN CEOs The Primary Mental Health Care Minimum Data Set (PMHC MDS) will be available for all Primary Health Networks (PHNs) to commence uploading data in early December. Prior to this we are looking for between 5 and 10 PHNs to volunteer as early adopters.

Primary Mental Health Care Minimum Data Set Circular September 28, 2016

Dear PMHC MDS Reference Group, Please find attached the Primary Mental Health Care Minimum Data Set (PMHC MDS) Circular, that was sent to PHN CEOs on Thursday 23 September 2016. This circular provides advice on the commencement and implementation arrangements for the PMHC MDS. This circular will also be available through the PHN website soon, at the following link: [Open URL]. Regards, Mental Health Data and Funding Section Mental Health Services Branch Health Services Division Department of Health

1.2.1. Accepting an invitation to become a PMHC MDS User

To become a PMHC MDS user you will be sent an invitation by email and a verification code via SMS. In order to gain access to the PMHC MDS you will need to accept this invitation within 7 days, by following these steps:

noreply@strategicdata.com.au
To: firstname1.surname1@po1.example.com
PMHC MDS Verification

Hello FirstName1 Surname1,

You have been invited to sign up by firstname.surname@email.example.com,
and they will be notified once you complete the process.

Please verify your identity for the PMHC MDS authentication system.

Follow the link below, and then enter the code which has been sent to your
mobile phone.

<http://auth.strategicdata.com.au/x/verify/E5CCF94F63C4FDE6A6EA4996>

If you can't click the link, please copy the entire link and paste it into your browser.

If you don't receive the SMS please contact nobody@nowhere.com.au.

Note that this invite will automatically expire after 7 days. If that
happens, then the process will need to begin again.

Thank you.

1. Click on the link contained in the email. You will be shown a page where you will need to input the SMS you
have been sent.

User Verification

Enter SMS code:

© Strategic Data 2016

2. Input your verification code.
3. Click 'Submit'.
4. You will be shown a page where you need to choose a password.

Activate account

Please enter a password

Passwords are to be:

- 13 or more characters with no complexity requirements, or
- a minimum of 9 characters with at least 3 of the following character sets
 - lowercase characters (a-z)
 - uppercase characters (A-Z)
 - digits (0-9)
 - punctuation and special characters
- changed at least every 90 days
- changed by users no more than once a day
- not reused from any of the preceding eight changes

Password: * response required

Confirm password: * response required

5. Enter your password.
6. Confirm your password.
7. Click 'Submit'.
8. Your account will now be activated.

Activate account

Thank you FirstName1 Surname1, your Strategic Data account is now activated.
Please proceed to the [Login page](#) now.

© Strategic Data 2016

9. Navigate to <https://pmhc-mds.net/> and follow the [Logging In](#) instructions.

1.2.2. Logging In

After navigating to <https://pmhc-mds.net/> click the 'Sign in' button to login.

Sign In

E-mail or username:

Password:

Sign in

[Forgot Password](#) | [Help](#)

You will be presented with a login form. Enter your email address or username and then your password and click 'Sign in'.

If it is your first time logging in, you will be asked to set a backup email address.

Login to PMHC MDS successful.

Welcome FirstName Surname.

You do not have a backup email stored. This email is used to allow you to reset your password if you lose access to your primary account. It is advisable to set a backup email.

[Set a backup email now.](#)

[Continue to site.](#)

The backup email address is used when resetting your password. If you forget your password an email is sent to both your primary email address and your backup email address. This allows you to regain access to your account in the event that you no longer have access to your primary email address.

1. Click 'Set a backup email now.'
2. You will be shown the manage details page.

15. Navigate back to <https://pmhc-mds.com/> and sign in.

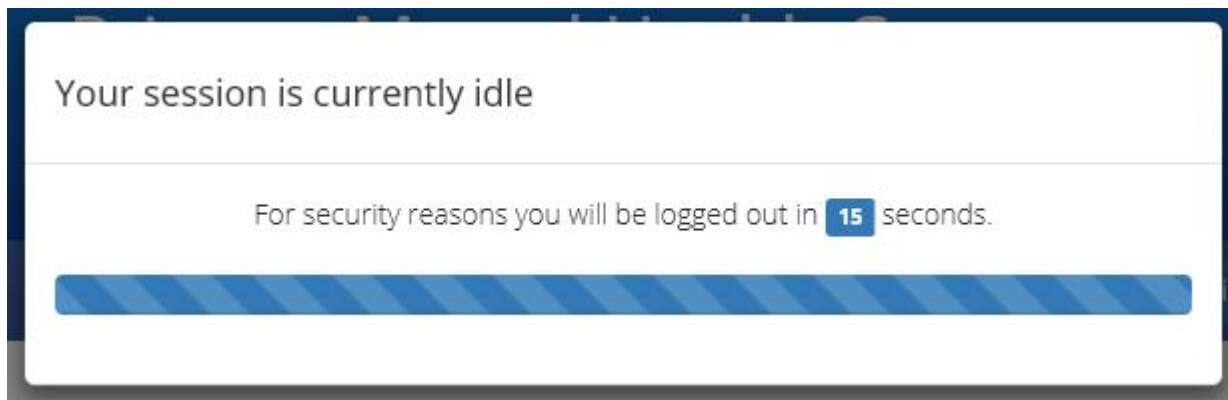

1.2.4. Logging Out

Once logged in, logout by:

1. Clicking on the button to the right of the menubar that says 'Logged in as [Name]'.
2. A drop down menu will appear.
3. Click 'Logout'.

We highly encourage users to logout once they have completed their tasks.

Please note - the PMHC MDS will automatically log out users after 15 minutes of inactivity. You will see a pop up box that will provide a count down feature prior to automatically logging out the idle user.

1.2.5. Updating your details

Once signed in, to edit your details:

1. Click on the button to the right of the menubar that says 'Logged in as [Name]'.
2. A drop down menu will appear.
3. Click 'Profile'.
4. You will be taken to the Profile Management system.
5. Login using your PMHC MDS email/username and password.
6. You will see the 'Manage Details' page.

8. To update your primary email address, click the 'Change email address' link.
9. To update your backup email address, click the 'Change backup email address' link.
10. To update your mobile phone number, click the 'Change mobile phone number' link.
11. The last section on the page 'Password lifetime', tells you when you last changed your password and when it will expire. Passwords have to be changed every 3 months.

1.3. Organisations

You will be able to see the Organisations tab if you have been assigned the 'Organisation Management' or the 'User Management' role, , when logged into the PMHC MDS on <https://pmhc-mds.net>.

If you believe you should have access to an organisation and it doesn't appear in your list please contact someone in that provider organisation or the provider organisation's PHN who has the 'User Management' role.

If you are unsure who has the 'User Management' role please email the PMHC helpdesk at support@pmhc-mds.com

After navigating to the organisation tab, you will be presented with a list of top level organisations for which you have been assigned the 'Organisation Management' or the 'User Management' role.

Organisations

Users with the Organisation Management role can use this tab to view, add and edit an organisation commissioned by a PHN.

Users with the User Management role will also be able to use this tab to see all users assigned to an organisation.

Support: For more information and assistance visit [PMHC MDS Documentation](#). (link opens in a new window)

1.3.2. Searching for a Provider Organisation

You can search for a provider organisation by sorting and filtering the provider organisations of a PHN. Follow these steps:

1. Navigate to the Organisations tab.
2. Click on the PHN name in blue text displayed within the table list.
3. Click on the 'Provider Organisations' tab.
4. Sort the listed provider organisations by simply clicking on a column header of the provider organisations table. Alternately you can click on the arrow beside a column header for more sort options, as follows:
 - Sort Ascending
 - Sort Descending
 - Remove Sort
 - Hide Column

To filter the listed provider organisations:

1. Click the grey 'Filters' button.
2. Start typing in an edit box now displayed under the column headers.

1.3.4. Adding a Provider Organisation

If you have the 'Organisation Management' role you can add provider organisations through the organisation tab by following these steps:

1. Navigate to the Organisations tab.
2. Click on the PHN name in blue text displayed within the table list.
3. Click on the 'Provider Organisations' tab.
4. Click the 'Add Provider Organisation' tab.

The screenshot shows a web-based application interface for adding a provider organization. At the top, there is a breadcrumb navigation: Home / Organisations / PHN999 / Add Provider Organisations. Below this, the title '★PHN 'Test PHN'' is displayed. The main area contains a form with the following fields:

- Organisation Path:** PHN999:
- Name ***: A text input field.
- ABN ***: A text input field.
- State ***: A dropdown menu.
- Tags**: A text input field.
- Organisation Key ***: A text input field with a small edit icon.
- Legal Name**: A text input field.
- Type ***: A dropdown menu.
- Status ***: A dropdown menu.

A blue 'Save' button is located at the bottom left of the form.

5. Complete all the mandatory fields marked with an * in the add Provider Organisation form.
6. Click the blue 'Save' button.

You will receive confirmation that the organisation has been saved, and it will now be displaying in the PHN's Provider Organisations list.

1.3.5. Editing a Provider Organisation

If you have the 'Organisation Management' role you can edit a Provider Organisation's details through the organisation tab, by following these steps:

1. Navigate to the Organisations tab.
2. Click on the PHN name in blue text displayed within the table list.

4. Update the organisations details. Mandatory fields are marked with an *
5. Click the blue 'Save' button.

1.3.6. Inactivate a Provider Organisation

You can make a provider organisation inactive by editing the 'Status' of the provider organisation from active to inactive. See [Editing a Provider Organisation](#)

Please note: Inactive organisations will still be displayed in your organisations list.

1.3.7. Deleting a Provider Organisation

You cannot delete a provider organisation. If you believe an organisation should be deleted please email support@pmhc-mds.com.

1.4. Users

You will only be able to see the Users tab if you have been assigned the 'User Management' role, when logged into the PMHC MDS on <https://pmhc-mds.net>.

If you don't have access to the Users tab and you believe you should, please contact someone in your provider organisation or provider organisation's PHN who has the 'User Management' role.

If you are unsure who has the 'User Management' role please email the PMHC Helpdesk at support@pmhc-mds.com

After navigating to the Users tab, you will be presented with a list of the users that are assigned to the organisations for which you have the 'User Management' role.

The screenshot shows the 'Users' tab selected in the top navigation bar. The main content area displays a table of users with columns for Username, Name, and Email. The table contains 25 rows of data, each representing a user account. The 'Username' column lists user1 through user25. The 'Name' column lists 'given-user1 surname-user1' through 'given-user25 surname-user25'. The 'Email' column lists 'user1@email.example.com' through 'user25@email.example.com'. At the bottom of the page, there is a footer with the Australian Government Department of Health logo and links to PMHC-MDS managed by Strategic Data Pty Ltd, Contact Support, and User Documentation.

Username	Name	Email
user1	given-user1 surname-user1	user1@email.example.com
user10	given-user10 surname-user10	user10@email.example.com
user11	given-user11 surname-user11	user11@email.example.com
user12	given-user12 surname-user12	user12@email.example.com
user13	given-user13 surname-user13	user13@email.example.com
user2	given-user2 surname-user2	user2@email.example.com
user21	given-user21 surname-user21	user21@email.example.com
user22	given-user22 surname-user22	user22@email.example.com
user23	given-user23 surname-user23	user23@email.example.com
user24	given-user24 surname-user24	user24@email.example.com
user25	given-user25 surname-user25	user25@email.example.com

1.4.1. Users Roles

Access to the PMHC MDS is based around roles. The following table provides a summary of each of the roles that currently exist within the PMHC MDS:

Role	Tasks allowed
Organisation Management	A user with the Organisation Management role for a PHN can manage provider organisations for that PHN.
User Management	A user with the User Management role for an organisation can manage user accounts for that organisation
Upload	A user with the Upload role can upload data to the associated organisation
Reporting	A user with the Reporting role can run reports and download data from the associated organisation
Data Entry	A user with the Data Entry role can enter client data and practitioners from the associated organisation

Each role allows a user to perform specific tasks. A user can have more than one role. Each role is granted for a user against an organisation. An organisation can either be a Primary Health Network or a provider organisation. If a user is granted a role for a Primary Health Network (PHN) they will also have this role for any provider organisation's of that PHN. A user can be invited to have a role at more than one organisations. There is no limit to the number of users per organisation.

What users see once they are logged in will depend upon what roles they have been assigned. The table below lists the tabs that will be shown for each role:

Role	Tab
Organisation Management	Organisations
User Management	Organisations, Users
Upload	Upload
Reporting	Reports, Data Extract
Data Entry	Data Entry
All users	SLK

1.4.2. Finding a user

You can sort and filter the listed users through the Users tab.

Please note: Newly invited users will not be visible until they have successfully accepted their invitation.

Sort the listed users by simply clicking on the column header. Alternately you can click on the arrow beside a column header for more sort options, as follows:

- Sort Ascending
- Sort Descending
- Remove Sort
- Hide Column

To filter the listed users:

1. Click the grey 'Filters' button.
2. Start typing in an edit box now displayed under the column headers.
3. To remove the filter, click the grey cross within the edit box beside any entered text.

List			Filters
Username	Name	Email	
orga.user1	given-orga.user1 surname-orga.user1	orga.user1@email.example.com	
user1	given-user1 surname-user1	user1@email.example.com	

1.4.3. Viewing a User's details

You can view a user's details through the user tab, by following these steps:

1. Navigate to the Users tab.
2. Click on the user's name in blue displayed within the table list.

Home / Users / given-user1 surname-user1 details

given-user1 surname-user1 details

Details	Roles
View Details	
Username	Email
user1	user1@email.example.com
Name	Login Status
given-user1 surname-user1	1

A page will display showing the user's details and the [Users Roles](#) they have at particular organisations. See [Viewing a user's roles](#).

1.4.4. Editing a User's details

A user can edit their own contact details.

See [Updating your details](#)

1.4.5. Adding a new user

Note: PHNs can devolve ‘user management’ authority to one or more users in a provider organisation so that the provider organisation can manage their own logins, or a PHN can choose to keep user management authority at the level of the PHN requiring each provider organisation to contact the PHN when they need a new user added.

Each individual staff member should be set up with their own unique login access. Generic login accounts are not encouraged to be set up and used within the PMHC MDS, and usernames/passwords should not be shared with other individuals. This process ensures that when a staff member leaves, their access can be easily disabled and it doesn’t affect other users or the security of the organisation’s data. A user’s account, should not be passed from one staff member to the next.

Before inviting a user, it is always best to inform them that they will receive a PMHC MDS invitation by email from noreply@strategicdata.com and a verification code via SMS. You can also provide them with the link to the online [User Guide](#) to read the steps they will need to complete the steps outlined in [Accepting an invitation to become a PMHC MDS User](#).

The next step to adding a new user is to invite them through the Users tab, by following these steps:

1. Navigate to the Users tab.
2. Click the ‘Invite New User’ tab.

The screenshot shows a user interface for inviting a new user. At the top, there are two tabs: 'Users' and 'Invite New User'. The 'Invite New User' tab is highlighted. Below the tabs, the word 'Invite' is displayed. The main form area has several input fields:

- First Name ***: An input field with a placeholder icon.
- Surname ***: An input field.
- Email ***: An input field containing 'example@test.com'.
- Mobile ***: An input field containing '0402 030 405'.
- Organisation ***: A dropdown menu.
- Roles ***: A section with five checkboxes:
 - Organisation Management
 - User Management
 - Reporting
 - Data Entry
 - Upload

At the bottom of the form are two buttons: 'Invite' (highlighted in blue) and 'Clear'.

3. Complete all the fields with the new users contact details. (Mandatory fields are marked with an *)
4. Select an organisation, either a PHN or Provider Organisation.
5. Assign one or more [Users Roles](#). (extra roles can be added after the user has access to the system. See [Editing a user's roles](#))

6. Click the blue 'Invite' button.
7. You will receive confirmation that the user has been sent an email to invite them to the PMHC MDS. They will also be sent an SMS containing a verification code. The user will need to follow the instructions in the email before they can gain access to the system. This invitation will be valid for 7 days.
8. When the user has accepted the invitation you will be sent an email to let you know. This user will now be listed in the View Users table.

noreply@strategicdata.com.au
 To: firstname.surname@email.example.com
 PMHC MDS invitation accepted

Hello,

A short while ago you invited FirstName1 Surname1 to sign up to the PMHC MDS authentication system.

They have now completed the sign-up process, so you are now able to assign roles to them, by searching for their email address: firstname1.surname1@po1.example.com

Thank you.

Please note: An invitation for a new user is valid for 7 days. You can not re-invite this user within this time, unless the verification code has expired, or they have :ref:` accepted the invitation <accepting-invitation>`.

1.4.6. Adding an existing user

Note: An existing user must have completed the required steps for [Accepting an invitation to become a PMHC MDS User](#) from their initial PMHC MDS invitation before they can be added again.

Before adding an existing user please ensure you have the same email and mobile number as their current PMHC MDS Profile. By ensuring these are identical, the system will automatically pick up if a user already exists in the PMHC MDS.

You can invite an existing user through the Users tab, by following these steps:

1. Navigate to the Users tab.
2. Click the 'Invite New User' tab.
3. Complete all the mandatory fields marked with an * in the 'Invite User' form, ensuring these are the same details as their existing PMHC MDS Profile.
4. Select an organisation and assign their [Users Roles](#).

The screenshot shows a user interface for inviting a new user. At the top, there are two tabs: 'Users' (which is selected) and 'Invite New User'. Below the tabs, the word 'Invite' is displayed. The main form area is titled 'Invite'. It contains several input fields and dropdown menus. On the left, there's a 'First Name *' field, an 'Email *' field containing 'example@test.com', and an 'Organisation *' dropdown menu. On the right, there's a 'Surname *' field, a 'Mobile *' field containing '0402 030 405', and a 'Roles *' section with five checkboxes: 'Organisation Management', 'User Management', 'Reporting', 'Data Entry', and 'Upload'. At the bottom of the form are two buttons: a blue 'Invite' button and a white 'Clear' button.

5. Click the blue 'Invite' button.
6. You will receive confirmation that the roles have been added to the existing user.
7. Please note: You will need to notify the user that they have been added to the organisation and confirm their authorised roles. The system will not automatically do this.

1.4.7. Viewing a user's roles

A user can have more than one role. Each role is granted for a user against an organisation you have the User Management Role at.

You can edit and assign extra roles to an existing user by following these steps:

1. Navigate to the Users tab.
2. Click on the user's name in blue displayed within the table list.
3. Click the 'Roles' tab to show the user's assigned roles.

User Details Roles

View Roles Edit Roles

Note: Organisations can be filtered by typing or selecting criteria below.

Organisation P...	Organisation N...	Organisation ...	User Managem...	Reporting	Data Entry	Upload
PHN999	Test PHN	<input checked="" type="checkbox"/>				
— PHN999:NFP01	Test PO 1		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
— PHN999:NFP02	Test PO 2		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
— PHN999:NFP03	Test PO 3		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

A tick displays the user currently has this role assigned at the relevant organisation.

1.4.8. Editing a user's roles

A user can have more than one role. Each role is granted for a user against an organisation you have the User Management Role at.

You can edit and assign extra roles to an existing user by following these steps:

1. Navigate to the Users tab.
2. Click on the user's name in blue displayed within the table list.
3. Click the 'Roles' tab.
4. Click the 'Edit Roles' tab.

given-user54 surname-user54 details

The screenshot shows a user interface for managing roles. At the top, there are tabs for 'User Details' and 'Roles'. Below these are buttons for 'View Roles' and 'Edit Roles'. A warning message states: 'Warning: Roles will be automatically saved when edited.' The main area is a table with columns: Organisation P..., Organisation N..., Organisation ... (partially visible), User Managemem..., Reporting, Data Entry, and Upload. The rows represent different roles assigned to organisations. The first row is a header. The second row contains 'PHN104' and 'phnonehundredand'. The third row contains '— PHN104:0001' and 'phnonehundredand'. The fourth row contains '— PHN104:0002' and 'phnonehundredand'. The fifth row contains 'PHN999' and 'Test PHN'. The sixth row contains '— PHN999:NFP01' and 'Test PO 1'. The seventh row contains '— PHN999:NFP02' and 'Test PO 2'. The eighth row contains '— PHN999:NFP03' and 'Test PO 3'. Checkboxes are present in the table cells, indicating whether a role is assigned or not.

Organisation P...	Organisation N...	Organisation ...	User Managemem...	Reporting	Data Entry	Upload
PHN104	phnonehundredand	<input type="checkbox"/>				
— PHN104:0001	phnonehundredand		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
— PHN104:0002	phnonehundredand		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
PHN999	Test PHN	<input checked="" type="checkbox"/>				
— PHN999:NFP01	Test PO 1		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
— PHN999:NFP02	Test PO 2		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
— PHN999:NFP03	Test PO 3		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

6. A tick indicates the user currently has this role assigned at the relevant organisation. Multiple roles can be assigned and these roles are shown as blue tickets.

Add a role by clicking the empty checkbox.

Remove a role by clicking the ticked checkbox.

7. All changes are automatically saved.
8. You will need to notify the user of these role changes. The system will not automatically do this.

1.4.9. Deleting a user

A user can be deleted from an organisation by removing all the roles the user has at that organisation.

See [Editing a user's roles](#)

1.4.10. Viewing all Organisational Users

You can view users assigned to an organisation through the organisation tab, by following these steps:

1. Navigate to the tab showing either the PHNs details or the provider organisations details.
2. Click on the PHNs or provider organisations name in blue displayed within the table list. If you are unsure how to view the details see [Viewing a PHN](#) or [Viewing a Provider Organisation](#)
3. Under the 'Users' tab, you can view a table list of the organisation's users.
4. You can filter the users within this table list, click the grey 'Filters' button and start typing in an edit box now displayed under the column headers. To remove the filter, click the grey cross within the edit box beside any entered text.

1.4.11. Assigning Extra Roles to an Organisational User

You can assign extra roles to an existing organisational user, by following these steps:

1. Once [Viewing a Client's details](#)
2. Click the users name
3. Follow on from Step 3 at [Editing a user's roles](#).

1.5. Upload

You will only be able to see the Upload tab if you have been assigned the 'Upload' role, when logged into the PMHC MDS on <https://pmhc-mds.net>.

If you don't have access to the Upload tab and you believe you should, please contact someone in your provider organisation or provider organisation's PHN who has the 'User Management' role.

If you are unsure who has the 'User Management' role please email the PMHC helpdesk at support@pmhc-mds.com

After navigating to the Upload tab, you will be presented with a drop down list of the organisations to which you can upload.

Upload

Users with the Upload role can use this tab to upload files, view file upload status along with validation error reports and successful upload summaries.

Files will be accepted in the following types:

- A zip file (.zip) containing Comma Separated Values (.csv) files
- Excel (XLSX)

Note: After your file has been submitted, it will then be validated. You will receive an email informing you if your file was successfully uploaded to the PMHC MDS, or outlining any errors that occurred.

For more information on the data requirements please refer to the [Upload Specification](#).

Support: For more information and assistance visit [PMHC MDS Documentation](#). (link opens in a new window)

Test PHN (PHN999)

Select File **Upload**

Upload as test data

File to upload: pmhc-upload_test-data.xlsx

6. Check to ensure you have selected the correct file by reviewing the file name now displayed below the 'Select File' button.
7. Click the green 'Upload' button.

You will receive confirmation that your file has been accepted. The file will now be validated and you will shortly receive an email informing you if your file was successfully uploaded to the PMHC MDS, or informing you of any errors that occurred. Further discussion about the error messages can be found at [Error messages](#). Please email support@pmhc-mds.com if you don't receive an email within one hour.

1.5.2. Uploading a file in Test Mode

A file can be uploaded in Test Mode. When uploading in test mode, the file is validated, however the data is not updated in the PMHC MDS database.

After navigating to the Upload tab, you will be able to upload in Test Mode data files to organisations for which you have the 'Upload' role.

You can upload data files in Test Mode through the upload tab, by following these steps:

1. Navigate to the 'Upload' tab.
2. If you are allowed to upload to more than one organisation you will be asked to select an organisation name.
3. Select the name of the organisation whose data you are uploading from the drop down list.
4. Click the blue 'Select File' button.
5. Navigate to where the upload file is saved on your system. Select the file and click the grey 'Open' button.
6. Check to ensure you have selected the correct file by reviewing the file name now displayed below the 'Select File' button.
7. Click the 'Upload as test data' checkbox on the right hand side.

The screenshot shows the 'Upload' tab selected in the navigation bar. Below it, there are two tabs: 'Upload a File' (selected) and 'Upload Status'. A sub-section titled 'Upload' is active. It contains instructions for file types (zip or csv) and a note about validation emails. It also links to 'upload specification' and 'FAQs'. A dropdown menu for 'Organisation*' shows 'Test PHN (PHN999)'. Below this are 'Select File' and 'Upload' buttons, and a checked 'Upload as test data' checkbox. A file path 'pmhc-upload_test-data-numbers.xlsx' is shown above the upload buttons.

8. Click the green 'Upload' button.

You will receive confirmation that your file has been accepted. The file will now be validated and you will shortly receive an email informing you if your file was valid, or informing you of any errors that occurred.

Even if your file was valid, the data will not be updated in the PMHC MDS database.

1.5.3. Viewing Previous Uploads

The PMHC MDS allows you to review previous uploads. At the bottom of the Upload tab there is a 'Status of Previous Uploads' table.

If you need to see a test upload please check the 'Show test uploads' checkbox.

Upload A File		Upload Status					
State of Previous Uploads							
<input checked="" type="checkbox"/> Show test uploads This table will refresh in 41 seconds.							
Date Uploaded	Organisation Name	File Name	Test	Status			
18-05-2017 5:48	Test PHN	extract (8).xlsx	No	accept			
18-05-2017 5:46	Test PHN	fixtures.xlsx	No	error			
18-05-2017 5:44	Test PHN	upload (8).zip	No	error			
18-05-2017 5:33	Test PHN	upload (45).xlsx	Yes	complete			
24-04-2017 2:07	Test PHN	pmhc-upload - additional column data.xlsx	Yes	error			
21-04-2017 1:34	Test PHN	pmhc-upload - updated SZ.xlsx	Yes	error			
19-04-2017 9:50	Test PHN	pmhc-upload - test K10 .xlsx	Yes	complete			
18-04-2017 4:24	Test PHN	pmhc-upload - test K10 .xlsx	Yes	complete			
18-04-2017 4:17	Test PHN	pmhc-upload - test K10 .xlsx	Yes	error			

When an upload has been completed, regardless of whether it validated successfully or not, the upload will be added to the table.

The 'Status of Previous Uploads' table refreshes every 60 seconds. Types of status results are:

- **accept** - the file is currently going through the validation process
- **complete** - the file has successfully passed the validation process
- **error** - the file has returned errors through the validation process. Please review the error messages and correct the data to upload again

Further discussion about the error messages can be found at [Error messages](#). Please email support@pmhc-mds.com if you don't receive an email within one hour.

1.5.4. Viewing Upload Details

You can view the results of an upload by following these steps:

1. Navigate to the 'Upload' tab.
2. Click the 'Upload Status' tab.
3. Locate the date and time of the upload you are interested in.
4. Click on the filename of the relevant upload.
5. You will be shown the 'Upload Detail' page.

1.5.5. Complete uploads

[Viewing Upload Details](#) for complete uploads will display data verification information by listing the number of data records present and if those records are added, updated, or deleted, within the MDS records.

Errors

Upload error summary

File/Worksheet	Row	Column Name	Error
Sdq	3	sdq_item42	invalid for the SDQ version used. Please refer to https://docs.pmhcm-ds.com/data-model-and-specifications.html#sdq for allowed items.
K10p	5	k10p_score	Item scores and total scores have been used. Use item scores only.
Service contacts	6	service_contact_postcode	Invalid service_contact_postcode. When Service Contact Modality is not "Face to Face", Service Contact Postcode should be set to 9999.
Service contacts	8	organisation_path / practitioner_key	value of "PHN999:NFP01 / PO2" is invalid.
Service contacts	9	organisation_path / episode_key	value of "PHN999:NFP02 / E01" is invalid.
Service contacts	9	organisation_path / practitioner_key	value of "PHN999:NFP02 / P01" is invalid.
Service contacts	9	service_contact_participants	value of "6" is invalid.
Clients	6	organisation_path / client_key	value of "PHN999:NFP01 / CL03" is not unique. A previous row in the file contains the same values.
Episodes	6	organisation_path / client_key	value of "PHN999:NFP01 / CL03" could not be matched to a unique row in the table Clients.
Episodes	6	additional_diagnosis	required.
Episodes	6	additional_diagnosis	value of "[blank]" is invalid.
Practitioners	5	practitioner_active	value of "2" is invalid.
Practitioners	6	organisation_path	value of "PHN999" is invalid.

The definition of each data item has associated notes that will provide guidance on why an error is returned. By visiting the data specifications documentation and clicking on the [Record formats](#) field name this will take you to the field definition which outlines the associated notes.

Please email support@pmhc-mds.com if you require assistance in understanding an error message.

Below are some example error messages, and how to fix them:

1.5.6.1. Could not find worksheet [Name]

This error occurs when you are uploading an Excel spreadsheet. The worksheet names need to exactly match the name in the 'Excel worksheet name' column of the 'Summary of files to upload' table at [Files or worksheets to upload](#). If all the required worksheets are not present you will receive the error above.

1.5.6.2. Invalid version line in worksheet [Name]

The top line of the worksheet must include the following columns:

Version	1.0
---------	-----

1.5.6.3. Column [Name] is not valid

Each item is a column in the file/worksheet. The 'Field Name' should be used for the column headings. These values can be found at [File format](#), or listed on the provided example file at [Files or worksheets to upload](#). If the Column [Name] doesn't match identically you will receive the error above.

1.5.6.4. Organisation_path is not valid on row ...

The organisation path provided does not map to a valid organisation. The format should be a combination of your PHN key and the provider organisation key, separated with a colon. Example PHN_key:POrg_key. If the organisation path doesn't match identically you will receive the error above.

1.5.6.5. Invalid version number on row 1.

You need to record a valid version number on row 1, in column 2. Column one will include the word Version, Column two should include a number. We are currently only accepting Version 1, or Version 1.X eg 1.0 or 1.1 . If the version number doesn't match identically you will receive the error above.

1.5.6.6. Column [Name] is required on row ...

There is a required field that has not been entered. If not supplied, insert the default 'Missing' or 'Not recorded' value. These values can be found at [Record formats](#). If the Column [Name] is blank in a mandatory field you will receive the error above.

1.5.6.7. Invalid file ...

The system is having trouble identifying your upload file. Please provide a copy of your upload file to support@pmhc-mds.com.

1.5.6.8. Could not parse worksheet [Name]: Bad request at ...

Something has gone wrong with the upload. Please contact support@pmhc-mds.com.

1.6. Data Entry

You will only be able to see the Data Entry tab if you have been assigned the 'Data Entry' [Users Roles](#), when logged into the PMHC MDS on <https://pmhc-mds.net>.

If you don't have access to the Data Entry tab and you believe you should, please contact someone in your provider organisation or provider organisation's PHN who has the 'User Management' role. If you are unsure who has the 'User Management' role please email the PMHC Helpdesk at support@pmhc-mds.com

After navigating to the Data Entry tab, you will be presented with three search boxes which will allow you to easily find and view the client data for the organisations you have permission to access.

The screenshot shows the 'Data Entry' section of the PMHC MDS application. At the top, there are tabs for 'Home', 'Data Entry' (which is selected), and 'SLK'. A user is logged in as 'given-user8 surname-user8'. Below the tabs, a breadcrumb navigation shows 'Home / Data Entry / Clients / View Clients'. The main title is 'Data Entry', with a subtitle indicating users with the Data Entry role can add, view, and edit client records. A 'Support' link leads to 'PMHC MDS Documentation'. The interface includes tabs for 'Clients' and 'Practitioners', with 'Clients' selected. Under 'Clients', there are links for 'View Clients' and 'Add New Client'. Three search fields are displayed, each with a 'Clear Search' button and a 'Search' button. The first field is 'Client Key *', the second is 'SLK *', and the third is 'DOB *'. Each field has an 'OR' label below it, indicating they are alternative search methods. A 'Client' help icon is also present.

1.6.1. Client Data

1.6.1.1. Finding a Client

There are three **Search Fields** options available to find a client.

1.6.1.1.1. Search Fields

You can choose any one of three search options to search for a client, depending on the client information that you have available to you at the time.

- **Client Key** - You can use this field to type in a whole **Client Key**, or start thereof.
- **SLK** - You can use this field to type in a client's **Statistical Linkage Key**
- **DOB** - You can use this field to type in a client's **Client - Date of Birth**.

The image shows three separate search boxes arranged horizontally. Each box contains a text input field, a 'Clear Search' button, and a blue 'Search' button.

- Client Key ***: Contains a text input field with placeholder text and a 'Search' button.
- OR**: A bolded word indicating an alternative search method.
- SLK ***: Contains a text input field with placeholder text and a 'Search' button.
- OR**: A bolded word indicating an alternative search method.
- DOB ***: Contains a text input field with placeholder text, a calendar icon, and a 'Search' button.

After entering information into one of these **Search Fields**, simply click the blue 'Search' button to see **Client Search Results**

Use the grey 'Clear Search' button to removed any previously entered text.

1.6.1.2. Client Search Results

A display of the details used within the **Search Fields** used in **Finding a Client** will be visible above the search results table, when results are available.

You can sort the listed client search results through either of the above three search features for **Search Fields**.

Sort the listed clients by simply clicking on the column header. Alternately you can click on the arrow beside a column header for more sort options, as follows:

- Sort Ascending
- Sort Descending
- Remove Sort
- Hide Column

The image shows a client search results table with the following columns: Client Key, Organisation Path, SLK, Date Of Birth, Gender, Last Known Postcode, and Last Contact Date. The table displays 10 rows of client data, each with a unique Client Key and corresponding demographic information.

Client Key ▲ ▼	Organisation Path	SLK ▼	Date Of Birth ▼	Gender ▼	Last Known Postcode	Last Contact Date

Save

- Click the blue 'Save' button. (If you decide not to add this client's episode, you can simply navigate away from this screen)

You will receive confirmation that the Client's service contact details have been added, and it will now be displaying these new details in the View service Contact Details tab.

If you receive an error message, the data will need to be corrected before the record is saved and added to the PMHC MDS. See Validation Rules - [4. Service Contact](#)

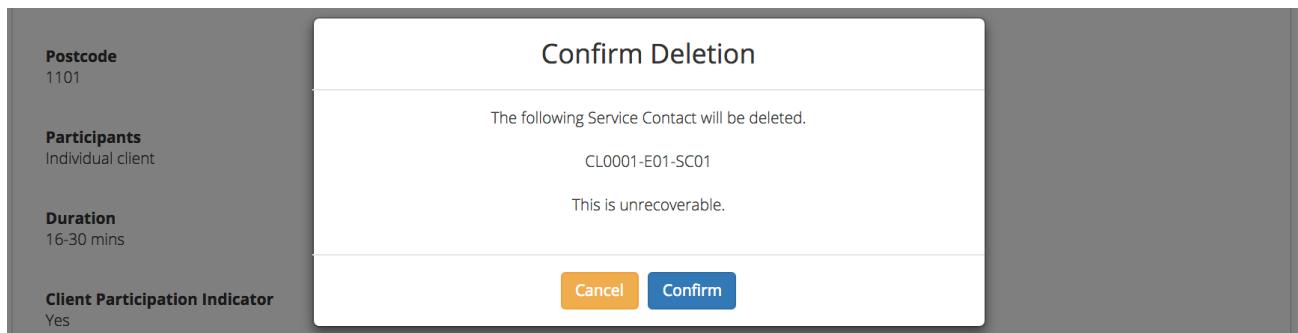

1.6.3.4. Deleting an Service Contact

You can delete a client's service contacts through '[Viewing a Client's Service Contacts for an Episode](#)' available on the Data Entry tab, by following these steps:

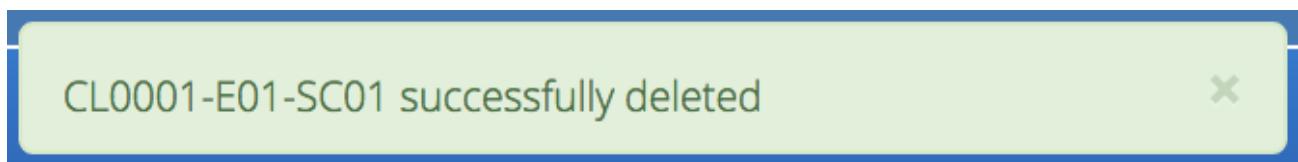

1. Search for the client.
2. From the Client Search Results table, click the Client Key.
3. Click Episodes tab, to view Client's Episodes.
4. From the View Episodes table, click the Episode Key.
5. Click Service Contacts tab, to View Client's Service Contacts.
6. From the View service contact table, click the Service Contact Key.
7. Click the red 'Delete' button.
8. You will be displayed a 'Confirm Deletion' screen.

Please note: Once the service contact is deleted, you will not be able to recover this service contact data.

9. Click the blue 'Confirm' button to delete this service contact. (or click the orange 'Cancel' button if you decide not to delete this service contact data)

After you click 'Confirm', you will receive confirmation that the service contact has been deleted, and you will be redirected to the [View Service Contacts](#) where the service contact will no longer be displayed.

1.6.4. Outcome Collection Occasions

1.6.4.1. Viewing a Client's Outcome Collection Occasions for an Episode

You can view a clients's outcome collection occasions through [Viewing a Client's Episodes](#) available on the Data Entry tab, by following these steps:

1. Once [Viewing the Client's Episode](#).
2. Click the Episode Collection Occasions Tab. This tab displays in brackets the total number of collection occasions recorded in the PMHC MDS for this episode.

A table will display all the Collection Occasions linked to this Client's Episode.

Save

- Click the blue 'Save' button. (If you decide not to save changes, you can simply navigate away from this screen)

You will receive confirmation that the practitioner's details have been added, and it will now be displaying these new details in the View Practitioner Details tab.

If you receive an error message, the data will need to be corrected before the record is saved and added to the PMHC MDS. See Validation Rules - [1. Practitioner](#)

You can add a practitioners individually through the data entry interface or alternately, practitioner records can be uploaded in bulk. See [Upload](#)

1.6.5.6. Deleting a Practitioner

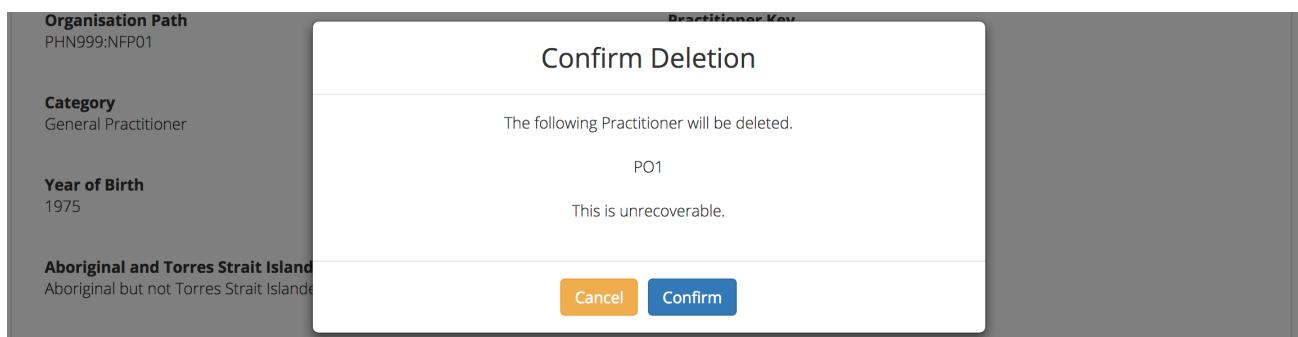

You can delete a practitioner's details through [Editing a Practitioner](#) on the Data Entry tab, by following these steps:

- Click on the [Practitioners](#) tab.
- Click on the practitioner's key in blue displayed within the table list.
- Click the red 'Delete' button.
- You will either be displayed a '[Confirm Delete](#)' screen or a '[Cannot Delete](#)' screen.

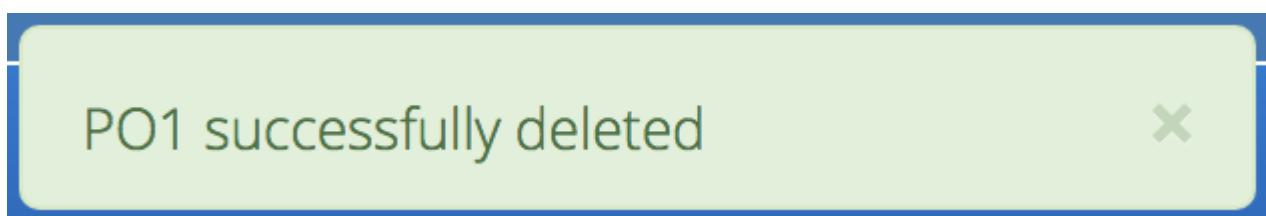

1.6.5.6.1. Confirm Delete

Please note: Once the practitioner is deleted, you will not be able to recover this practitioner data.

1. Click the blue 'Confirm' button to delete this practitioner. (or click the orange 'Cancel' button if you decide not to delete this practitioner data)

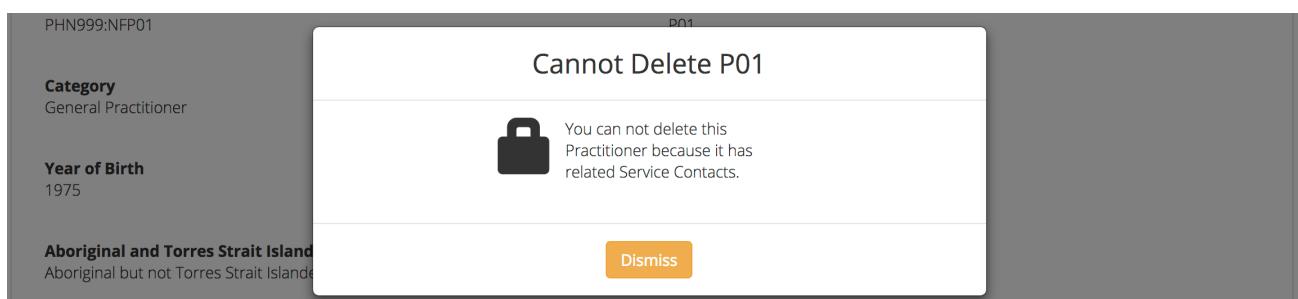

After you click 'Confirm', you will receive confirmation that the practitioner has been deleted, and you will be redirected to the [View Practitioners](#) where the practitioner will no longer be displayed.

1.6.5.6.2. Cannot Delete

If the practitioner you are trying to delete has any dependant records, you will not be able to proceed with deleting this practitioner until all the related records have been edited or deleted.

1. You can click the orange 'Dismiss' button.

See [Editing a Client's Service Contacts for an Episode](#) or [Deleting an Service Contact](#).

1.6.5.7. Inactive Practitioners

Currently a practitioner can not be deleted from the PMHC MDS if they have any dependant records.,

You can change the practitioner from 'active' to 'inactive' by editing their details. By doing this, the inactive practitioner keys will no longer be displayed in the Practitioner Key drop down list displayed on the Service Contact forms.

See [Editing a Practitioner](#).

1.7. Reports

You will only be able to see the Reports tab if you have been assigned the 'Reporting' [Users Roles](#), when logged into the PMHC MDS on <https://pmhc-mds.net>.

If you don't have access to the Reports tab and you believe you should, please contact someone in your provider organisation or provider organisation's PHN who has the 'User Management' role. If you are unsure who has the 'User Management' role please email the PMHC Helpdesk at support@pmhc-mds.com

After navigating to the Reports tab, you will be able to view and export various [Types of System Reports](#).

The screenshot shows the 'Reports' tab selected in the top navigation bar. The page title is 'Reports'. A sub-navigation bar shows 'Home / Reports'. The main content area is titled 'Select Report Type*' with a dropdown menu. Below it are fields for 'Start Date*' (17/12/2017) and 'End Date*' (17/01/2018), each with a calendar icon. There is a checkbox for 'Client Consent' with the label 'Include only records with Client Consent'. At the bottom is a large blue 'Request' button. The footer contains the Australian Government Department of Health logo and links to PMHC-MDS managed by Strategic Data Pty Ltd, Contact Support, and User Documentation.

1.7.1. How to produce a report

You can produce a system report by completing the fields in the Reports tab by following these steps:

1. Navigate to the 'Reports' tab.

Reports

Users with the Reporting role can use this tab to request reporting data

Support: For more information and assistance visit [PMHC MDS Documentation](#). (link opens in a new window)

Select Report Type*

Start Date*

End Date*

Client Consent

Include only records with Client Consent

2. Select the type of report you would like to produce.
3. If you are allowed to produce reports for more than one organisation you will be asked to select an organisation name.
4. Select the name of the organisation from the drop down list.
5. Click the first calendar icon to select the start date and then the second calendar icon to select the end date.
6. If you click the 'Include only records with Client Consent' tickbox, the data for client's that have not consented to their anonymised data being provided to the Department of Health will be excluded from your report. (See [Episode - Client Consent to Anonymised Data](#))
7. Click the blue 'Request' button.
8. Your report will be displayed on screen and can be downloaded as a CSV.

Note: If you are not sure what data is displayed in a report, please click on the 'Counting Rules Explained' link.

Report E1 - High level summary of overall volumes by entity for Test PHN; 01/10/2017 - 31/12/2017

Organisation	Clients	Episodes	Service Contacts	K10+	K5	SDQ	Practitioners
Test ATSI Provider One	3	0	0	0	0	0	0
Test Provider Organisation 1	0	0	0	0	0	0	1
Test Provider Organisation 2	1	0	0	0	0	0	0
Test Provider Organisation NFP1	12	17	25	37	4	0	12
Test Provider Organisation NFP2	12	0	0	0	0	0	0
Total	28	17	25	37	4	0	13

[Counting Rules Explained](#)

1.7.2. Types of System Reports

The reports are grouped into five categories, each designed to serve different purposes:

- Category A: Monitoring progress of MDS implementation
- Category B: Monitoring overall service delivery
- Category C: Monitoring implementation of stepped care
- Category D: Key Performance Indicators
- Category E: Reports for data managers to monitor data supply

Note: Category C-D reports are still to be implemented.

1.7.2.1. Category A: Monitoring progress of MDS implementation

These reports are designed to assist monitoring MDS uptake and compliance with key business rules.

The reports provide summary data on:

- Volumes ('active clients'/'active episodes'/contacts)
- Data quality in terms of compliance with key business rules

Available A category reports are:

- A1 - High level summary of overall volumes by entity
- A2 - Monthly volume trends
- A3 - Data quality report - Missing and invalid client data
- A4 - Data quality report - Missing and invalid episode data
- A5 - Data quality report - Missing and invalid service contact data
- A6 - Data quality report - Missing and invalid practitioner data
- A7 - Open episodes with no service contact activity for 90+ days
- A8 - Data quality report - Recording of outcome measures for open episodes
- A9 - Data quality report - Recording of outcome measures for completed episodes

Note: A subset of these reports is included in Category E: Reports for data managers to monitor data supply without any filtering for active clients or episodes to enable organisational data managers to monitor 'raw' upload and data supply to the MDS.

1.7.2.1.1. A1 - High level summary of overall volumes by entity

This report is designed to provide a 'one page' view, with data aggregated for the specified reporting period, covering counts of clients, episodes and service contacts.

Key specifications:

- To be counted, a client must have had one or more Service Contacts in the reporting period, defined for this report's purposes as 'Active Clients'. Clients are counted uniquely regardless of number of episodes.
- Episodes to be counted if one or more Service Contacts were recorded in the period - defined for this report purpose as 'Active Episodes'.
- All Service Contacts in the period are reported except those that are flagged as 'No Show'.
- All dates refer to date of service not date of data upload or data entry.

1.7.2.1.2. A2 - Monthly volume trends

This report is designed to show volume trends in clients, episodes and service contacts. Each data point in the table and the chart shows monthly data.

Key specifications:

- To be counted, a client must have had one or more Service Contacts in the reporting period, defined for this report purposes as 'Active Clients'. Clients are counted uniquely regardless of number of episodes.
- Episodes to be counted if one or more Service Contacts was recorded in the period – defined for this report purpose as 'Active Episodes'.
- All Service Contacts in the period are reported except those that are flagged as 'No Show'.
- All dates refer to date of service not date of upload or data entry.

1.7.2.1.3. A3 - Data quality report - Missing and invalid client data

The A3 reports are designed to identify Client data elements with significant amounts of missing or invalid data.

Two formats of this report are offered to users:

- [A3-1 - Data quality report - Missing and invalid client data - Summary](#)
- [A3-2 - Data quality report - Missing and invalid client data - Detail](#)

Key specifications:

- Clients to be counted uniquely regardless of number of episodes. To be counted, a client must have had one or more Service Contacts in the reporting period i.e. 'Active Clients'.
- Missing/invalid data defined as: Data elements with null or invalid values, or where 'system generated' codes have been reported to denote 'not stated', 'inadequately defined' or 'missing'.

1.7.2.1.3.1. A3-1 - Data quality report - Missing and invalid client data - Summary

Summary format provides a simple listing of missing/invalid data rates for relevant Client data elements, aggregated across the organisation, region or nationally.

1.7.2.1.3.2. A3-2 - Data quality report - Missing and invalid client data - Detail

Detailed format presents missing/invalid data rates at the entity level (PHN and Provider Organisation). For this version, the user selects the specific Client data element to be targeted for the report from a list of possible options.

Missing/invalid client data elements that can be selected for the A3-2 report are:

- Date of Birth
- Date of Birth Flag
- Gender
- ATSI status
- Country of Birth
- Main Language Spoken at Home
- Proficiency in Spoken English

Note: For a user with the Reporting role at a single Provider Organisation, this report is redundant as it would only ever have a single row, which is already present in the output of the A3-1 report. Therefore this report is not made available to these users.

1.7.2.1.4. A4- Data quality report - Missing and invalid episode data

The A4 reports are designed to identify data Episode elements with significant amounts of missing or invalid data.

Two formats of this report are offered to users:

- [A4-1 - Data quality report - Missing and invalid episode data - Summary](#)
- [A4-2 - Data quality report - Missing and invalid episode data - Detail](#)

Some Episode data elements are not included in the options list as they are allowed to have a blank value (eg. Episode End Date) or there is no missing value provided in the specification and the system doesn't allow blank values to be submitted (eg. Principal Focus of Treatment Plan):

- Client Consent to Anonymised Data
- Episode End Date
- Episode Completion Status
- Episode Start Date
- Medication - Antipsychotics (N05A)
- Medication - Anxiolytics (N05B)
- Medication - Hypnotics and sedatives (N05C)
- Medication - Antidepressants (N06A)
- Medication - Psychostimulants and nootropics (N06B)
- Principal Focus of Treatment Plan

Key specifications:

- Report counts only 'active episodes'. An Episode is defined as 'active' if it has one or more Service Contacts recorded in the period.
- Missing/invalid data defined as: Episode data elements with null or invalid values, or where 'system generated' codes have been reported to denote 'not stated', 'inadequately defined' or 'missing'.

1.7.2.1.4.1. A4-1 - Data quality report - Missing and invalid episode data - Summary

Summary format provides a simple listing of missing/invalid data rates for relevant Episode data elements, aggregated across the organisation, region or nationally.

1.7.2.1.4.2. A4-2 - Data quality report - Missing and invalid episode data - Detail

Detailed format presents missing/invalid Episode data rates at the entity level (PHN and Provider Organisation). For this version, the user selects the specific Episode data element to be targeted for the missing/invalid data report from a list of possible options.

Missing/invalid episode data elements that can be selected for the A4-2 report are:

- Episode Referral Date
- Referrer Profession
- Referrer Organisation Type
- Suicide Referral Flag
- GP Mental Health Treatment Plan Flag
- Homelessness flag
- Area of Usual Residence, Postcode
- Labour Force Status
- Employment Participation
- Source of Cash Income
- Health Care Card
- NDIS Participant
- Marital Status
- Principal Diagnosis
- Additional Diagnosis

Note: For a user with the Reporting role at a single Provider Organisation, this report is redundant as it would only ever have a single row, which is already present in the output of the A4-1 report. Therefore this report is not made available to these users.

1.7.2.1.5. A5 - Data quality report - Missing and invalid service contact data

The A5 reports are designed to identify Service Contact data elements with significant amounts of missing or invalid data.

Two formats of this report are offered to users:

- [A5-1 - Data quality report - Missing and invalid service contact data - Summary](#)
- [A5-2 - Data quality report - Missing and invalid service contact data - Detail](#)

Some service contact data elements are not included in the options list as there is no missing value provided in the specification and the system doesn't allow blank values to be submitted:

- Service Contact Date
- Service Contact Final
- Service Contact Type
- Service Contact Modality
- Service Contact Duration
- Service Contact Copayment
- Service Contact Client Participation Indicator
- Service Contact No Show

1.7.2.1.5.1. A5-1 - Data quality report - Missing and invalid service contact data - Summary

Summary format provides a simple listing of missing/invalid data rates for relevant Service Contact data elements, aggregated across the organisation, region or nationally.

1.7.2.1.5.2. A5-2 - Data quality report - Missing and invalid service contact data - Detail

Detailed format presents missing/invalid Service Contact data rates at the entity level (PHN and Provider Organisation). For this version, the user selects the Service Contact data to be targeted for the missing/invalid data report from a list of possible options.

Missing/invalid episode data elements that can be selected for the A5-2 report are:

- Service Contact Interpreter Used
- Service Contact Postcode
- Service Contact Participants
- Service Contact Venue

Note: For a user with the Reporting role at a single Provider Organisation, this report is redundant as it would only ever have a single row, which is already present in the output of the A5-1 report. Therefore this report is not made available to these users.

1.7.2.1.6. A6 - Data quality report - Missing and invalid practitioner data

The A6 reports are designed to identify Practitioner data elements with significant amounts of missing data.

Two formats of this report are offered to users:

- [A6-1 - Data quality report - Missing and invalid practitioner data - Summary](#)
- [A6-2 - Data quality report - Missing and invalid practitioner data - Detail](#)

Key specifications:

- Report is confined only to 'active practitioners'. A Practitioner is defined as 'active' if it they have recorded one or more Service Contacts in the period.

1.7.2.1.6.1. A6-1 - Data quality report - Missing and invalid practitioner data - Summary

Summary format provides a simple listing of missing/invalid data rates for relevant data elements, aggregated across the organisation, region or nationally.

1.7.2.1.6.2. A6-2 - Data quality report - Missing and invalid practitioner data - Detail

Detailed format presents missing/invalid data rates at the entity level (PHN and Provider Organisation). For this version, the user selects the Practitioner data to be targeted for the missing/invalid data report from a list of options.

Missing/invalid episode data elements that can be selected for the A6-2 report are:

- Practitioner Category
- ATSI Cultural Training Flag
- Practitioner Year of Birth
- Gender
- Aboriginal and Torres Strait Islander Status

Note: For a user with the Reporting role at a single Provider Organisation, this report is redundant as it would only ever have a single row, which is already present in the output of the A6-1 report. Therefore this report is not made available to these users.

1.7.2.1.7. A7 - Open episodes with no service contact activity for 90+ days

The A7 report is designed to allow monitoring of adherence to the requirement to close episodes where there are no further services scheduled for the client.

Setting of the 90 day threshold does not imply a strict business rule to close episodes where no contact has occurred for this period, but rather to identify episodes that may warrant review.

Key specifications:

- Open Episodes defined as those without an End Date

1.7.2.1.8. A8 - Data quality report - Recording of outcome measures for open episodes

The A8 report is designed to show the percentage of open (not yet completed) episodes that have an outcome measure recorded at the Episode Start collection occasion. Its purpose is to allow monitoring of adherence to the minimum requirements for outcome recording - i.e. measures to be recorded at Episode Start and Episode End.

Report A9 examines a related aspect - the extent to which Completed Episodes have both Episode Start and Episode End measures.

Key specifications:

- Completed Episodes are defined as those Episodes with an Episode End Date less than or equal to the report end date.
- Only Episodes with one or more Service Contacts in the reporting period are included in the analysis (referred to as 'active episodes').

1.7.2.1.9. A9 - Data quality report - Recording of outcome measures for completed episodes

The A9 report is designed to show the percentage of completed episodes that have outcome measures recorded. Its purpose is to allow monitoring of adherence to the minimum requirements for outcome recording - i.e. measures to be recorded at Episode Start and Episode End.

Key specifications:

- Completed Episodes are defined as those Episodes with an Episode End Date less than or equal to the report end date.
- Only Episodes with one or more Service Contacts in the reporting period are included in the analysis (referred to as 'active episodes').

1.7.2.2. Category B: Monitoring overall service delivery

These reports are designed to present a range of data in the form of summary tables. Their purpose is to allow the user to monitor overall service delivery based on counts of clients, episodes, and service contacts, stratified in various ways that depend on the data being sourced.

There are five reports in this series, each covering a specific data category (Clients, Episode, Service Contacts, Provider Organisations, and Practitioners).

Available B category reports are:

- [B1 - Activity report - Client characteristics](#)
- [B2 - Activity report - Episode characteristics](#)
- [B3 - Activity report - Service Contact characteristics](#)

- [B4 - Activity report - Provider Organisation characteristics](#)
- [B5 - Activity report - Practitioner characteristics](#)

1.7.2.2.1. B1 - Activity report - Client characteristics

The B1 report is designed to allow selection of a Client stratification variable of interest, with a menu of options covering all core Client data fields.

Key specifications:

- Client to be counted uniquely regardless of number of episodes. To be counted, a client must have had one or more Service Contacts in the reporting period.
- Counts of Episodes to be based only on 'active' Episodes, defined as those that had one or more Service Contacts recorded in the period.

1.7.2.2.2. B2 - Activity report - Episode characteristics

The B2 report is designed to allow selection of an Episode stratification variable of interest, with a menu of options covering all core Episode data fields.

Key specifications:

- An Episode is defined as 'active' and in-scope for inclusion in this report if it had one or more Service Contacts recorded in the period. No distinction is made between Open and Completed Episodes.

1.7.2.2.3. B3 - Activity report - Service Contact characteristics

The B3 report is designed to allow selection of a Service Contact stratification variable of interest, with a menu of options covering all core Service Contact fields.

Key specifications:

- 'No show' contacts should be excluded from all counts except where that data element is specifically selected by the user.

1.7.2.2.4. B4 - Activity report - Provider Organisation characteristics

The B4 report is designed to allow selection of a Provider Organisation stratification variable of interest, with a menu of options covering all core Provider Organisation data fields.

Key specifications:

- A Provider Organisation is defined as 'active' if it has recorded and in-scope for this report if there is one or more Service Contacts recorded for the Provider Organisation in the period.

1.7.2.2.5. B5 - Activity report - Practitioner characteristics

The B5 report is designed to allow selection of a Practitioner stratification variable of interest, with a menu of options covering all core Practitioner data fields.

Key specifications:

- A Practitioner is defined as 'active' and in-scope for this report if they have recorded one or more Service Contacts in the period.

1.7.2.3. Category E: Reports for data managers to monitor data supply

These reports are designed to assist in monitoring the amount and type of data that has been input into the MDS.

They are based on a subset of Category A reports but differ in two important ways:

- The reports are based on 'raw data', not filtered or trimmed by any data quality censoring. Comparable Category A reports restrict the reported data by specific edit criteria (e.g., Category A reports are only based on 'active clients', 'active episodes' and 'active providers').
- All dates refer to date of upload. Comparable Category A reports are based on date of service.

Category E reports are specifically designed to enable PHN and Provider Organisation data managers to monitor upload and data supply to the MDS.

The reports provide summary data on:

- Raw volumes (clients/episodes/service contacts/collection occasions/practitioners) over time periods
- Raw volumes per day (clients/episodes/service contacts/collection occasions/practitioners)

1.7.2.3.1. E1 - High level summary of overall volumes by entity

This report is designed to provide a 'one page' view, with data aggregated for the specified reporting period, covering counts of clients, episodes, service contacts, collection occasions and practitioners, without any filtering for business rules.

Key specifications:

- All records to be counted with no filtering.
- All dates refer to date of modification, not date of service.

1.7.2.3.2. E2 - Volume trends

This report is designed to show volume trends in clients, episodes, service contacts, collection occasions and practitioners.

Key specifications:

- All records to be counted with no filtering.
- All dates refer to date of insertion, not date of service.
- Results are cumulative.

1.7.2.3.3. E3 - Activity per day

This report will show a summary of the number of clients, episodes, service contacts, collections occasions and practitioners added or modified each day. Its purpose is to give entities information about when and how much data was added or modified.

Key specifications:

- All records to be counted with no filtering.
- All dates refer to date of modification, not date of service.

1.8. Data Extract

You will only be able to see the Data Extract tab if you have been assigned the 'Reporting' [Users Roles](#), when logged into the PMHC MDS on <https://pmhc-mds.net>.

If you don't have access to the Data Extract tab and you believe you should, please contact someone in your provider organisation or provider organisation's PHN who has the 'User Management' role. If you are unsure who has the 'User Management' role please email the PMHC Helpdesk at support@pmhc-mds.com

After navigating to the Data Extraction tab, you will be presented with a form to request and download a data extract.

Data Extract

Users with the Reporting role can use this tab to request reporting data

[Associated Date Rules Explained](#)

PMHC-MDS managed by Strategic Data Pty Ltd | [Contact Support](#) | [User Documentation](#)

1.8.1. How to download an organisation's data

You can extract a PHN's or provider organisation's PMHC MDS data by completing the Download Data fields in the Data Extraction tab, by following these steps:

1. Navigate to the 'Data Extract' tab.
2. If you are allowed to download data from more than one organisation you will be asked to select an organisation name.
3. Select the name of the organisation from the drop down list.
4. Click the first calendar icon to select the start date and then the second calendar icon to select the end date.
5. Click the 'Include data without associated dates' checkbox, if required.

Please note: As the query is date based the following data will not by default be included in the extract:

- The start date of an episode is derived from the date of the first service contact. Therefore, if an episode doesn't have any associated service contacts, there will be no start date for the episode and they will not by default be included in the data extract.
- Clients that don't have any associated episodes, or who are associated with an episode with no service contacts also will not by default be included in the data extract.
- Practitioners who are not associated with a service contact will not by default be included in the data extract.

If you would like to include these episodes, clients and practitioners check the the 'Include data without associated dates' checkbox.

6. Select the File Type you'd like this data downloaded in.

Data Extract

Users with the Reporting role can use this tab to request reporting data

Support: For more information and assistance visit [PMHC MDS Documentation](#). (link opens in a new window)

Select Organisation*
Test PHN (PHN999)

Start Date*
08/01/2018

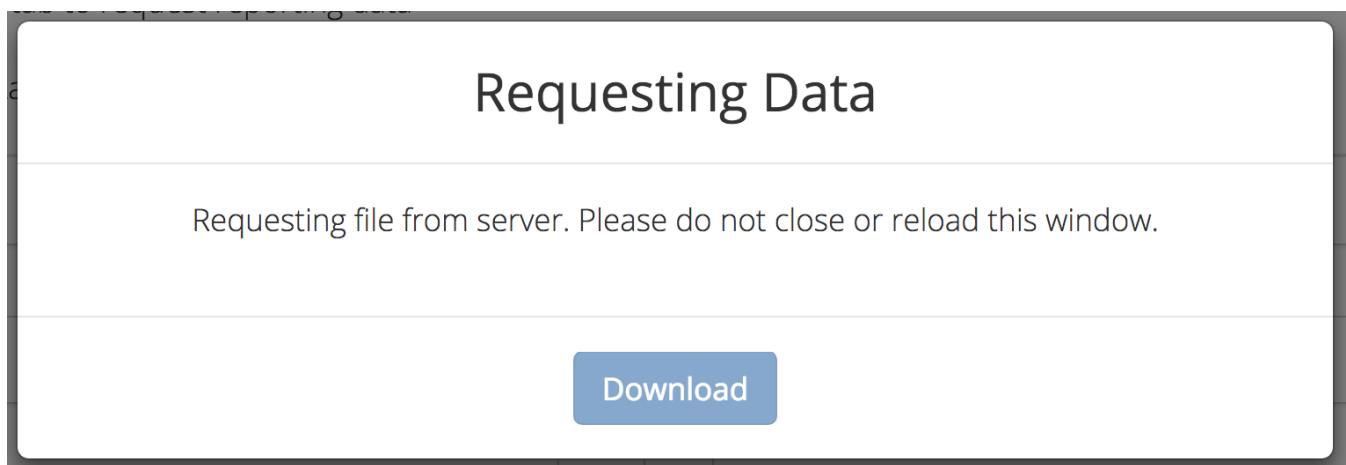

Include data without associated dates.

End Date*
08/01/2018

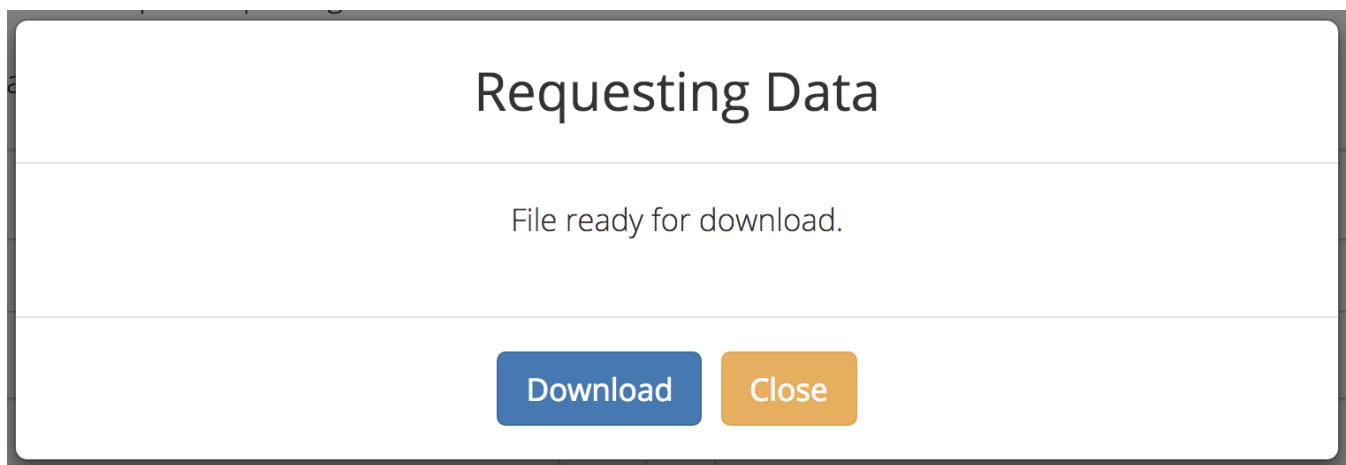

Select File Type*
.xlsx

[Associated Date Rules Explained](#)

7. Click the blue 'Request' button.
8. A dialogue box will be displayed, showing that the file is being requested from the server.

9. When the file is ready, a 'File ready for download' message will be displayed.

10. Click the blue 'Download' button.
11. Your data extract will be downloaded to your computer.

1.8.2. Dates explained for Data Extract

The Data Extract dates are based on the Client's Service Contact dates.

Please note: As the query is date based the following data will not by default be included in the extract:

- The start date of an episode is derived from the date of the first service contact. Therefore, if an episode doesn't have any associated service contacts, there will be no start date for the episode and they will not by default be included in the data extract.
- Clients that don't have any associated episodes, or who are associated with an episode with no service contacts also will not by default be included in the data extract.
- Practitioners who are not associated with a service contact will not by default be included in the data extract.

If you would like to include these episodes, clients and practitioners check the the 'Include data without associated dates' checkbox.

See [How to download an organisation's data](#).

1.9. SLK

We have provided a stand-alone generator that can be used without logging into the PMHC MDS on <https://pmhc-mds.net>. This allows users to generate a client's Statistical Linkage Key (SLK) to enter into upload files.

Primary Mental Health Care Minimum Data Set

[Home](#)[SLK](#)[Sign in](#)[Home](#) / [SLK](#)

Statistical Linkage Key Generator

[SLK](#)[Generate SLK](#)**Given Name****Family Name****Date of Birth *****Gender**[Generate Key](#)

Department of Health

PMHC-MDS managed by Strategic Data Pty Ltd | Contact Support | User Documentation

In order to generate an SLK:

1. Navigate to the 'SLK' tab. This will open up the SLK generator.
2. Enter the following client details: Given Name, Surname, Date of Birth and Gender.
3. Click on the blue 'Generate Key' button.

[Home](#) / [SLK](#)

Statistical Linkage Key Generator

[SLK](#)[Generate SLK](#)**Given Name****Family Name****Date of Birth *****Gender**[Generate Key](#)

Your statistical linkage key

SLK

URAIR010119013

[Copy to clipboard](#)**Generated Hash**

7AZFQB02PQAZGXJ1Z89SNZ6306WDF0XC

[Copy to clipboard](#)

The client's 'SLK Key' and 'Generated Hash' key will now be displayed.

4. Click 'Copy to clipboard' next to either of these items.
5. Paste this information into your data file.

Please note: you can only copy one SLK at a time to the clipboard.

1.10. User Guide Change log

1.10.1. 23/7/2018

- Added reports A7-A9 to [Category A: Monitoring progress of MDS implementation](#)
- Added reports B1-B5 to [Category B: Monitoring overall service delivery](#)

1.10.2. 13/3/2018

- Added reports A3-A6 to [Category A: Monitoring progress of MDS implementation](#)
- Added [Closing a Client's Episode](#)

1.10.3. 19/1/2018

- Updated screenshots for [Home](#)
- Updated screenshots for [Data Entry](#)
- Updated screenshots for [Data Extract](#)
- Updated screenshots for [Organisations](#)
- Updated screenshots for [Reports](#)
- Updated screenshots for [Upload](#)
- Updated screenshots for [Users](#)
- Updated the question to [Reporting](#)
- Edited the Reporting [Users Roles](#)
- Edited [Passwords](#) to state the password email will be received from noreply@strategicdata.com.au

1.10.4. 22/12/2017

- Edited [Reports](#) documentation
- Edited [Data Extract](#)
- Moved [Data Extract](#) out from under [Reports](#)
- Edited the Reporting [Users Roles](#)

1.10.5. 08/12/2017

- Added [Dates explained for Data Extract](#)

1.10.6. 20/11/2017

- Edited [Editing a Practitioner](#)
- Added [Editing a Practitioner Key](#)
- Edited [Editing a Client](#)
- Added [Editing a Client Key](#)
- Edited [Editing a Client's Episode data](#)
- Added [Editing a Episode Key](#)
- Edited [Editing a Client's Service Contacts for an Episode](#)
- Added [Editing a Service Contact Key](#)
- Edited [Editing a Client's Outcome Collection Occasions for an Episode](#)
- Added [Editing a Collection Occasion Key](#)
- Edited [Adding a Client's Outcome Collection Occasions data](#)

1.10.7. 25/10/2017

- Edited [Deleting a Practitioner](#)
- Edited [Deleting a Client](#)
- Edited [Deleting an Episode](#)
- Edited [Deleting an Service Contact](#)
- Edited [Deleting an Outcome Collection Occasion](#)
- Added [Inactive Practitioners](#)

1.10.8. 23/10/2017

- Edited [Editing a Client](#)

1.10.9. 03/10/2017

- Edited [Finding a user](#)

- Updated screenshots for [Data Entry](#)

1.10.12. 28/7/2017

- Removed *Reporting* documentation
- Added [Reports](#) documentation
- Moved [Data Extract](#) under [Reports](#)

1.10.13. 20/7/2017

- Added [Adding a Client's Outcome Collection Occasions](#) data
- Added [Editing a Client's Outcome Collection Occasions for an Episode](#)
- Added [Deleting an Outcome Collection Occasion](#)

1.10.14. 11/7/2017

- Edited [Finding a Practitioner](#)
- Edited [Viewing a Practitioner](#)
- Edited [Adding a Practitioner](#)
- Edited [Editing a Practitioner](#)
- Edited [Deleting a Practitioner](#)
- Updated screenshots for [Data Entry](#)

1.10.15. 30/6/2017

- Added [Adding a New Client](#)
- Added [Editing a Client](#)
- Added [Deleting a Client](#)
- Added [Adding a Client's Episode](#) data
- Added [Editing a Client's Episode](#) data
- Added [Deleting an Episode](#)
- Added [Adding a Client's Service Contact](#) data
- Added [Editing a Client's Service Contacts for an Episode](#)
- Added [Deleting an Service Contact](#)
- Updated screenshots for [Data Entry](#)

1.10.16. 14/6/2017

- Added [Adding a Practitioner](#)
- Added [Editing a Practitioner](#)
- Added [Deleting a Practitioner](#)
- Moved [Finding a Practitioner](#) under Data Entry tab
- Moved [Viewing a Practitioner](#) under Data Entry tab
- Moved [Viewing all Organisational Users](#) under Users tab
- Moved [Assigning Extra Roles to an Organisational User](#) under Users tab

1.10.17. 26/5/2017

- Updated screenshots for [Data Entry](#) documentation
- Updated screenshots for [Adding a new user](#)
- Updated screenshots for [Editing a user's roles](#)
- Updated screenshots for [Viewing Upload Details](#)
- Updated screenshots for [Error messages](#)
- Added [Complete uploads](#)

1.10.18. 18/5/2017

- Added [Data Entry](#) documentation
- Added [Viewing a Practitioner](#)
- Added to the [Users Roles](#) section
- Moved [Accepting an invitation to become a PMHC MDS User](#) under Home tab
- Updated screenshots for [Adding a new user](#)
- Updated screenshots for [Editing a user's roles](#)

1.10.19. 15/3/2017

- Updated the references of suborganisations to provider organisation

1.10.20. 10/3/2017

- Added [Adding an existing user](#) documentation
- Updated screenshots for [Accepting an invitation to become a PMHC MDS User](#) to include the Reporting role
- Updated screenshots for [Viewing a user's roles](#) to show roles at an organisation
- Added screenshots for [Logging In](#) to show the pop up count down feature
- Added screenshots for [Uploading a file](#) to include the organisation drop down

1.10.21. 24/2/2017

- Added [Data Extract](#) documentation
- Added [Reporting](#) documentation
- Added Reporting role information to the [Users Roles](#) section
- Updated screenshots for [Adding a new user](#) to include the Reporting role
- Updated screenshots for [Editing a user's roles](#) to include the Reporting role

1.10.22. 8/2/2017

- Reorganised the documentation to separate User Guide and Frequently Asked Questions
- Updated user guide for user interface changes that created sub tabs

2. Data Specification

2.1. Reporting arrangements

2.1.1. Uploading data

During the initial stage of implementing the PMHC MDS, PHNs and their service providers will be able to either export data from their client systems and upload to the PMHC MDS or manually create spreadsheets that can then be uploaded.

The system is able to accept data for any period, either in its entirety or partially. Please note the section below regarding timeliness.

Accepting data for any period allows organisations to upload corrections when erroneous data has been identified. Allowing partial uploads allows for submission of data by separate providers without the need for the PHN to aggregate all data prior to upload.

Where associated unique keys match (e.g. Patient Key or Episode Key) these records will be replaced, if the key is new, a new record will be created.

Data may be uploaded in either Excel or CSV format.

2.1.2. Reporting timeliness

Records must be reported to the MDS within 31 days of the activity which generated them. For example if a client was added to the system on the 12th of November 2016 their client record must be added to the MDS on or before the 13th of December 2016. Similarly, if a service contact occurred on that date, the data associated with that contact must be submitted to the MDS by 13th of December 2016 also.

The Department accesses information within the MDS for internal planning and governance purposes therefore data in the MDS needs to be current to ensure the accuracy of the data produced for the Department.

2.1.3. Transition arrangements

PMHC MDS upload functionality will be separate from the existing ATAPS/MHSRRA MDS. During this initial stage the existing ATAPS/MHSRRA MDS will be kept operational so that ATAPS/MHSRRA organisations can continue to provide data through that system until they are either ready to export data to the new upload interface or until the new data entry interface is available after a later stage of development. Once all ATAPS/MHSRRA organisations are submitting data to the PMHC MDS the ATAPS/MHSRRA MDS will be shut down.

Data for programmes other than ATAPS/MHSRRA will have to be submitted via the PMHC MDS interface.

Organisations should only submit data via one interface, not both.

Data submitted via the existing ATAPS/MHSRRA MDS will be converted and merged with data submitted via the PMHC MDS in order to produce departmental reports.

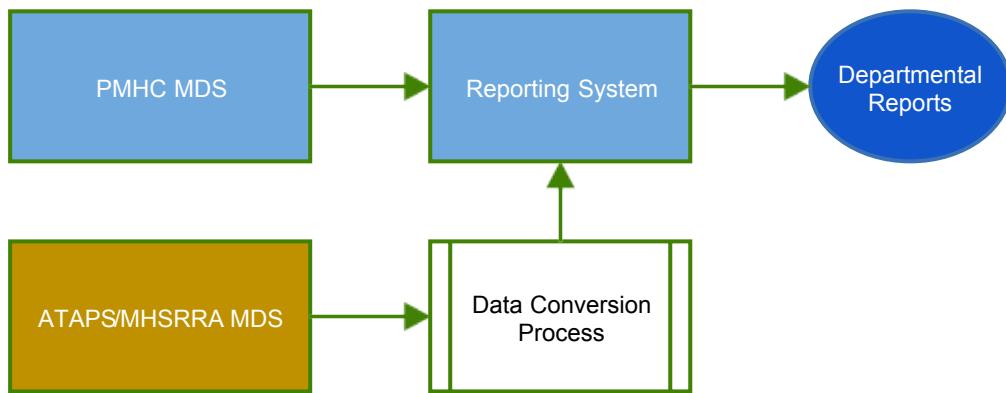

Fig. 2.1 Transitional Reporting Process

2.1.3.1. Transition to Full Compliance

Refer to the recent Department announcement on the [INFORMATION and ACTION: PHN CEO - Primary Mental Health Care Minimum Data Set Update | June 21, 2017](#).

2.1.4. Support arrangements

Once the upload specification has been released, support will be available to PHNs and their third party developers to assist with implementing upload facilities in existing client management systems. For those PHNs who do not upload via a client management system, documentation and support will be available to manually create spreadsheets. Once the upload system goes live in October support will be available to assist with uploading data.

2.2. Identifier management

2.2.1. Managing Provider Organisation Keys

Provider Organisations will be created and managed by Primary Health Networks (PHNs) through a user interface. Each PHN must create their own Provider Organisations before any data can be uploaded. Each Provider Organisation will need to be assigned a unique key. It is the responsibility of the PHN to assign and manage these keys.

2.2.2. Managing Client Keys

Client records will be created and managed by Provider Organisations via the upload and data entry interface. Each Client record needs to be assigned a unique key in order to facilitate adding/updating/deleting each item when uploading data. Once assigned, this key cannot change.

The [Client Key](#) will be managed by the Provider Organisation, however, the PHN may decide to play a role in coordinating assignment and management of these client keys.

Initially the Department wanted these keys to be unique across the PHN in order to ensure that there is a single key for a client within the PHN, and will continue to be investigate options for the PMHC MDS implementation of a Master Client Index during [Stage Two](#) of development.

2.2.3. Managing Practitioner, Episode, Service Contact and Outcome Collection Occasion Keys

The [Practitioner Key](#), [Episode Key](#), [Service Contact Key](#) and [Outcome Collection Occasion Key](#) will be created and managed by Provider Organisations.

The PMHC MDS specification requires each of these keys to be unique and stable at the Provider Organisation level.

Each record needs to be assigned a unique key in order to facilitate adding/updating/deleting each item when uploading/entering data. These keys will be created and managed by the Provider Organisation.

Where data is being exported from client systems, these keys can be auto generated, providing that a key does not change once it is assigned.

If you still have questions after reading this information, please visit the Department's responses to [Questions about Unique Identifiers and 'Keys'](#)

2.3. Data model and specifications

2.3.1. Data model

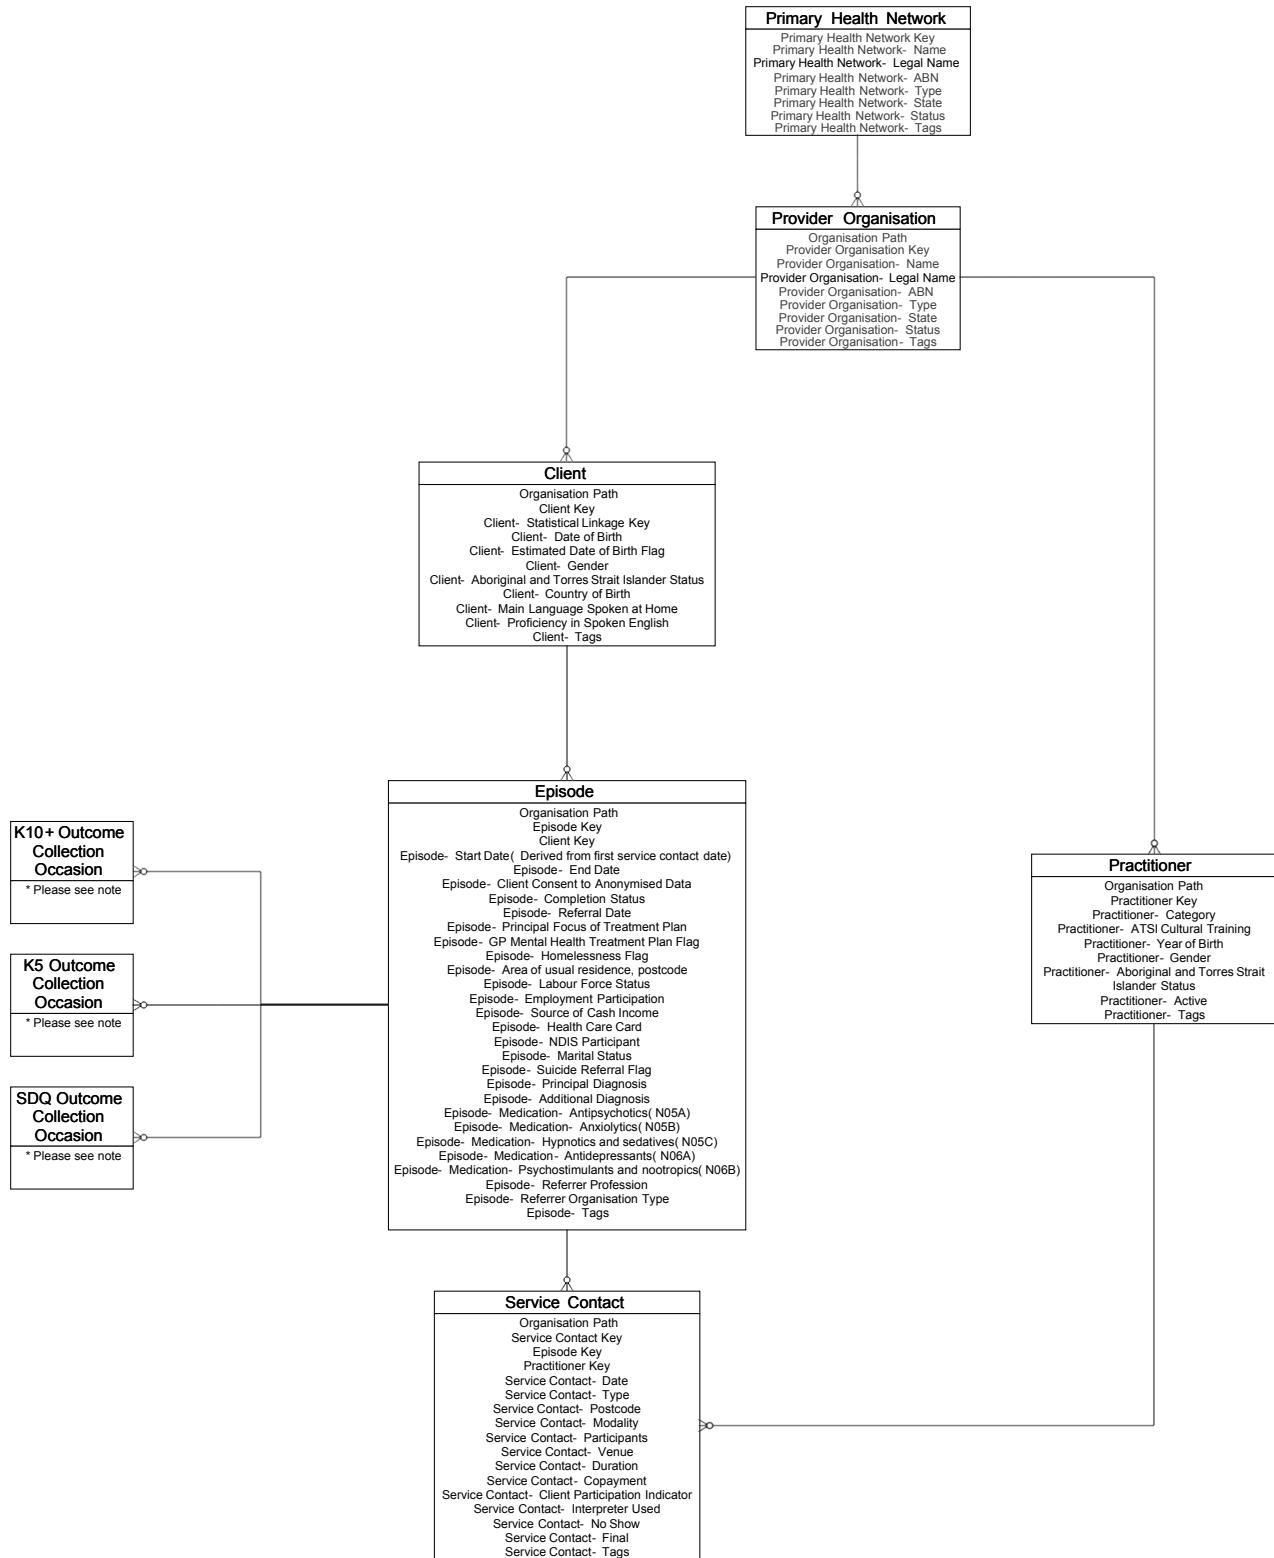

Fig. 2.2 PMHC data model

Note: [PMHC Collection Occasion data model](#) for more details about Collection Occasion records.

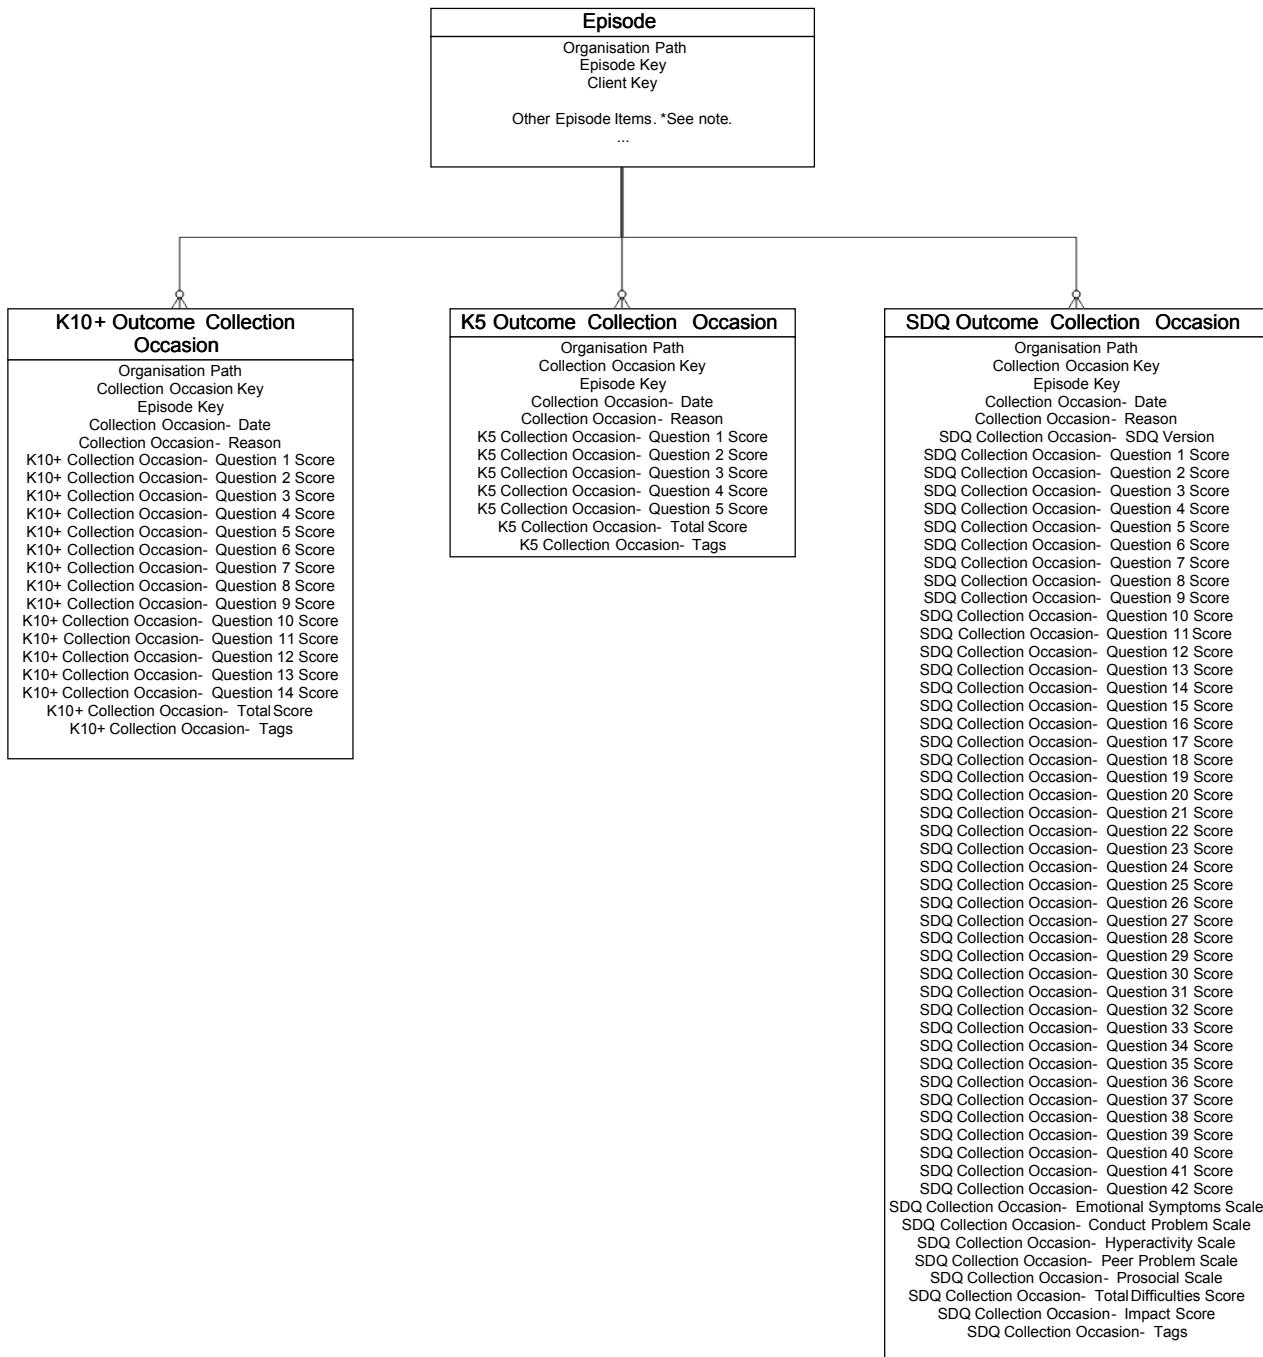

Fig. 2.3 PMHC Collection Occasion data model

Note: See [PMHC data model](#) for more details about how Collection Occasion records fit into the overall structure.

2.3.2. Key concepts

2.3.2.1. Primary Health Network

Primary Health Networks (PHNs) have been established by the Australian Government with the key objectives of increasing the efficiency and effectiveness of medical services for patients, particularly those at risk of poor health outcomes, and improving coordination of care to ensure patients receive the right care in the right place at the right time.

2.3.2.2. Provider Organisation

The Provider Organisation is the business entity that the PHN has commissioned to provide the service.

See [Provider Organisation](#) for the data elements for a provider organisation.

2.3.2.3. Practitioner

The Practitioner is the person who is delivering the service.

See [Practitioner](#) for the data elements for a practitioner.

2.3.2.4. Client

The Client is the person who is receiving the service.

See [Client](#) for the data elements for a client.

2.3.2.5. Episode

For the purposes of the PMHC MDS, an *Episode of Care* is defined as a more or less continuous period of contact between a client and a PHN-commissioned provider organisation/clinician that starts at the point of first contact, and concludes at discharge. Episodes comprise a series of one or more Service Contacts. This structure allows for a logical data collection protocol that specifies what data are collected when, and by whom. Different sets of PMHC MDS items are collected at various points in the client's engagement with the provider organisation. Some items are only collected once at the episode level, while others are collected at each *Service Contact*.

Three business rules apply to how the *Episode of Care* concept is implemented across PHN-commissioned services:

- **One episode at a time for each client, defined at the level of the provider organisation**

While an individual may have multiple *Episodes of Care* over the course of their illness, they may be considered as being in only one episode at any given point of time for **any particular PHN-commissioned provider organisation**. The implication is that the care provided by the organisation to an individual client at any point in time is subject to only one set of reporting requirements.

- **Episodes commence at the point of first contact.** The episode start date will be derived from the first service contact date. Therefore, if there is no attended service contact the episode is uncommenced.
- **Discharge from care concludes the episode**

Discharge may occur clinically or administratively in instances where contact has been lost with the client. A new episode is deemed to commence if the person re-presents to the organisation.

See [Episode](#) for the data elements for a episode.

2.3.2.6. Service Contact

- Service contacts are defined as the provision of a service by a PHN commissioned mental health service provider for a client where the nature of the service would normally warrant a dated entry in the clinical record of the client.
- A service contact must involve at least two persons, one of whom must be a mental health service provider.
- Service contacts can be either with the client or with a third party, such as a carer or family member, and/or other professional or mental health worker, or other service provider.
- Service contacts are not restricted to face-to-face communication but can include telephone, internet, video link or other forms of direct communication.
- Service provision is only regarded as a service contact if it is relevant to the clinical condition of the client. This means that it does not include services of an administrative nature (e.g. telephone contact to schedule an appointment).

Definition based on METeOR: [493304](#) with modification.

See [Service Contact](#) for the data elements for a service contact.

2.3.2.7. Outcome Collection Occasion

A Collection Occasion is defined as an occasion during an Episode of Care when the required outcome measure is to be collected. At a minimum, collection of outcome data is required at both Episode Start and Episode End, but may be more frequent if clinically indicated and agreed by the client.

Measures will be the Kessler Psychological Distress Scale K10+ (in the case of Aboriginal and Torres Strait Islander clients, the K5) as well as the Strengths & Difficulties Questionnaires.

See [Outcome Collection Occasion](#) for the data elements for an outcome collection occasion.

2.3.3. Record formats

2.3.3.1. Provider Organisation

See [Provider Organisation](#) for the definition of a provider organisation.

Provider Organisation data is for administrative use within the PMHC MDS system. It is managed by the PHN's via the PMHC MDS administrative interface, it cannot be uploaded.

Table 2.1 Provider Organisation record layout

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Organisation Path (organisation_path)	string	yes	A sequence of colon separated Organisation Keys that fully specifies the Provider Organisation providing a service to the client.
Organisation Key (organisation_key)	string (2,50)	yes	A sequence of characters which uniquely identifies the provider organisation to the Primary Health Network. Assigned by the Primary Health Network.
Provider Organisation - Name (organisation_name)	string (2,100)	yes	The name of the provider organisation.
Provider Organisation - Legal Name (organisation_legal_name)	string	—	The legal name of the provider organisation.
Provider Organisation - ABN (organisation_abn)	string (11)	yes	The Australian Business Number of the provider organisation.

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Provider Organisation - Type (organisation_type)	string	yes	<p>1: Private Allied Health Professional Practice</p> <p>2: Private Psychiatry Practice</p> <p>3: General Medical Practice</p> <p>4: Private Hospital</p> <p>5: Headspace Centre</p> <p>6: Early Youth Psychosis Centre</p> <p>7: Community-managed Community Support Organisation</p> <p>8: Aboriginal Health/Medical Service</p> <p>9: State/Territory Health Service Organisation</p> <p>10: Drug and/or Alcohol Service</p> <p>11: Primary Health Network</p> <p>12: Medicare Local</p> <p>13: Division of General Practice</p> <p>98: Other</p> <p>99: Missing</p>

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Provider Organisation - State (organisation_state)	string	yes	1: New South Wales 2: Victoria 3: Queensland 4: South Australia 5: Western Australia 6: Tasmania 7: Northern Territory 8: Australian Capital Territory 9: Other Territories
METeOR: 613718			
Provider Organisation - Status (organisation_status)	string	yes	0: Inactive 1: Active
Provider Organisation - Tags (organisation_tags)	string	—	List of tags for the provider organisation.

2.3.3.2. Practitioner

See [Practitioner](#) for the definition of a practitioner.

Practitioner data is intended to provide workforce planning data for use regionally by the PHN and nationally by the Department. It is managed by the provider organisations via either the PMHC MDS administrative interface or upload.

Table 2.2 Practitioner record layout

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Organisation Path (organisation_path)	string	yes	A sequence of colon separated Organisation Keys that fully specifies the Provider Organisation providing a service to the client.

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Practitioner Key (practitioner_key)	string (2,50)	yes	A unique identifier for a practitioner within the responsible provider organisation. Assigned by either the PHN or provider organisation depending on local procedures.
Practitioner - Category (practitioner_category)	string	yes	<p>1: Clinical Psychologist</p> <p>2: General Psychologist</p> <p>3: Social Worker</p> <p>4: Occupational Therapist</p> <p>5: Mental Health Nurse</p> <p>6: Aboriginal and Torres Strait Islander Health/Mental Health Worker</p> <p>7: Low Intensity Mental Health Worker</p> <p>8: General Practitioner</p> <p>9: Psychiatrist</p> <p>10: Other Medical</p> <p>11: Other</p> <p>99: Not stated</p>
Practitioner - ATSI Cultural Training (atsi_cultural_training)	string	yes	<p>1: Yes</p> <p>2: No</p> <p>3: Not required</p> <p>9: Missing / Not recorded</p>
Practitioner - Year of Birth (practitioner_year_of_birth)	gYear	yes	gYear

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Practitioner - Gender (practitioner_gender) ABS	string	yes	Not stated/ 0: Inadequately described 1: Male 2: Female 3: Other
Practitioner - Aboriginal and Torres Strait Islander Status (practitioner_atsi_status) METeOR: 291036	string	yes	Aboriginal but not Torres Strait Islander origin 1: Torres Strait Islander but not Aboriginal origin 2: Both Aboriginal and Torres Strait Islander origin 3: Neither Aboriginal or Torres Strait Islander origin 4: Not stated/ 9: inadequately described
Practitioner - Active (practitioner_active)	string	yes	0: Inactive 1: Active
Practitioner - Tags (practitioner_tags)	string	—	List of tags for the practitioner.

2.3.3.3. Client

See [Client](#) for definition of a client.

Clients are managed by the provider organisations via upload.

Table 2.3 Client record layout

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Organisation Path (organisation_path)	string	yes	A sequence of colon separated Organisation Keys that fully specifies the Provider Organisation providing a service to the client.
Client Key (client_key)	string (2,50)	yes	This is a number or code assigned to each individual referred to the commissioned organisation. The client identifier is unique and stable for each individual within the PHN.
Client - Statistical Linkage Key (slk) METeOR: 349510	string (14,40)	yes	A key that enables two or more records belonging to the same individual to be brought together.
Client - Date of Birth (date_of_birth) METeOR: 287007	date	yes	The date on which an individual was born.
Client - Estimated Date of Birth Flag (est_date_of_birth)	string	yes	<p>1: Date of birth is accurate</p> <p>2: Date of birth is an estimate</p> <p>8: Date of birth is a 'dummy' date (ie, 09099999)</p> <p>9: Accuracy of stated date of birth is not known</p>
Client - Gender (client_gender) ABS	string	yes	<p>0: Not stated/ Inadequately described</p> <p>1: Male</p> <p>2: Female</p> <p>3: Other</p>

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Client - Aboriginal and Torres Strait Islander Status (client_atsi_status)	string	yes	<p>Aboriginal but not Torres Strait Islander origin 1: Torres Strait Islander origin</p> <p>Torres Strait Islander but not Aboriginal origin 2: Torres Strait Islander origin</p> <p>Both Aboriginal and Torres Strait Islander origin 3: Torres Strait Islander origin</p> <p>Neither Aboriginal or Torres Strait Islander origin 4: Torres Strait Islander origin</p> <p>Not stated/ 9: inadequately described</p>

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Client - Country of Birth (country_of_birth) METeOR: 459973 ABS	string (4)	yes	<p>1101: Australia</p> <p>1102: Norfolk Island</p> <p>Australian 1199: External Territories, nec</p> <p>1201: New Zealand</p> <p>1301: New Caledonia</p> <p>1302: Papua New Guinea</p> <p>1303: Solomon Islands</p> <p>1304: Vanuatu</p> <p>1401: Guam</p> <p>1402: Kiribati</p> <p>1403: Marshall Islands</p> <p>Micronesia, 1404: Federated States of</p> <p>1405: Nauru</p> <p>Northern Mariana 1406: Islands</p> <p>1407: Palau</p> <p>1501: Cook Islands</p> <p>1502: Fiji</p> <p>1503: French Polynesia</p> <p>1504: Niue</p> <p>1505: Samoa</p> <p>1506: Samoa, American</p> <p>1507: Tokelau</p> <p>1508: Tonga</p> <p>1511: Tuvalu</p> <p>1512: Wallis and Futuna</p> <p>1513: Pitcairn Islands</p> <p>Polynesia 1599: (excludes Hawaii), nec</p> <p>1601: Adelie Land (France)</p>

Client - Tags (client_tags)	string	—	List of tags for the client.

2.3.3.4. Episode

See [Episode](#) for definition of an episode.

Episodes are managed by the provider organisations via upload.

Table 2.4 Episode record layout

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Organisation Path (organisation_path)	string	yes	A sequence of colon separated Organisation Keys that fully specifies the Provider Organisation providing a service to the client.
Episode Key (episode_key)	string (2,50)	yes	This is a number or code assigned to each episode. The Episode Key is unique and stable for each episode at the level of the organisation.
Client Key (client_key)	string (2,50)	yes	This is a number or code assigned to each individual referred to the commissioned organisation. The client identifier is unique and stable for each individual at the level of the PMHC top level organisation.
Episode - End Date (episode_end_date) METeOR: 614094	date	—	The date on which an <i>Episode of Care</i> is formally or administratively ended
Episode - Client Consent to Anonymised Data (client_consent)	string	yes	1: Yes 2: No

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Episode - Completion Status (episode_completion_status)	string	—	<p>0: Episode open</p> <p>1: Episode closed - treatment concluded</p> <p>2: Episode closed administratively - client could not be contacted</p> <p>3: Episode closed administratively - client declined further contact</p> <p>4: Episode closed administratively - client moved out of area</p> <p>5: Episode closed administratively - client referred elsewhere</p> <p>6: Episode closed administratively - other reason</p>
Episode - Referral Date (referral_date)	date	—	The date the referrer made the referral.
Episode - Principal Focus of Treatment Plan (principal_focus)	string	yes	<p>1: Psychological therapy</p> <p>2: Low intensity psychological intervention</p> <p>3: Clinical care coordination</p> <p>4: Complex care package</p> <p>5: Child and youth-specific mental health services</p> <p>6: Indigenous-specific mental health services</p> <p>7: Other</p>

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Episode - GP Mental Health Treatment Plan Flag (mental_health_treatment_plan)	string	yes	<p>1: Yes</p> <p>2: No</p> <p>3: Unknown</p> <p>Not stated/ 9: inadequately described</p>
Episode - Homelessness Flag (homelessness)	string	yes	<p>1: Sleeping rough or in non-conventional accommodation</p> <p>2: Short-term or emergency accommodation</p> <p>3: Not homeless</p> <p>9: Not stated / Missing</p>
Episode - Area of usual residence, postcode (client_postcode)	string	yes	The Australian postcode of the client.
METeOR: 429894			
Episode - Labour Force Status (labour_force_status)	string	yes	<p>1: Employed</p> <p>2: Unemployed</p> <p>3: Not in the Labour Force</p> <p>Not stated/ 9: inadequately described</p>
METeOR: 621450			
Episode - Employment Participation (employment_participation)	string	yes	<p>1: Full-time</p> <p>2: Part-time</p> <p>Not applicable - 3: not in the labour force</p> <p>Not stated/ 9: inadequately described</p>
METeOR: 269950			

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Episode - Source of Cash Income (income_source) METeOR: 386449	string	yes	N/A - Client aged less than 16 years 0: Disability Support Pension 1: Other pension or benefit (not superannuation) 2: Paid employment 3: Compensation payments 4: Other (e.g. superannuation, investments etc.) 5: Nil income 6: Not known 7: Not stated/ 9: inadequately described
Episode - Health Care Card (health_care_card) METeOR: 605149	string	yes	1: Yes 2: No 3: Not Known 9: Not stated
Episode - NDIS Participant (ndis_participant)	string	yes	1: Yes 2: No 9: Not stated/ inadequately described
Episode - Marital Status (marital_status) METeOR: 291045	string	yes	1: Never married 2: Widowed 3: Divorced 4: Separated 5: Married (registered and de facto) 6: Not stated/ inadequately described

Data Element (Field Name)	Type (min,max)	Required	Format / Values

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Service Contact - Duration (service_contact_duration)	string	yes	0: No contact took place 1: 1-15 mins 2: 16-30 mins 3: 31-45 mins 4: 46-60 mins 5: 61-75 mins 6: 76-90 mins 7: 91-105 mins 8: 106-120 mins 9: over 120 mins
Service Contact - Copayment (service_contact_copayment)	number	yes	0 - 999999.99
Service Contact - Client Participation Indicator (service_contact_participation_indicator)	string	yes	1: Yes 2: No
METeOR: 494341			
Service Contact - Interpreter Used (service_contact_interpreter)	string	yes	1: Yes 2: No 9: Not stated
Service Contact - No Show (service_contact_no_show)	string	yes	1: Yes 2: No

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Service Contact - Final (service_contact_final)	string	yes	<p>1: No further services are planned for the client in the current episode</p> <p>2: Further services are planned for the client in the current episode</p> <p>3: Not known at this stage</p>
Service Contact - Tags (service_contact_tags)	string	—	List of tags for the service contact.

2.3.3.6. Outcome Collection Occasion

See [Outcome Collection Occasion](#) for definition of an outcome collection occasion.

Individual item scores will eventually be required, however, it is noted that in the short term there are issues with collecting individual item scores. Therefore, as a transitional phase, reporting overall scores/subscales will be allowed.

Outcome collection occasions are managed by the provider organisations via upload.

PMHC MDS requires the use of one of the following three required outcome collection occasions measures, as follows:

- **For adults (18+ years)** - Kessler Psychological Distress Scale [K10+](#) is the prescribed measure, with the option to use the [K5](#) for Aboriginal and Torres Strait Islander people if that is considered more appropriate.
- **For children and young people (up to and including 17 years)** - the Strengths & Difficulties Questionnaires ([SDQ](#)) is the prescribed tool. The specified versions include the parent-report for 4-10 years and 11-17 years; and the self-report for 11-17 years.

Please note: For adolescents, clinician-discretion is allowed, and that the K10+ or K5 may be used, even though the person is under 18 years

2.3.3.6.1. K10+

As noted above, reporting individual item scores will eventually be required. In the short term, respondents can either report all 14 item scores or report the K10 total score as well as item scores for the 4 extra items in the K10+.

Table 2.6 K10+ record layout

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Organisation Path (organisation_path)	string	yes	A sequence of colon separated Organisation Keys that fully specifies the Provider Organisation providing a service to the client.
Collection Occasion Key (collection_occasion_key)	string (2,50)	yes	This is a number or code assigned to each collection occasion of outcome measures. The Collection Occasion Key is unique and stable for each collection occasion at the level of the organisation.
Episode Key (episode_key)		yes	
Collection Occasion - Measure Date (measure_date)	date	yes	The date the measure was given.

Data Element (Field Name)	Type (min,max)	Required	Format / Values
K10+ - Question 8 (k10p_item8)	string	yes	<p>1: None of the time</p> <p>2: A little of the time</p> <p>3: Some of the time</p> <p>4: Most of the time</p> <p>5: All of the time</p> <p>9: Not stated / Missing</p>
K10+ - Question 9 (k10p_item9)	string	yes	<p>1: None of the time</p> <p>2: A little of the time</p> <p>3: Some of the time</p> <p>4: Most of the time</p> <p>5: All of the time</p> <p>9: Not stated / Missing</p>
K10+ - Question 10 (k10p_item10)	string	yes	<p>1: None of the time</p> <p>2: A little of the time</p> <p>3: Some of the time</p> <p>4: Most of the time</p> <p>5: All of the time</p> <p>9: Not stated / Missing</p>
K10+ - Question 11 (k10p_item11)	integer	yes	0 - 28, 99 = Not stated / Missing
K10+ - Question 12 (k10p_item12)	integer	yes	0 - 28, 99 = Not stated / Missing
K10+ - Question 13 (k10p_item13)	integer	yes	0 - 89, 99 = Not stated / Missing

Data Element (Field Name)	Type (min,max)	Required	Format / Values
K10+ - Question 14 (k10p_item14)	string	yes	1: None of the time 2: A little of the time 3: Some of the time 4: Most of the time 5: All of the time 9: Not stated / Missing
K10+ - Score (k10p_score)	integer	yes	10 - 50, 99 = Not stated / Missing
K10+ - Tags (k10p_tags)	string	—	List of tags for the collection occasion.

When the client's responses to Q1-10 are all recorded as 1 'None of the time', they are not required to answer questions 11-14. Where a question has not been answered please select a response of 'Not stated / missing'.

2.3.3.6.2. K5

As noted above, reporting individual item scores will eventually be required. In the short term, respondents can either report all 5 item scores or report the K5 total score.

Table 2.7 K5 record layout

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Organisation Path (organisation_path)	string	yes	A sequence of colon separated Organisation Keys that fully specifies the Provider Organisation providing a service to the client.
Collection Occasion Key (collection_occasion_key)	string (2,50)	yes	This is a number or code assigned to each collection occasion of outcome measures. The Collection Occasion Key is unique and stable for each collection occasion at the level of the organisation.
Episode Key (episode_key)		yes	
Collection Occasion - Measure Date (measure_date)	date	yes	The date the measure was given.

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Collection Occasion - Reason (reason_for_collection)	string	yes	<p>1: Episode start</p> <p>2: Review</p> <p>3: Episode end</p>
K5 - Question 1 (k5_item1)	string	yes	<p>1: None of the time</p> <p>2: A little of the time</p> <p>3: Some of the time</p> <p>4: Most of the time</p> <p>5: All of the time</p> <p>9: Not stated / Missing</p>
K5 - Question 2 (k5_item2)	string	yes	<p>1: None of the time</p> <p>2: A little of the time</p> <p>3: Some of the time</p> <p>4: Most of the time</p> <p>5: All of the time</p> <p>9: Not stated / Missing</p>
K5 - Question 3 (k5_item3)	string	yes	<p>1: None of the time</p> <p>2: A little of the time</p> <p>3: Some of the time</p> <p>4: Most of the time</p> <p>5: All of the time</p> <p>9: Not stated / Missing</p>

Data Element (Field Name)	Type (min,max)	Required	Format / Values
K5 - Question 4 (k5_item4)	string	yes	<p>1: None of the time</p> <p>2: A little of the time</p> <p>3: Some of the time</p> <p>4: Most of the time</p> <p>5: All of the time</p> <p>9: Not stated / Missing</p>
K5 - Question 5 (k5_item5)	string	yes	<p>1: None of the time</p> <p>2: A little of the time</p> <p>3: Some of the time</p> <p>4: Most of the time</p> <p>5: All of the time</p> <p>9: Not stated / Missing</p>
K5 - Score (k5_score)	integer	yes	5 - 25, 99 = Not stated / Missing
K5 - Tags (k5_tags)	string	—	List of tags for the collection occasion.

2.3.3.6.3. SDQ

Extensive support materials are available on the SDQ developers' website, including copies of the various versions of the instrument, background information and scoring instructions. See <http://www.sdqinfo.com>. There are six versions (parent-report and youth-self report) currently specified format PMHC MDS reporting.

The "1" versions are administered on admission and are rated on the basis of the proceeding 6 months. The "2" follow up versions are administered on review and discharge and are rated on the basis of the previous 1 month period.

The versions specified for PMHC MDS reporting are:

- PC1 - Parent Report Measure for Children aged 4-10, Baseline version;
- PC2 - Parent Report Measure for Children and Adolescents aged 4-10, Follow up version;
- PY1 - Parent Report Measure for Youth aged 11-17, Baseline version;

- PY2 - Parent Report Measure for Youth aged 11-17, Follow up version;
- YR1 - Youth self report measure (11-17), Baseline version; and
- YR2 - Youth self report measure (11-17), Follow up version.

We acknowledge that there is also a parent-report for 2-4 years; and teacher versions for all the years (2-4; 4-10 and 11-17) but that these are not to be reported the PMHC-MDS.

Please note that the item numbering in the SDQ versions is deliberately non sequential because it covers all items in all versions, both to indicate item equivalence across versions and to assist data entry, especially of translated versions. The table below indicates the items that are included in each version, the rating periods used and the broad content covered by each item.

	Informant	Parent				Young Person	
	Age range	4-10		11-17		11 - 17	
	Application	Baseline	Followup	Baseline	Followup	Baseline	Followup
	Rating period	6 months	1 month	6 months	1 month	6 months	1 month
Items	Item Content	Version					
		PC1	PC2	PY1	PY2	YR1	YR2
1-25	Symptoms	✓	✓	✓	✓	✓	✓
26	Overall	✓	✓	✓	✓	✓	✓
27	Duration	✓	X	✓	X	✓	
28-33	Impact	✓	✓	✓	✓	✓	✓
34-35	Follow up progress	X	✓	X	✓	X	✓
36-38	Cross-Informant information	✓	X	✓	X	X	X
39-42	Cross-Informant information	X	X	X	X	✓	X

As noted above, reporting individual item scores will eventually be required. In the short term, respondents can either report all 42 item scores or report the SDQ subscale scores.

2.3.3.6.3.1. SDQ items and Scale Summary scores

The first 25 items in the SDQ comprise 5 scales of 5 items each. It is usually easiest to score all 5 scales before working out the Total Difficulties score. For data entry, the responses to items should always be entered the same way (see below), but they are not all scored the same way. Somewhat True is always scored as 1, but the scoring of Not True and Certainly True varies with each item (see Table 5). For each of the 5 scales the score can range from 0-10 if all 5 items were completed. Scale scores can be prorated if at least 3 items were completed.

		Not True	Some-what True	Certainly True	Summary Score
Standard Values for Data Entry		0	1	2	
Data element	SDQ Item number and description	Item Score			
<i>Emotional Symptoms Scale</i>					0-10
Item 03	Often complains of headaches ...	0	1	2	
Item 08	Many worries or often seems worried	0	1	2	
Item 13	Often unhappy, depressed or tearful	0	1	2	
Item 16	Nervous or clingy in new situations ...	0	1	2	
Item 24	Many fears, easily scared	0	1	2	
<i>Conduct Problem Scale</i>					0-10
Item 05	Often loses temper ...	0	1	2	
Item 07	Generally well behaved ...	2	1	0	
Item 12	Often fights with other children ...	0	1	2	
Item 18	Often lies or cheats	0	1	2	
Item 22	Steals from home, school ...	0	1	2	
<i>Hyperactivity Scale</i>					0-10
Item 02	Restless, overactive ...	0	1	2	
Item 10	Constantly fidgeting ...	0	1	2	
Item 15	Easily distracted ...	0	1	2	
Item 21	Thinks things out before acting	2	1	0	
Item 25	Good attention span ...	2	1	0	
<i>Peer Problem Scale</i>					0-10
Item 06	Rather solitary, prefers to play alone	0	1	2	
Item 11	Has at least one good friend	2	1	0	
Item 14	Generally liked by other children	2	1	0	
Item 19	Picked on or bullied ...	0	1	2	
Item 23	Gets along better with adults ...	0	1	2	
<i>Prosocial Scale</i>					0-10
Item 01	Considerate of other people's feelings	0	1	2	

		Not True	Some-what True	Certainly True	Summary Score
Standard Values for Data Entry		0	1	2	
Data element	SDQ Item number and description	Item Score			
Item 04	Shares readily with other children ...	0	1	2	
Item 09	Helpful if someone is hurt ...	0	1	2	
Item 17	Kind to younger children	0	1	2	
Item 20	Often volunteers to help others ...	0	1	2	
<i>SDQ Total Difficulties Score = Sum of Scales below</i>					0-40
	<i>Emotional Symptoms Scale</i>	0-10			
	<i>Conduct Problem Scale</i>	0-10			
	<i>Hyperactivity Scale</i>	0-10			
	<i>Peer Problem Scale</i>	0-10			

- *NB. Bold items indicate reverse scoring*

2.3.3.6.3.2. Scoring the SDQ

The standard values for coding individual Item responses are 0 (Not True), 1 (Somewhat True), 2 (Certainly True) and 9 (Missing data).

For completed items (response coded 0,1,2) the Item scores are usually the same as the standard values. Them exceptions are item 07, 11, 14, 21 and 25. These items are “reverse-scored”, that is, the standard value is mapped to Item scores as follows: 0->2, 1->1, 2->0.

Summary scores are only calculated if at least three of the five items have been completed (that is, coded 0, 1 or 2). Otherwise the summary score is set to missing. For the Summary scores, the missing value used should be 99.

The Summary scores are computed using the equation shown below, with the result being rounded to the nearest whole number. In the first 25 SDQ questions, each summary scale is composed of five items.

Summary score = (sum of item scores/number of valid completed items) x number of items

The simplest way to calculate the total difficulties score is to add up the following summary scores with the result being rounded to the nearest whole number.

Total score = Emotional Scale + Conduct Scale + Hyperactivity Scale + Peer Problem Scale

However, some of the summary scores may be missing. The rule is if more than one summary score is missing the Total Score is set to missing, value 99.

Items 28-32 are not completed if respondents have answered “No” to Item 26, which asks for an overall opinion about difficulties being present. In this case, all Item responses for Items 27 through 33 should be coded “8” for “not applicable”, and the impact score should be coded to zero. Item 27 is not included in the Impact Score since it assesses the chronicity of the difficulties- the length of time they have been present. Item 33 is not included in the Impact Score, since it assess the burden on others rather than on the child/youth.

The coded Item Responses for the remaining Items 28 through 32 have to be mapped to their Item Scores before adding up. This mapping is the same for all, namely: 0->0, 1->0, 2->1, 3->2.

Table 2.8 SDQ record layout

Data Element (Field Name)	Type (min,max)	Required	Format / Values
Organisation Path (organisation_path)	string	yes	A sequence of colon separated Organisation Keys that fully specifies the Provider Organisation providing a service to the client.
Collection Occasion Key (collection_occasion_key)	string (2,50)	yes	This is a number or code assigned to each collection occasion of outcome measures. The Collection Occasion Key is unique and stable for each collection occasion at the level of the organisation.
Episode Key (episode_key)		yes	
Collection Occasion - Measure Date (measure_date)	date	yes	The date the measure was given.
Collection Occasion - Reason (reason_for_collection)	string	yes	1: Episode start 2: Review 3: Episode end

Data Element (Field Name)	Type (min,max)	Required	Format / Values
SDQ Collection Occasion - Version (sdq_version)	string	yes	PC101: Parent Report Measure 4-10 yrs, Baseline version, Australian Version 1 PC201: Parent Report Measure 4-10 yrs, Follow Up version, Australian Version 1 PY101: Parent Report Measure 11-17 yrs, Baseline version, Australian Version 1 PY201: Parent Report Measure 11-17 yrs, Follow Up version, Australian Version 1 YR101: Self report Version, 11-17 years, Baseline version, Australian Version 1 YR201: Self report Version, 11-17 years, Follow Up version, Australian Version 1
SDQ - Question 1 (sdq_item1)	string	yes	0: Not True 1: Somewhat True 2: Certainly True 7: Unable to rate (insufficient information) 9: Not stated / Missing

Data Element (Field Name)	Type (min,max)	Required	Format / Values
SDQ - Question 2 (sdq_item2)	string	yes	0: Not True 1: Somewhat True 2: Certainly True 7: Unable to rate (insufficient information) 9: Not stated / Missing

SDQ - Question 25 (sdq_item25)	string	yes	0: Not True 1: Somewhat True 2: Certainly True 7: Unable to rate (insufficient information) 9: Not stated / Missing

Data Element (Field Name)	Type (min,max)	Required	Format / Values
SDQ - Question 26 (sdq_item26)	string	yes	<p>0: No</p> <p>1: Yes - minor difficulties</p> <p>2: Yes - definite difficulties</p> <p>3: Yes - severe difficulties</p> <p>7: Unable to rate (insufficient information)</p> <p>9: Not stated / Missing</p>
SDQ - Question 27 (sdq_item27)	string	yes	<p>0: Less than a month</p> <p>1: 1-5 months</p> <p>2: 6-12 months</p> <p>3: Over a year</p> <p>7: Unable to rate (insufficient information)</p> <p>8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)</p> <p>9: Not stated / Missing</p>

Data Element (Field Name)	Type (min,max)	Required	Format / Values
SDQ - Question 28 (sdq_item28)	string	yes	<p>0: Not at all</p> <p>1: A little</p> <p>2: A medium amount</p> <p>3: A great deal</p> <p>7: Unable to rate (insufficient information)</p> <p>8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)</p> <p>9: Not stated / Missing</p>
SDQ - Question 29 (sdq_item29)	string	yes	<p>0: Not at all</p> <p>1: A little</p> <p>2: A medium amount</p> <p>3: A great deal</p> <p>7: Unable to rate (insufficient information)</p> <p>8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)</p> <p>9: Not stated / Missing</p>

Data Element (Field Name)	Type (min,max)	Required	Format / Values
SDQ - Question 30 (sdq_item30)	string	yes	<p>0: Not at all</p> <p>1: A little</p> <p>2: A medium amount</p> <p>3: A great deal</p> <p>7: Unable to rate (insufficient information)</p> <p>8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)</p> <p>9: Not stated / Missing</p>
SDQ - Question 31 (sdq_item31)	string	yes	<p>0: Not at all</p> <p>1: A little</p> <p>2: A medium amount</p> <p>3: A great deal</p> <p>7: Unable to rate (insufficient information)</p> <p>8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)</p> <p>9: Not stated / Missing</p>

Data Element (Field Name)	Type (min,max)	Required	Format / Values
SDQ - Question 32 (sdq_item32)	string	yes	<p>0: Not at all</p> <p>1: A little</p> <p>2: A medium amount</p> <p>3: A great deal</p> <p>7: Unable to rate (insufficient information)</p> <p>8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)</p> <p>9: Not stated / Missing</p>
SDQ - Question 33 (sdq_item33)	string	yes	<p>0: Not at all</p> <p>1: A little</p> <p>2: A medium amount</p> <p>3: A great deal</p> <p>7: Unable to rate (insufficient information)</p> <p>8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)</p> <p>9: Not stated / Missing</p>

Data Element (Field Name)	Type (min,max)	Required	Format / Values
SDQ - Question 34 (sdq_item34)	string	yes	<p>0: Much worse</p> <p>1: A bit worse</p> <p>2: About the same</p> <p>3: A bit better</p> <p>4: Much better</p> <p>7: Unable to rate (insufficient information)</p> <p>8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)</p> <p>9: Not stated / Missing</p>
SDQ - Question 35 (sdq_item35)	string	yes	<p>0: Not at all</p> <p>1: A little</p> <p>2: A medium amount</p> <p>3: A great deal</p> <p>7: Unable to rate (insufficient information)</p> <p>8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)</p> <p>9: Not stated / Missing</p>

Data Element (Field Name)	Type (min,max)	Required	Format / Values
SDQ - Question 36 (sdq_item36)	string	yes	<p>0: No</p> <p>1: A little</p> <p>2: A lot</p> <p>7: Unable to rate (insufficient information)</p> <p>8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)</p> <p>9: Not stated / Missing</p>
SDQ - Question 37 (sdq_item37)	string	yes	<p>0: No</p> <p>1: A little</p> <p>2: A lot</p> <p>7: Unable to rate (insufficient information)</p> <p>8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)</p> <p>9: Not stated / Missing</p>

Data Element (Field Name)	Type (min,max)	Required	Format / Values
SDQ - Question 38 (sdq_item38)	string	yes	<p>0: No</p> <p>1: A little</p> <p>2: A lot</p> <p>7: Unable to rate (insufficient information)</p> <p>8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)</p> <p>9: Not stated / Missing</p>
SDQ - Question 39 (sdq_item39)	string	yes	<p>0: No</p> <p>1: A little</p> <p>2: A lot</p> <p>7: Unable to rate (insufficient information)</p> <p>8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)</p> <p>9: Not stated / Missing</p>

Data Element (Field Name)	Type (min,max)	Required	Format / Values
SDQ - Question 40 (sdq_item40)	string	yes	0: No 1: A little 2: A lot 7: Unable to rate (insufficient information) 8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0) 9: Not stated / Missing
SDQ - Question 41 (sdq_item41)	string	yes	0: No 1: A little 2: A lot 7: Unable to rate (insufficient information) 8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0) 9: Not stated / Missing

Data Element (Field Name)	Type (min,max)	Required	Format / Values
SDQ - Question 42 (sdq_item42)	string	yes	0: No 1: A little 2: A lot 7: Unable to rate (insufficient information) 8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0) 9: Not stated / Missing
SDQ - Emotional Symptoms Scale (sdq_emotional_symptoms)	integer	yes	0 - 10, 99 = Not stated / Missing
SDQ - Conduct Problem Scale (sdq_conduct_problem)	integer	yes	0 - 10, 99 = Not stated / Missing
SDQ - Hyperactivity Scale (sdq_hyperactivity)	integer	yes	0 - 10, 99 = Not stated / Missing
SDQ - Peer Problem Scale (sdq_peer_problem)	integer	yes	0 - 10, 99 = Not stated / Missing
SDQ - Prosocial Scale (sdq_prosocial)	integer	yes	0 - 10, 99 = Not stated / Missing
SDQ - Total Difficulties Score (sdq_total)	integer	yes	0 - 40, 99 = Not stated / Missing
SDQ - Impact Score (sdq_impact)	integer	yes	0 - 10, 99 = Not stated / Missing
SDQ - Tags (sdq_tags)	string	—	List of tags for the collection occasion.

2.3.4. Definitions

2.3.4.1. Client - Aboriginal and Torres Strait Islander Status

Whether a person identifies as being of Aboriginal and/or Torres Strait Islander origin, as represented by a code.

Field name: client_atsi_status

Data type: string

Required: yes

- 1: Aboriginal but not Torres Strait Islander origin
- 2: Torres Strait Islander but not Aboriginal origin
- 3: Both Aboriginal and Torres Strait Islander origin
- 4: Neither Aboriginal or Torres Strait Islander origin
- 9: Not stated/inadequately described

Domain:

Code 9 is not to be available as a valid answer to the questions but is intended for use:

- Primarily when importing data from other data collections that do not contain mappable data.

Notes:

- Where an answer was refused.
- Where the question was not able to be asked prior to completion of assistance because the client was unable to communicate or a person who knows the client was not available.

METeOR: [291036](#)

2.3.4.2. Client - Country of Birth

The country in which the client was born, as represented by a code.

Field name: country_of_birth

Data type: string (4)

Required: yes

9999: Unknown

Standard Australian Classification of Countries (SACC), 2016 4-digit code (ABS Catalogue No. 1269.0) SACC 2016 is a four-digit, three-level hierarchical structure specifying major group, minor group and country. 9999 is used when the information is not known or the client has refused to provide the information.

Notes:

Organisations are encouraged to produce customised lists of the most common languages in use by their local populations from the above resource. Please refer to [Country of Birth](#) for help on designing forms.

METeOR: [459973](#)

ABS: <http://www.abs.gov.au/ausstats/abs@.nsf/mf/1269.0>

2.3.4.3. Client - Date of Birth

The date on which an individual was born.

Field name: date_of_birth

Data type: date

Required: yes

- The date of birth must not be before January 1st 1900.
- The date of birth must not be in the future.
- If the date of birth is unknown, the following approaches should be used:
 - If the age of the person is known, the age should be used to derive the year of birth
 - If the age of the person is unknown, an estimated age of the person should be used to estimate a year of birth

Notes:

- An actual or estimated year of birth should then be converted into an estimated date of birth using the following convention: 0101Estimated year of birth.
- If the date of birth is totally unknown, use 09099999.
- If you have estimated the year of birth make sure you record this in the 'Estimated date of birth flag'

METeOR: [287007](#)

2.3.4.4. Client - Estimated Date of Birth Flag

The date of birth estimate flag records whether or not the client's date of birth has been estimated.

Field name: est_date_of_birth

Data type: string

Required: yes

- 1: Date of birth is accurate
 - 2: Date of birth is an estimate
- Domain:**
- 8: Date of birth is a 'dummy' date (ie, 09099999)
 - 9: Accuracy of stated date of birth is not known
-

2.3.4.5. Client - Gender

The term 'gender' refers to the way in which a person identifies their masculine or feminine characteristics. A person's gender relates to their deeply held internal and individual sense of gender and is not always exclusively male or female. It may or may not correspond to their sex assigned at birth.

Field name: client_gender

Data type: string

Required: yes

- 0: Not stated/Inadequately described
1: Male

Domain: 2: Female

- ### 3: Other

1 - M - Male

Adults who identify themselves as men, and children who identify themselves as boys.

2 - F - Female

Notes: Adults who identify themselves as women, and children who identify themselves as girls.

3 - X- Other

Adults and children who identify as non-binary, gender diverse, or with descriptors other than man/boy or

2.3.4.6. Client Key

This is a number or code assigned to each individual referred to the commissioned organisation. The client identifier is unique and stable for each individual within the PHN.

Field name: client_key

Data type: string (2,50)

Required: yes

Notes: Client keys must be unique within each PHN independent of the treating organisation. It is the responsibility of PHNs and Provider Organisations to co-ordinate to maintain this identifier. Clients should not be assigned multiple keys within the same PHN.

2.3.4.7. Client - Main Language Spoken at Home

The language reported by a client as the main language other than English spoken by that client in his/her home (or most recent private residential setting occupied by the client) to communicate with other residents of the home or setting and regular visitors, as represented by a code.

[Australian Standard Classification of Languages \(ASCL\), 2016 4-digit code \(ABS Catalogue No. 1267.0\)](#) or 9999 if info is not known or client refuses to supply.

Notes: The ABS recommends the following question in order to collect this data: Which language does the client mainly speak at home? (If more than one language, indicate the one that is spoken most often.)

Organisations are encouraged to produce customised lists of the most common countries based on their local populations from the above resource. Please refer to [Main Language Spoken at Home](#) for help on designing forms.

METeOR: [460125](#)

ABS: <http://www.abs.gov.au/ausstats/abs@.nsf/mf/1267.0>

2.3.4.8. Client - Proficiency in Spoken English

The self-assessed level of ability to speak English, asked of people whose first language is a language other than English or who speak a language other than English at home.

Field name: prof_english

Data type: string

Required: yes

0: Not applicable (persons under 5 years of age or who speak only English)

1: Very well

2: Well

Domain: 3: Not well

4: Not at all

9: Not stated/inadequately described

0 - Not applicable (persons under 5 years of age or who speak only English)

Not applicable, is to be used for people under 5 years of age and people who speak only English.

9 - Not stated/inadequately described

Notes: Not stated/inadequately described, is not to be used on primary collection forms. It is primarily for use in administrative collections when transferring data from data sets where the item has not been collected.

METeOR: [270203](#)

2.3.4.9. Client - Statistical Linkage Key

A key that enables two or more records belonging to the same individual to be brought together.

Field name: slk

Data type: string (14,40)

Required: yes

System generated non-identifiable alphanumeric code derived from information held by the PMHC organisation.

Supported formats:

Notes:

- 14 character [SLK](#)
- a [Crockford encoded](#) sha1 hash of a 14 character SLK. This must be 32 characters in length.
- a hex encoded sha1 hash of a 14 character SLK. This must be 40 characters in length.

SLK values are stored in sha1_hex format.

METeOR: [349510](#)

2.3.4.10. Client - Tags

List of tags for the client.

Field name: client_tags

Data type: string

Required: no

A comma separated list of tags.

Organisations can use this field to tag records in order to partition them as per local requirements.

Notes: Tags can contain lower case letters (or will get lowercased), numbers, dashes, spaces, and !. Leading and trailing spaces will be stripped. e.g. priority!, nurse required, pending-outcome-1 would all be legitimate.

Tags beginning with an exclamation mark (!) are reserved for future use by the Department. e.g. !reserved, ! reserved, !department-use-only .

2.3.4.11. Collection Occasion - Measure Date

The date the measure was given.

Field name: measure_date

Data type: date

Required: yes

For Date fields, data must be recorded in compliance with the standard format used across the National Health Data Dictionary; specifically, dates must be of fixed 8 column width in the format DDMMYYYY, with leading zeros used when necessary to pad out a value. For instance, 13th March 2008 would appear as 13032008.

Notes: If the date the measure was given is unknown, 09099999 should be used.

- The measure date must not be before 1st January 2016.
 - The measure date must not be in the future.
-

2.3.4.12. Collection Occasion - Reason

The reason for the collection of the outcome measures on the identified Outcome Collection Occasion.

Field name: reason_for_collection

Data type: string

Required: yes

- 1:** Episode start
2: Review
Domain:
3: Episode end

1 - Episode start

Refers to an outcome measure undertaken at the beginning of an Episode of Care. For the purposes of the PMHC MDS protocol, episodes may start at the point of first Service Contact with a new client who has not been seen previously by the organisation, or a first contact for a new Episode of Care for a client who has received services from the organisation in a previous Episode of Care that has been completed.

2 - Review

Refers to an outcome measure undertaken during the course of an Episode of Care that post-dates Episode Start and pre-dates Episode End. An outcome measure may be undertaken at Review for a number of reasons including:

- in response to critical clinical events or changes in the client's mental health status;
- following a client-requested review; or
- other situations where a review may be indicated.

3 - Episode end

Refers to the outcome measures collected at the end of an Episode of Care.

2.3.4.13. Collection Occasion Key

This is a number or code assigned to each collection occasion of outcome measures. The Collection Occasion Key is unique and stable for each collection occasion at the level of the organisation.

Field name: collection_occasion_key

Data type: string (2,50)

Required: yes

2.3.4.14. Episode - Additional Diagnosis

The main additional condition or complaint co-existing with the Principal Diagnosis or arising during the episode of care.

Field name: additional_diagnosis

Data type: string

Required: yes

- 000:** No additional diagnosis
- 100:** Anxiety disorders (ATAPS)
- 101:** Panic disorder
- 102:** Agoraphobia
- 103:** Social phobia
- 104:** Generalised anxiety disorder
- 105:** Obsessive-compulsive disorder
- 106:** Post-traumatic stress disorder
- 107:** Acute stress disorder
- 108:** Other anxiety disorder
- 200:** Affective (Mood) disorders (ATAPS)
- 201:** Major depressive disorder
- 202:** Dysthymia
- 203:** Depressive disorder NOS
- 204:** Bipolar disorder
- 205:** Cyclothymic disorder
- 206:** Other affective disorder
- Domain:**
- 300:** Substance use disorders (ATAPS)
- 301:** Alcohol harmful use
- 302:** Alcohol dependence
- 303:** Other drug harmful use
- 304:** Other drug dependence
- 305:** Other substance use disorder
- 400:** Psychotic disorders (ATAPS)
- 401:** Schizophrenia
- 402:** Schizoaffective disorder
- 403:** Brief psychotic disorder
- 404:** Other psychotic disorder
- 501:** Separation anxiety disorder
- 502:** Attention deficit hyperactivity disorder (ADHD)
- 503:** Conduct disorder
- 504:** Oppositional defiant disorder
- 505:** Pervasive developmental disorder

- 506: Other disorder of childhood and adolescence
- 601: Adjustment disorder
- 602: Eating disorder
- 603: Somatoform disorder
- 604: Personality disorder
- 605: Other mental disorder
- 901: Anxiety symptoms
- 902: Depressive symptoms
- 903: Mixed anxiety and depressive symptoms
- 904: Stress related
- 905: Other
- 999: Missing

Additional Diagnosis gives information on conditions that are significant in terms of treatment required and resources used during the episode of care. Additional diagnoses should be interpreted as conditions that affect client management in terms of requiring any of the following:

- Commencement, alteration or adjustment of therapeutic treatment
- Diagnostic procedures
- Increased clinical care and/or monitoring

Where the client one or more comorbid mental health conditions in addition to the condition coded as the Principal Diagnosis, record the main condition as the Additional Diagnosis.

The following responses have been added to allow mapping of ATAPS data to PMHC format.

- Notes:**
- 100: Anxiety disorders (ATAPS)
 - 200: Affective (Mood) disorders (ATAPS)
 - 300: Substance use disorders (ATAPS)
 - 400: Psychotic disorders (ATAPS)

Note: These four codes should only be used for Episodes that are migrated from ATAPS MDS sources that cannot be described by any other Diagnosis. It is expected that the majority of Episodes delivered to clients from 1st July, 2017 can be assigned to other diagnoses.

These responses will only be allowed on episodes where the original ATAPS referral date was before 1 July 2017

These responses will only be allowed on episodes with the !ATAPS flag.

For further notes on the recording of diagnosis codes see Principal Diagnosis.

2.3.4.15. Episode - Area of usual residence, postcode

The Australian postcode of the client.

Field name: client_postcode

Data type: string

Required: yes

A valid Australian postcode or 9999 if the postcode is unknown or the client has not provided sufficient information to confirm their current residential address.

The full list of Australian Postcodes can be found at [Australia Post](#).

Notes: When collecting the postcode of a person's usual place of residence, the ABS recommends that 'usual' be defined as: 'the place where the person has or intends to live for 6 months or more, or the place that the person regards as their main residence, or where the person has no other residence, the place they currently reside.'

Postcodes are deemed valid if they are in the range 0200-0299, 0800-9999.

METeOR: [429894](#)

2.3.4.16. Episode - Client Consent to Anonymised Data

An indication that the client has consented to their anonymised data being provided to the Department of Health for statistical purposes in planning and improving mental health services.

Field name: client_consent

Data type: string

Required: yes

1: Yes

Domain: 2: No

1 - Yes

The client has consented to their anonymised data being provided to the Department of Health for statistical purposes in planning and improving mental health services. The client's data will be included in reports and extracts accessible by the Department of Health.

2 - No

Notes: The client has not consented to their anonymised data being provided to the Department of Health for statistical purposes in planning and improving mental health services. The client's data will be excluded from reports and extracts accessible by the Department of Health.

All data can be uploaded, regardless of consent flag.

All data will be available to PHNs to extract for their own internal data evaluation purposes.

2.3.4.17. Episode - Completion Status

An indication of the completion status of an *Episode of Care*.

Field name: episode_completion_status

Data type: string

Required: no

- 0: Episode open
- 1: Episode closed - treatment concluded
- 2: Episode closed administratively - client could not be contacted
- 3: Episode closed administratively - client declined further contact
- 4: Episode closed administratively - client moved out of area
- 5: Episode closed administratively - client referred elsewhere
- 6: Episode closed administratively - other reason

Domain:

In order to use code 1 (Episode closed - treatment concluded) the client must have at least one service contact. All other codes may be applicable even when the client has no service contacts.

0 or Blank - Episode open

The client still requires treatment and further service contacts are required.

1 - Episode closed - treatment concluded

No further service contacts are planned as the client no longer requires treatment.

2 - Episode closed administratively - client could not be contacted

Further service contacts were planned but the client could no longer be contacted.

3 - Episode closed administratively - client declined further contact

Further service contacts were planned but the client declined further treatment.

4 - Episode closed administratively - client moved out of area

Further service contacts were planned but the client moved out of the area without a referral elsewhere. Where a client was referred somewhere else *Episode Completion Status* should be recorded as code 5 (Episode closed administratively - client referred elsewhere).

5 - Episode closed administratively - client referred elsewhere

Where a client still requires treatment, but a different service has been deemed appropriate or a client has moved out of the area so has moved to a different provider.

Notes:

6 - Episode closed administratively - other reason

Where a client is no longer being given treatment but the reason for conclusion is not covered above.

Episode Completion Status interacts with two other data items in the PMHC MDS - *Service Contact - Final*, and *Episode End Date*.

Service Contact - Final

Collection of data for *Service Contacts* includes a *Service Contact - Final*/item that requires the service provider to indicate whether further Service Contacts are planned. Where this item is recorded as 'no further services planned', the *Episode Completion Status* should be recorded as code 1 (Episode closed - treatment concluded) code 3 (Episode closed administratively - client declined further contact), code 4 (Episode closed administratively - client moved out of area), or code 5 (Episode closed administratively - client referred elsewhere). Selection of coding option should be that which best describes the circumstances of the episode ending.

Episode End Date

Where a Final Service Contact is recorded *Episode End Date* should be recorded as the date of the final Service Contact.

2.3.4.18. Episode - Employment Participation

Whether a person in paid employment is employed full-time or part-time, as represented by a code.

Field name: employment_participation

Data type: string

Required: yes

- 1:** Full-time
 - 2:** Part-time
- Domain:**
- 3:** Not applicable - not in the labour force
 - 9:** Not stated/inadequately described

Applies only to people whose labour force status is employed. (See metadata item Labour Force Status, for a definition of 'employed'). Paid employment includes persons who performed some work for wages or salary, in cash or in kind, and persons temporarily absent from a paid employment job but who retained a formal attachment to that job.

1 - Full-time

Employed persons are working full-time if they: (a) usually work 35 hours or more in a week (in all paid jobs) or (b) although usually working less than 35 hours a week, actually worked 35 hours or more during the reference period.

Notes:

2 - Part-time

Employed persons are working part-time if they usually work less than 35 hours a week (in all paid jobs) and either did so during the reference period, or were not at work in the reference period.

9 - Not stated / inadequately described

Is not to be used on primary collection forms. It is primarily for use in administrative collections when transferring data from data sets where the item has not been collected.

METeOR: [269950](#)

2.3.4.19. Episode - End Date

The date on which an *Episode of Care* is formally or administratively ended

Field name: episode_end_date

Data type: date

Required: no

- The episode end date must not be before 1st January 2016.
- The episode end date must not be in the future.

An *Episode of Care* may be ended in one of two ways:

- clinically, consequent upon conclusion of treatment for the client and discharge from care; or
- administratively (statistically), where contact with the client has been lost by the organisation prior to completion of treatment or other factors prevented treatment being completed.

Episode End Date interacts with two other data items in the PMHC MDS - *Service Contact - Final*, and *Episode Completion Status*.

Notes:

Service Contact - Final

Collection of data for *Service Contacts* includes a *Service Contact - Final*/item that requires the service provider to indicate whether further *Service Contacts* are planned. Where this item is recorded as 'no further services planned', the date of the final *Service Contact* should be recorded as the *Episode End Date*.

Episode Completion Status

This field should be recorded as 'Episode closed treatment concluded' when a *Service Contact - Final* is recorded. The *Episode Completion Status* field can also be manually recorded to allow for administrative closure of episodes (e.g., contact has been lost with a client over a prolonged period - see *Episode Completion Status* for additional guidance). Where an episode is closed administratively, the *Episode End Date* should be recorded as the date on which the organisation made the decision to close episode.

METeOR: [614094](#)

2.3.4.20. Episode - GP Mental Health Treatment Plan Flag

An indication of whether a client has a GP mental health treatment plan. A GP should be involved in a referral where appropriate however a mental health treatment plan is not mandatory.

Field name: mental_health_treatment_plan

Data type: string

Required: yes

1: Yes

2: No

Domain: 3: Unknown

9: Not stated/inadequately described

2.3.4.21. Episode - Health Care Card

An indication of whether the person is a current holder of a Health Care Card that entitles them to arrange of concessions for Government funded health services.

Field name: health_care_card

Data type: string

Required: yes

1: Yes

2: No

Domain: 3: Not Known

9: Not stated

Notes: Details on the Australian Government Health Care Card are available at:
<https://www.humanservices.gov.au/customer/services/centrelink/health-care-card>

METeOR: [605149](#)

2.3.4.22. Episode - Homelessness Flag

An indication of whether the client has been homeless in the 4 weeks prior to the current service episode.

Field name: homelessness

Data type: string

Required: yes

1: Sleeping rough or in non-conventional accommodation

2: Short-term or emergency accommodation

Domain: 3: Not homeless

9: Not stated / Missing

1 - Sleeping rough or in non-conventional accommodation

Includes sleeping on the streets, in a park, in cars or railway carriages, under bridges or other similar 'rough' accommodation

2 - Short-term or emergency accommodation

Includes sleeping in short-term accommodation, emergency accommodation, due to a lack of other options. This may include refuges; crisis shelters; couch surfing; living temporarily with friends and relatives; insecure accommodation on a short term basis; emergency accommodation arranged in hotels, motels etc by a specialist homelessness agency.

3 - Not homeless

Includes sleeping in own accommodation/rental accommodation or living with friends or relatives on a stable, long term basis

Notes:

9 - Not stated / Missing

Not stated / Missing

Select the code that best fits the client's sleeping arrangements over the preceding 4 weeks. Where multiple options apply (e.g., client has experienced more than one of the sleeping arrangements over the previous 4 weeks) the following coding hierarchy should be followed:

- If code 1 applied at any time over the 4 week period, code 1
- If code 2 but not code 1 applied at any time over the 4 week period, code 2
- Otherwise Code 3 applies

2.3.4.23. Episode Key

This is a number or code assigned to each episode. The Episode Key is unique and stable for each episode at the level of the organisation.

Field name: episode_key

Data type: string (2,50)

Required: yes

Episode Keys must be generated by the organisation to be unique at the provider organisation level and must persist across time. Creation of episode keys in this way allows clients to be merged (where duplicate Client Keys have been identified) without having to re-allocate episode identifiers since they can never clash.

Notes:

A recommended approach for the creation of Episode Keys is to compute [random UUIDs](#).

2.3.4.24. Episode - Labour Force Status

The self-reported status the person currently has in being either in the labour force (employed/unemployed) or not in the labour force, as represented by a code.

Field name: labour_force_status

Data type: string

Required: yes

1: Employed

2: Unemployed

Domain: 3: Not in the Labour Force

9: Not stated/inadequately described

1 - Employed

Employed persons are those aged 15 years and over who met one of the following criteria during the reference week:

- Worked for one hour or more for pay, profit, commission or payment in kind, in a job or business or on a farm (employees and owner managers of incorporated or unincorporated enterprises).
- Worked for one hour or more without pay in a family business or on a farm (contributing family workers).
- Were employees who had a job but were not at work and were:
 - away from work for less than four weeks up to the end of the reference week; or
 - away from work for more than four weeks up to the end of the reference week and
 - received pay for some or all of the four week period to the end of the reference week; or
 - away from work as a standard work or shift arrangement; or
 - on strike or locked out; or
 - on workers' compensation and expected to return to their job.
- Were owner managers who had a job, business or farm, but were not at work.

2 - Unemployed

Unemployed persons are those aged 15 years and over who were not employed during the reference week, and:

Notes:

- had actively looked for full time or part time work at any time in the four weeks up to the end of the reference week and were available for work in the reference week; or
- were waiting to start a new job within four weeks from the end of the reference week and could have started in the reference week if the job had been available then.

Actively looked for work includes:

- written, telephoned or applied to an employer for work;
- had an interview with an employer for work;
- answered an advertisement for a job;
- checked or registered with a Job Services Australia provider or any other employment agency;
- taken steps to purchase or start your own business;
- advertised or tendered for work; and
- contacted friends or relatives in order to obtain work.

3 - Not in the labour force

Persons not in the labour force are those aged 15 years and over who were not in the categories employed or unemployed, as defined, during the reference week. They include people who undertook unpaid household duties or other voluntary work only, were retired, voluntarily inactive and those permanently unable to work.

METeOR: [621450](#)

2.3.4.25. Episode - Marital Status

A person's current relationship status in terms of a couple relationship or, for those not in a couple relationship, the existence of a current or previous registered marriage, as represented by a code.

Field name: marital_status

Data type: string

Required: yes

1: Never married

2: Widowed

3: Divorced

Domain: 4: Separated

5: Married (registered and de facto)

6: Not stated/inadequately described

Refers to the current marital status of a person.

2 - Widowed

This code usually refers to registered marriages but when self-reported may also refer to de facto marriages.

4 - Separated

This code refers to registered marriages but when self-reported may also refer to de facto marriages.

Notes:

5 - Married (registered and de facto)

Includes people who have been divorced or widowed but have since re-married, and should be generally accepted as applicable to all de facto couples, including of the same sex.

6 - Not stated/inadequately described

This code is not for use on primary collection forms. It is primarily for use in administrative collections when transferring data from data sets where the item has not been collected.

METeOR: [291045](#)

2.3.4.26. Episode - Medication - Antidepressants (N06A)

Whether the client is taking prescribed antidepressants for a mental health condition as assessed at intake assessment, as represented by a code.

Field name: medication_antidepressants

Data type: string

Required: yes

1: Yes

2: No

Domain:

9: Unknown

The N06A class of drugs a therapeutic subgroup of the Anatomical Therapeutic Chemical Classification System, a system of alphanumeric codes developed by the World Health Organisation (WHO) for the classification of drugs and other medical products. It covers drugs designed for the depressive disorders.

Notes:

Details of drugs included in the category can be found here: http://www.whocc.no/atc_ddd_index/?code=N06A

2.3.4.27. Episode - Medication - Antipsychotics (N05A)

Whether the client is taking prescribed antipsychotics for a mental health condition as assessed at intake assessment, as represented by a code.

Field name: medication_antipsychotics

Data type: string

Required: yes

1: Yes

2: No

Domain:

9: Unknown

The N05A class of drugs a therapeutic subgroup of the Anatomical Therapeutic Chemical Classification System, a system of alphanumeric codes developed by the World Health Organisation (WHO) for the classification of drugs and other medical products. It covers drugs designed for the treatment of psychotic disorders.

Notes:

Details of drugs included in the category can be found here: http://www.whocc.no/atc_ddd_index/?code=N05A

2.3.4.28. Episode - Medication - Anxiolytics (N05B)

Whether the client is taking prescribed anxiolytics for a mental health condition as assessed at intake assessment, as represented by a code.

Field name: medication_anxiolytics

Data type: string

Required: yes

1: Yes

2: No

Domain:

9: Unknown

The N05B class of drugs a therapeutic subgroup of the Anatomical Therapeutic Chemical Classification System, a system of alphanumeric codes developed by the World Health Organisation (WHO) for the classification of drugs and other medical products. It covers drugs designed for the treatment of disorders associated with anxiety and tension.

Notes:

Details of drugs included in the category can be found here: http://www.whocc.no/atc_ddd_index/?code=N05B

2.3.4.29. Episode - Medication - Hypnotics and sedatives (N05C)

Whether the client is taking prescribed hypnotics and sedatives for a mental health condition as assessed at intake assessment, as represented by a code.

Field name: medication_hypnotics

Data type: string

Required: yes

1: Yes

2: No

Domain:

9: Unknown

Notes:

The N05C class of drugs a therapeutic subgroup of the Anatomical Therapeutic Chemical Classification System, a system of alphanumeric codes developed by the World Health Organisation (WHO) for the classification of drugs and other medical products. It covers drugs designed to have mainly sedative or hypnotic actions. Hypnotic drugs are used to induce sleep and treat severe insomnia. Sedative drugs are prescribed to reduce excitability or anxiety.

Details of drugs included in the category can be found here: http://www.whocc.no/atc_ddd_index/?code=N05C

2.3.4.30. Episode - Medication - Psychostimulants and nootropics (N06B)

Whether the client is taking prescribed psychostimulants and nootropics for a mental health condition as assessed at intake assessment, as represented by a code.

Field name: medication_psychostimulants

Data type: string

Required: yes

1: Yes

2: No

Domain:

9: Unknown

The N06B class of drugs a therapeutic subgroup of the Anatomical Therapeutic Chemical Classification System, a system of alphanumeric codes developed by the World Health Organisation (WHO) for the classification of drugs and other medical products. It covers drugs designed to attention-deficit hyperactivity disorder (ADHD) and to improve impaired cognitive abilities.

Notes:

Details of drugs included in the category can be found here: http://www.whocc.no/atc_ddd_index/?code=N06B

2.3.4.31. Episode - NDIS Participant

Is the client a participant in the National Disability Insurance Scheme?, as represented by a code.

Field name: ndis_participant

Data type: string

Required: yes

1: Yes

2: No

Domain:

9: Not stated/inadequately described

2.3.4.32. Episode - Principal Diagnosis

The Principal Diagnosis is the diagnosis established after study to be chiefly responsible for occasioning the client's care during the current Episode of Care.

Field name: principal_diagnosis

Data type: string

Required: yes

- 100:** Anxiety disorders (ATAPS)
- 101:** Panic disorder
- 102:** Agoraphobia
- 103:** Social phobia
- 104:** Generalised anxiety disorder
- 105:** Obsessive-compulsive disorder
- 106:** Post-traumatic stress disorder
- 107:** Acute stress disorder
- 108:** Other anxiety disorder
- 200:** Affective (Mood) disorders (ATAPS)
- 201:** Major depressive disorder
- 202:** Dysthymia
- 203:** Depressive disorder NOS
- 204:** Bipolar disorder
- 205:** Cyclothymic disorder
- 206:** Other affective disorder
- 300:** Substance use disorders (ATAPS)
- Domain:**
- 301:** Alcohol harmful use
- 302:** Alcohol dependence
- 303:** Other drug harmful use
- 304:** Other drug dependence
- 305:** Other substance use disorder
- 400:** Psychotic disorders (ATAPS)
- 401:** Schizophrenia
- 402:** Schizoaffective disorder
- 403:** Brief psychotic disorder
- 404:** Other psychotic disorder
- 501:** Separation anxiety disorder
- 502:** Attention deficit hyperactivity disorder (ADHD)
- 503:** Conduct disorder
- 504:** Oppositional defiant disorder
- 505:** Pervasive developmental disorder
- 506:** Other disorder of childhood and adolescence

- 601:** Adjustment disorder
 - 602:** Eating disorder
 - 603:** Somatoform disorder
 - 604:** Personality disorder
 - 605:** Other mental disorder
- 901:** Anxiety symptoms
 - 902:** Depressive symptoms
 - 903:** Mixed anxiety and depressive symptoms
 - 904:** Stress related
 - 905:** Other
- 999:** Missing

Diagnoses are grouped into 7 major categories:

- 1xx - Anxiety disorders
- 2xx - Affective (Mood) disorders
- 3xx - Substance use disorders
- 4xx - Psychotic disorders
- 5xx - Disorders with onset usually occurring in childhood and adolescence not listed elsewhere
- 6xx - Other mental disorders
- 9xx - No formal mental disorder but subsyndromal problems

The Principal Diagnosis should be determined by the treating or supervising clinical practitioner who is responsible for providing, or overseeing, services delivered to the client during their current episode of care. Each episode of care must have a Principal Diagnosis recorded and may have an Additional Diagnoses. In some instances the client's Principal Diagnosis may not be clear at initial contact and require a period of contact before a reliable diagnosis can be made. If a client has more than one diagnosis, the Principal Diagnosis should reflect the main presenting problem. Any secondary diagnosis should be recorded under the Additional Diagnosis field.

The coding options developed for the PMHC MDS have been selected to balance comprehensiveness and brevity. They comprise a mix of the most prevalent mental disorders in the Australian adult, child and adolescent population, supplemented by less prevalent conditions that may be experienced by clients of PHN-commissioned mental health services. The diagnosis options are based on an abbreviated set of clinical terms and groupings specified in the Diagnostic and Statistical Manual of Mental Disorders Fourth Edition (DSM-IV-TR). These code lists summarise the approximate 300 unique mental health disorder codes in the full DSM-IV to a set of 9 major categories, and 37 individual codes. Diagnoses are grouped under higher level categories, based on the DSM-IV. Code numbers have been assigned specifically for the PMHC MDS to create a logical ordering but are capable of being mapped to both DSM-IV and ICD-10 codes.

Options for recording Principal Diagnosis include the broad category 'No formal mental disorder but subsyndromal problem' (codes commencing with 9). These codes should be used for clients who present with problems that do not meet threshold criteria for a formal diagnosis - for example, people experiencing subsyndromal symptoms who may be at risk of progressing to a more severe symptom level.

Reference: Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition, Text Revision. Copyright 2000 American Psychiatric Association.

The following responses have been added to allow mapping of ATAPS data to PMHC format.

- 100: Anxiety disorders (ATAPS)
- 200: Affective (Mood) disorders (ATAPS)
- 300: Substance use disorders (ATAPS)
- 400: Psychotic disorders (ATAPS)

Note: These four codes should only be used for Episodes that are migrated from ATAPS MDS sources that cannot be described by any other Diagnosis. It is expected that the majority of Episodes delivered to clients from 1st July, 2017 can be assigned to other diagnoses.

These responses will only be allowed on episodes where the original ATAPS referral date was before 1 July 2017

These responses will only be allowed on episodes with the !ATAPS flag.

2.3.4.33. Episode - Principal Focus of Treatment Plan

The range of activities that best describes the overall services intended to be delivered to the client throughout the course of the episode. For most clients, this will equate to the activities that account for most time spent by the service provider.

Field name: principal_focus

Data type: string

Required: yes

- 1: Psychological therapy
- 2: Low intensity psychological intervention
- 3: Clinical care coordination
- 4: Complex care package

Domain:

- 5: Child and youth-specific mental health services
- 6: Indigenous-specific mental health services
- 7: Other

Describes the main focus of the services to be delivered to the client for the current Episode of Care, selected from a defined list of categories.

Service providers are required to report on the 'Principal Focus of Treatment Plan' for all accepted referrals. This requires a judgement to be made about the main focus of the services to be delivered to the client for the current Episode of Care, made following initial assessment and modifiable at a later stage. It is chosen from a defined list of categories, with the provider required to select the category that best fits the treatment plan designed for the client.

Principal Focus of Treatment Plan is necessarily a judgement made by the provider at the outset of service delivery but consistent with good practice, should be made on the basis of a treatment plan developed in collaboration with the client. It should not be confused with Service Type which is collected at each Service Contact.

1 - Psychological therapy

The treatment plan for the client is primarily based around the delivery of psychological therapy by one or more mental health professionals. This category most closely matches the type of services delivered under the previous ATAPS program where up to 12 individual treatment sessions, and 18 in exceptional circumstances, could be provided. These sessions could be supplemented by up to 10 group-based sessions.

The concept of 'mental health professionals' has a specific meaning defined in the various guidance documentation prepared to support PHNs in implementation of reforms. It refers to service providers who meet the requirements for registration, credentialing or recognition as a qualified mental health professional and includes:

- Psychiatrists
- Registered Psychologists
- Clinical Psychologists
- Mental Health Nurses;
- Occupational Therapists;
- Social Workers
- Aboriginal and Torres Strait Islander health workers.

2 - Low intensity psychological intervention

The treatment plan for the client is primarily based around delivery of time-limited, structured psychological interventions that are aimed at providing a less costly intervention alternative to 'standard' psychological therapy. The essence of low intensity interventions is that they utilise nil or relatively little qualified mental health professional time and are targeted at people with, or at risk of, mild mental illness. Low intensity episodes can be delivered through a range of mechanisms including:

- use of individuals with appropriate competencies but who do not meet the requirements for registration, credentialing or recognition as a mental health professional;
- delivery of services principally through group-based programs; and
- delivery of brief or low cost forms of treatment by mental health professionals.

3 - Clinical care coordination

The treatment plan for the client is primarily based around delivery of a range of services where the overarching aim is to coordinate and better integrate care for the individual across multiple providers with the aim of improving clinical outcomes. Consultation and liaison may occur with primary health care providers, acute health, emergency services, rehabilitation

and support services or other agencies that have some level of responsibility for the client's clinical outcomes. These clinical care coordination and liaison activities are expected to account for a significant proportion of service contacts delivered throughout these episodes.

Activities focused on working in partnership and liaison with other health care and service providers and other individuals to coordinate and integrate service delivery to the client with the aim of improving their clinical outcomes. Consultation and liaison may occur with primary health care providers, acute health, emergency services, rehabilitation and support services, family, friends, other support people and carers and other agencies that have some level of responsibility for the client's treatment and/or well-being.

4 - Complex Care Package

The treatment plan for the client is primarily based around the delivery of an individually tailored 'package' of services for a client with severe and complex mental illness who is being managed principally within a primary care setting. The overarching requirement is that the client receives an individually tailored 'package' of services that bundles a range of services that extends beyond 'standard' service delivery and which is funded through innovative, non-standard funding models. Note: As outlined in the relevant guidance documentation, only three selected PHN Lead Sites with responsibilities for trialling work in this area are expected to deliver complex care packages. A wider roll-out may be undertaken in the future pending results of the trial.

5 - Child and youth-specific mental health services

The treatment plan for the client is primarily based around the delivery of a range of services for children (0-11 years) or youth (aged 12-24 years) who present with a mental illness, or are at risk of mental illness. These episodes are characterised by services that are designed specifically for children and young people, include a broader range of both clinical and non-clinical services and may include a significant component of clinical care coordination and liaison. Child and youth-specific mental health episodes have substantial flexibility in types of services actually delivered.

6 - Indigenous-specific services

The treatment plan for the client is primarily based around delivery of mental health services that are specifically designed to provide culturally appropriate services for Aboriginal and Torres Strait Islander peoples.

7 - Other

The treatment plan for the client is primarily based around services that cannot be described by other categories.

2.3.4.34. Episode - Referral Date

The date the referrer made the referral.

Field name: referral_date

Data type: date

Required: no

For Date fields, data must be recorded in compliance with the standard format used across the National Health Data Dictionary; specifically, dates must be of fixed 8 column width in the format DDMYYYYY, with leading zeros used when necessary to pad out a value. For instance, 13th March 2008 would appear as 13032008.

Notes:

- The referral date must not be before 1st January 2014.
- The referral date must not be in the future.

2.3.4.35. Episode - Referrer Organisation Type

Type of organisation in which the referring professional is based.

Field name: referrer_organisation_type

Data type: string

Required: yes

- 1:** General Practice
- 2:** Medical Specialist Consulting Rooms
- 3:** Private practice
- 4:** Public mental health service
- 5:** Public Hospital
- 6:** Private Hospital
- 7:** Emergency Department
- 8:** Community Health Centre
- 9:** Drug and Alcohol Service
- 10:** Community Support Organisation NFP
- 11:** Indigenous Health Organisation

- 12:** Child and Maternal Health

Domain:

- 13:** Nursing Service
- 14:** Telephone helpline
- 15:** Digital health service
- 16:** Family Support Service
- 17:** School
- 18:** Tertiary Education institution
- 19:** Housing service
- 20:** Centrelink
- 21:** Other
- 98:** N/A - Self referral
- 99:** Not stated

Medical Specialist Consulting Rooms includes private medical practitioner rooms in public or private hospital or other settings.

Notes: Public mental health service refers to a state- or territory-funded specialised mental health services (i.e., specialised mental health care delivered in public acute and psychiatric hospital settings, community mental health care services, and specialised residential mental health care services).

Not applicable should only be selected in instances of Self referral.

2.3.4.36. Episode - Referrer Profession

Profession of the provider who referred the client.

Field name: referrer_profession

Data type: string

Required: yes

- 1: General Practitioner
- 2: Psychiatrist
- 3: Obstetrician
- 4: Paediatrician
- 5: Other Medical Specialist
- 6: Midwife
- 7: Maternal Health Nurse
- 8: Psychologist
- 9: Mental Health Nurse
- 10: Social Worker
- 11: Occupational therapist
- 12: Aboriginal Health Worker
- 13: Educational professional
- 14: Early childhood service worker
- 15: Other
- 98: N/A - Self referral
- 99: Not stated

Notes: New arrangements for some services delivered in primary mental health care allows clients to refer themselves for treatment. Therefore, 'Self' is a response option included within 'Referrer profession'.

2.3.4.37. Episode - Source of Cash Income

The source from which a person derives the greatest proportion of his/her income, as represented by a code.

Field name: income_source

Data type: string

Required: yes

- 0: N/A - Client aged less than 16 years
- 1: Disability Support Pension
- 2: Other pension or benefit (not superannuation)
- 3: Paid employment
- 4: Compensation payments
- 5: Other (e.g. superannuation, investments etc.)
- 6: Nil income
- 7: Not known
- 9: Not stated/inadequately described

Domain:

This data standard is not applicable to person's aged less than 16 years.

This item refers to the source by which a person derives most (equal to or greater than 50%) of his/her income. If the person has multiple sources of income and none are equal to or greater than 50%, the one which contributes the largest percentage should be counted.

Notes:

This item refers to a person's own main source of income, not that of a partner or of other household members. If it is difficult to determine a 'main source of income' over the reporting period (i.e. it may vary over time) please report the main source of income during the reference week.

Code 7 'Not known' should only be recorded when it has not been possible for the service user or their carer/family/advocate to provide the information (i.e. they have been asked but do not know).

METeOR: [386449](#)

2.3.4.38. Episode - Suicide Referral Flag

Identifies those individuals where a recent history of suicide attempt, or suicide risk, was a factor noted in the referral that underpinned the person's needs for assistance at entry to the episode, as represented by a code.

Field name: suicide_referral_flag

Data type: string

Required: yes

- 1: Yes
- 2: No

Domain:

- 9: Unknown

2.3.4.39. Episode - Tags

List of tags for the episode.

Field name: episode_tags

Data type: string

Required: no

A comma separated list of tags.

Organisations can use this field to tag records in order to partition them as per local requirements.

Notes: Tags can contain lower case letters (or will get lowercased), numbers, dashes, spaces, and ! . Leading and trailing spaces will be stripped. e.g. priority!, nurse required, pending-outcome-1 would all be legitimate.

Tags beginning with an exclamation mark (!) are reserved for future use by the Department. e.g. !reserved, ! reserved, !department-use-only .

2.3.4.40. K5 - Question 1

In the last 4 weeks, about how often did you feel nervous?

Field name: k5_item1

Data type: string

Required: yes

1: None of the time

2: A little of the time

3: Some of the time

Domain: 4: Most of the time

5: All of the time

9: Not stated / Missing

Notes: When reporting total score use '9 - Not stated / Missing'

2.3.4.41. K5 - Question 2

In the last 4 weeks, about how often did you feel without hope?

Field name: k5_item2

Data type: string

Required: yes

1: None of the time

2: A little of the time

3: Some of the time

Domain: 4: Most of the time

5: All of the time

9: Not stated / Missing

Notes: When reporting total score use '9 - Not stated / Missing'

2.3.4.42. K5 - Question 3

In the last 4 weeks, about how often did you feel restless or jumpy?

Field name: k5_item3

Data type: string

Required: yes

1: None of the time

2: A little of the time

3: Some of the time

Domain: 4: Most of the time

5: All of the time

9: Not stated / Missing

Notes: When reporting total score use '9 - Not stated / Missing'

2.3.4.43. K5 - Question 4

In the last 4 weeks, about how often did you feel everything was an effort?

Field name: k5_item4

Data type: string

Required: yes

1: None of the time

2: A little of the time

3: Some of the time

Domain: 4: Most of the time

5: All of the time

9: Not stated / Missing

Notes: When reporting total score use '9 - Not stated / Missing'

2.3.4.44. K5 - Question 5

In the last 4 weeks, about how often did you feel so sad that nothing could cheer you up?

Field name: k5_item5

Data type: string

Required: yes

1: None of the time

2: A little of the time

3: Some of the time

Domain: 4: Most of the time

5: All of the time

9: Not stated / Missing

Notes: When reporting total score use '9 - Not stated / Missing'

2.3.4.45. K5 - Score

The overall K5 score.

Field name: k5_score

Data type: integer

Required: yes

Domain: 5 - 25, 99 = Not stated / Missing

The K5 Total score is based on the sum of K5 item 1 through 5 (range: 5-25).

Notes: The Total score is computed as the sum of the item scores. If any item has not been completed (that is, has not been coded 1, 2, 3, 4, 5), it is excluded from the calculation and not counted as a valid item. If any item is missing, the Total Score is set as missing.

For the Total score, the missing value used should be 99.

When reporting individual item scores use '99 - Not stated / Missing'

2.3.4.46. K5 - Tags

List of tags for the collection occasion.

Field name: k5_tags

Data type: string

Required: no

A comma separated list of tags.

Organisations can use this field to tag records in order to partition them as per local requirements.

Notes: Tags can contain lower case letters (or will get lowercased), numbers, dashes, spaces, and !. Leading and trailing spaces will be stripped. e.g. priority!, nurse required, pending-outcome-1 would all be legitimate.

Tags beginning with an exclamation mark (!) are reserved for future use by the Department. e.g. !reserved, ! reserved, !department-use-only .

2.3.4.47. K10+ - Question 1

In the past 4 weeks, about how often did you feel tired out for no good reason?

Field name: k10p_item1

Data type: string

Required: yes

1: None of the time

2: A little of the time

3: Some of the time

Domain: 4: Most of the time

5: All of the time

9: Not stated / Missing

Notes: When reporting total score use '9 - Not stated / Missing'

2.3.4.48. K10+ - Question 2

In the past 4 weeks, about how often did you feel nervous?

Field name: k10p_item2

Data type: string

Required: yes

1: None of the time

2: A little of the time

3: Some of the time

Domain: 4: Most of the time

5: All of the time

9: Not stated / Missing

Notes: When reporting total score use '9 - Not stated / Missing'

2.3.4.49. K10+ - Question 3

In the past 4 weeks, about how often did you feel so nervous that nothing could calm you down?

Field name: k10p_item3

Data type: string

Required: yes

1: None of the time

2: A little of the time

3: Some of the time

Domain: 4: Most of the time

5: All of the time

9: Not stated / Missing

Notes: When reporting total score use '9 - Not stated / Missing'

2.3.4.50. K10+ - Question 4

In the past 4 weeks, how often did you feel hopeless?

Field name: k10p_item4

Data type: string

Required: yes

1: None of the time

2: A little of the time

3: Some of the time

Domain: 4: Most of the time

5: All of the time

9: Not stated / Missing

Notes: When reporting total score use '9 - Not stated / Missing'

2.3.4.51. K10+ - Question 5

In the past 4 weeks, how often did you feel restless or fidgety?

Field name: k10p_item5

Data type: string

Required: yes

1: None of the time

2: A little of the time

3: Some of the time

Domain: 4: Most of the time

5: All of the time

9: Not stated / Missing

Notes: When reporting total score use '9 - Not stated / Missing'

2.3.4.52. K10+ - Question 6

In the past 4 weeks, how often did you feel so restless you could not sit still?

Field name: k10p_item6

Data type: string

Required: yes

1: None of the time

2: A little of the time

3: Some of the time

Domain: 4: Most of the time

5: All of the time

9: Not stated / Missing

Notes: When reporting total score use '9 - Not stated / Missing'

2.3.4.53. K10+ - Question 7

In the past 4 weeks, how often did you feel depressed?

Field name: k10p_item7

Data type: string

Required: yes

1: None of the time

2: A little of the time

3: Some of the time

Domain: 4: Most of the time

5: All of the time

9: Not stated / Missing

Notes: When reporting total score use '9 - Not stated / Missing'

2.3.4.54. K10+ - Question 8

In the past 4 weeks, how often did you feel that everything was an effort?

Field name: k10p_item8

Data type: string

Required: yes

1: None of the time

2: A little of the time

3: Some of the time

Domain: 4: Most of the time

5: All of the time

9: Not stated / Missing

Notes: When reporting total score use '9 - Not stated / Missing'

2.3.4.55. K10+ - Question 9

In the past 4 weeks, how often did you feel so sad that nothing could cheer you up?

Field name: k10p_item9

Data type: string

Required: yes

1: None of the time

2: A little of the time

3: Some of the time

Domain: 4: Most of the time

5: All of the time

9: Not stated / Missing

Notes: When reporting total score use '9 - Not stated / Missing'

2.3.4.56. K10+ - Question 10

In the past 4 weeks, how often did you feel worthless?

Field name: k10p_item10

Data type: string

Required: yes

1: None of the time

2: A little of the time

3: Some of the time

Domain: 4: Most of the time

5: All of the time

9: Not stated / Missing

Notes: When reporting total score use '9 - Not stated / Missing'

2.3.4.57. K10+ - Question 11

In the past four weeks, how many days were you totally unable to work, study or manage your day to day activities because of these feelings?

Field name: k10p_item11

Data type: integer

Required: yes

Domain: 0 - 28, 99 = Not stated / Missing

Notes: When the client's responses to Q1-10 are all recorded as 1 'None of the time', they are not required to answer questions 11-14. Where this question has not been answered a response of '99 - Not stated / Missing' should be selected.

2.3.4.58. K10+ - Question 12

Aside from those days, in the past four weeks, how many days were you able to work or study or manage your day to day activities, but had to cut down on what you did because of these feelings?

Field name: k10p_item12

Data type: integer

Required: yes

Domain: 0 - 28, 99 = Not stated / Missing

Notes: When the client's responses to Q1-10 are all recorded as 1 'None of the time', they are not required to answer questions 11-14. Where this question has not been answered a response of '99 - Not stated / Missing' should be selected.

2.3.4.59. K10+ - Question 13

In the past four weeks, how many times have you seen a doctor or any other health professional about these feelings?

Field name: k10p_item13

Data type: integer

Required: yes

Domain: 0 - 89, 99 = Not stated / Missing

Notes: When the client's responses to Q1-10 are all recorded as 1 'None of the time', they are not required to answer questions 11-14. Where this question has not been answered a response of '99 - Not stated / Missing' should be selected.

2.3.4.60. K10+ - Question 14

In the past four weeks, how often have physical health problems been the main cause of these feelings?

Field name: k10p_item14

Data type: string

Required: yes

- 1: None of the time
 - 2: A little of the time
 - 3: Some of the time
- Domain:** 4: Most of the time
- 5: All of the time
 - 9: Not stated / Missing

Notes: When the client's responses to Q1-10 are all recorded as 1 'None of the time', they are not required to answer questions 11-14. Where this question has not been answered a response of '99 - Not stated / Missing' should be selected.

2.3.4.61. K10+ - Score

The overall K10 score.

Field name: k10p_score

Data type: integer

Required: yes

Domain: 10 - 50, 99 = Not stated / Missing

The K10 Total score is based on the sum of K10 item 01 through 10 (range: 10-50). Items 11 through 14 are excluded from the total because they are separate measures of disability associated with the problems referred to in the preceding ten items.

Notes: The Total score is computed as the sum of the scores for items 1 to 10. If any item has not been completed (that is, has not been coded 1, 2, 3, 4, 5), it is excluded from the total with the proviso that a completed K10 with more than one missing item is regarded as invalid.

If more than one item of items 1 to 10 are missing, the Total Score is set as missing. Where this is the case, the missing value used should be 99.

When reporting individual item scores use '99 - Not stated / Missing'.

2.3.4.62. K10+ - Tags

List of tags for the collection occasion.

Field name: k10p_tags

Data type: string

Required: no

A comma separated list of tags.

Organisations can use this field to tag records in order to partition them as per local requirements.

Notes: Tags can contain lower case letters (or will get lowercased), numbers, dashes, spaces, and !. Leading and trailing spaces will be stripped. e.g. priority!, nurse required, pending-outcome-1 would all be legitimate.

Tags beginning with an exclamation mark (!) are reserved for future use by the Department. e.g. !reserved, ! reserved, !department-use-only .

2.3.4.63. Organisation Key

A sequence of characters which uniquely identifies the provider organisation to the Primary Health Network.
Assigned by the Primary Health Network.

Field name: organisation_key

Data type: string (2,50)

Required: yes

2.3.4.64. Organisation Path

A sequence of colon separated Organisation Keys that fully specifies the Provider Organisation providing a service to the client.

Field name: organisation_path

Data type: string

Required: yes

A combination of the Primary Health Network's (PHN's) Organisation Key and the Provider Organisation's Organisation Key separated by a colon.

Here is an example organisation structure showing the Organisation Path for each organisation:

Notes:	Organisation Key	Organisation Name	Organisation Type	Parent Organisation	Organisation Path
	PHN999	Test PHN	Primary Health Network	None	PHN999
	PO101	Test Provider Organisation	Private Allied Health Professional Practice	PHN999	PHN999:PO101

2.3.4.65. Practitioner - Aboriginal and Torres Strait Islander Status

Whether a person identifies as being of Aboriginal and/or Torres Strait Islander origin, as represented by a code.

Field name: practitioner_atsi_status

Data type: string

Required: yes

- 1: Aboriginal but not Torres Strait Islander origin
- 2: Torres Strait Islander but not Aboriginal origin
- 3: Both Aboriginal and Torres Strait Islander origin
- 4: Neither Aboriginal or Torres Strait Islander origin
- 9: Not stated/inadequately described

Domain:

Code 9 is not to be available as a valid answer to the questions but is intended for use:

- Primarily when importing data from other data collections that do not contain mappable data.

Notes:

- Where an answer was refused.
- Where the question was not able to be asked prior to completion of assistance because the client was unable to communicate or a person who knows the client was not available.

METeOR: [291036](#)

2.3.4.66. Practitioner - Active

A flag to represent whether a practitioner is actively delivering services. This is a system field that is aimed at helping organisations manage practitioner codes.

Field name: practitioner_active

Data type: string

Required: yes

- 0: Inactive

Domain: 1: Active

2.3.4.67. Practitioner - ATSI Cultural Training

Indicates whether a practitioner has completed a recognised training programme in the delivery of culturally safe services to Aboriginal and Torres Strait Islander peoples.

Field name: atsi_cultural_training

Data type: string

Required: yes

1: Yes

2: No

Domain: 3: Not required

9: Missing / Not recorded

This item is reported by the practitioner and applies to service providers who are either:

- not of Aboriginal or Torres Strait Islander status; or
- are not employed by an Aboriginal Community Controlled Health Service.

1 - Yes

The practitioner has:

- undertaken specific training in the delivery of culturally appropriate mental health /health services for Aboriginal and Torres Strait Islander peoples. As a guide, recognised training programs include those endorsed by the Australian Indigenous Psychologists' Association (AIPA) or similar organisation; or

Notes:

- undertaken local cultural awareness training in the community in which they are practising, as delivered or endorsed by the elders of that community or the local Aboriginal Community Controlled Health Service.

2 - No

The practitioner has not met the requirements stated above.

3 - Not required

This option is reserved only for practitioners who are of Aboriginal and Torres Strait Islander descent, or employed by an Aboriginal Community Controlled Health Service.

4 - Missing/Not recorded

This is a system code for missing data and not a valid response option for practitioners.

2.3.4.68. Practitioner - Category

The type or category of the practitioner, as represented by a code.

Field name: practitioner_category

Data type: string

Required: yes

- 1: Clinical Psychologist
- 2: General Psychologist
- 3: Social Worker
- 4: Occupational Therapist
- 5: Mental Health Nurse
- 6: Aboriginal and Torres Strait Islander Health/Mental Health Worker

Domain: 7: Low Intensity Mental Health Worker

- 8: General Practitioner
- 9: Psychiatrist
- 10: Other Medical
- 11: Other

99: Not stated

2.3.4.69. Practitioner - Gender

The term 'gender' refers to the way in which a person identifies their masculine or feminine characteristics. A persons gender relates to their deeply held internal and individual sense of gender and is not always exclusively male or female. It may or may not correspond to their sex assigned at birth.

Field name: practitioner_gender

Data type: string

Required: yes

- 0: Not stated/Inadequately described
- 1: Male

Domain: 2: Female

- 3: Other

ABS:

<http://www.abs.gov.au/ausstats/abs@.nsf/Latestproducts/1200.0.55.012Main%20Features12016?opendocument&tabname=Summary&prodno=1200.0.55.012&issue=2016-06&producttype=Table>

2.3.4.70. Practitioner Key

A unique identifier for a practitioner within the responsible provider organisation. Assigned by either the PHN or provider organisation depending on local procedures.

Field name: practitioner_key

Data type: string (2,50)

Required: yes

2.3.4.71. Practitioner - Tags

List of tags for the practitioner.

Field name: practitioner_tags

Data type: string

Required: no

A comma separated list of tags.

Organisations can use this field to tag records in order to partition them as per local requirements.

Notes: Tags can contain lower case letters (or will get lowercased), numbers, dashes, spaces, and ! . Leading and trailing spaces will be stripped. e.g. priority!, nurse required, pending-outcome-1 would all be legitimate.

Tags beginning with an exclamation mark (!) are reserved for future use by the Department. e.g. !reserved, ! reserved, !department-use-only .

2.3.4.72. Practitioner - Year of Birth

The year the practitioner was born.

Field name: practitioner_year_of_birth

Data type: gYear

Required: yes

Domain: gYear

- The year of birth must not be in the future.
- The year of birth must be after 1900.
- If the year of birth is unknown, the following approaches should be used:
 - If the age of the practitioner is known, the age should be used to derive the year of birth
 - If the age of the practitioner is unknown, an estimated age of the practitioner should be used to estimate a year of birth
 - If the date of birth is totally unknown, use 9999.

Notes:

2.3.4.73. Provider Organisation - ABN

The Australian Business Number of the provider organisation.

Field name: organisation_abn

Data type: string (11)

Required: yes

2.3.4.74. Provider Organisation - Legal Name

The legal name of the provider organisation.

Field name: organisation_legal_name

Data type: string

Required: no

2.3.4.75. Provider Organisation - Name

The name of the provider organisation.

Field name: organisation_name

Data type: string (2,100)

Required: yes

2.3.4.76. Provider Organisation - State

The state that the provider organisation operates in.

Field name: organisation_state

Data type: string

Required: yes

1: New South Wales

2: Victoria

3: Queensland

4: South Australia

5: Western Australia

Domain:

6: Tasmania

7: Northern Territory

8: Australian Capital Territory

9: Other Territories

- Name is taken from Australian Statistical Geography Standard (ASGS) July 2011.

Notes:

- Code is from Meteor with the addition of code for Other Territories.

METeOR: [613718](#)

2.3.4.77. Provider Organisation - Status

A flag to represent whether a provider organisation is actively delivering services.

Field name: organisation_status

Data type: string

Required: yes

0: Inactive

Domain: 1: Active

2.3.4.78. Provider Organisation - Tags

List of tags for the provider organisation.

Field name: organisation_tags

Data type: string

Required: no

A comma separated list of tags.

Organisations can use this field to tag records in order to partition them as per local requirements.

Notes: Tags can contain lower case letters (or will get lowercased), numbers, dashes, spaces, and !.

Leading and trailing spaces will be stripped. e.g. priority!, nurse required, pending-outcome-1 would all be legitimate.

Tags beginning with an exclamation mark (!) are reserved for future use by the Department. e.g.

!reserved, ! reserved, !department-use-only .

2.3.4.79. Provider Organisation - Type

The category that best describes the provider organisation.

Field name: organisation_type

Data type: string

Required: yes

- 1: Private Allied Health Professional Practice
- 2: Private Psychiatry Practice
- 3: General Medical Practice
- 4: Private Hospital
- 5: Headspace Centre
- 6: Early Youth Psychosis Centre
- 7: Community-managed Community Support Organisation
- 8: Aboriginal Health/Medical Service
- 9: State/Territory Health Service Organisation
- 10: Drug and/or Alcohol Service
- 11: Primary Health Network
- 12: Medicare Local
- 13: Division of General Practice
- 98: Other
- 99: Missing

Domain:

1 - Private Allied Health Professional Practice

The provider organisation is a group of single- or multi-discipline allied health practitioners operating as private service providers. This includes both group and solo practitioner entities.

2 - Private Psychiatry practice

The provider organisation is a Private Psychiatry practice. This includes both group and solo practitioner entities.

3 - General Medical Practice

The provider organisation is a General Medical Practice. This includes both group and solo practitioner entities.

4 - Private Hospital

The provider organisation is a private hospital. This includes for-profit and not-for-profit hospitals.

5 - Headspace Centre

The provider organisation is a Headspace centre, delivering services funded by the PHN.

Note: Headspace and Early Psychosis Youth Centres currently collect and report a standardised dataset to headsphere National Office. Pending the future of these arrangements, reporting of the PMHC minimum data set is not required by those organisations previously funded through headsphere National Office that transitioned to PHNs. Where new or additional services are commissioned by PHNs and delivered through existing Headspace or Early Psychosis Youth Centres, local decisions will be required as to whether these services can be captured through headsphere National Office system or are better reported through the PMHC MDS.

6 - Early Youth Psychosis Centre

Notes: The provider organisation is a Early Youth Psychosis Centre, delivering services funded by the PHN.

Note: See Note above re Headspace.

7 - Community-managed Community Support Organisation

The provider organisation is a community-managed (non-government) organisation that primarily delivers disability-related or social support services.

8 - Aboriginal Health/Medical Service

The provider organisation is an Aboriginal or Torres Strait Islander-controlled health service organisation.

9 - State/Territory Health Service Organisation

The provider organisation is a health service entity principally funded by a state or territory government. This includes all services delivered through Local Hospital Networks (variously named across jurisdictions).

10 - Drug and/or Alcohol Service Organisation

The provider organisation is an organisation that provides specialised drug and alcohol treatment services. The organisation may be operating in the government or non-government sector, and where the latter, may be for-profit or not-for-profit.

11 - Primary Health Network

The PHN is the provider organisation and employs the service delivery practitioners. This may occur during the transition period as the PHN moves to a full commissioning role, or in cases of market failure where there is no option to commission external providers.

12 - Medicare Local

The provider organisation is a former Medicare Local entity.

13 - Division of General Practice

The provider organisation is a former Division of General Practice entity.

98 - Other

The provider organisation cannot be described by any of the available options.

2.3.4.80. SDQ Collection Occasion - Version

The version of the SDQ collected.

Field name: sdq_version

Data type: string

Required: yes

PC101: Parent Report Measure 4-10 yrs, Baseline version, Australian Version 1

PC201: Parent Report Measure 4-10 yrs, Follow Up version, Australian Version 1

PY101: Parent Report Measure 11-17 yrs, Baseline version, Australian Version 1

Domain: **PY201:** Parent Report Measure 11-17 yrs, Follow Up version, Australian Version 1

YR101: Self report Version, 11-17 years, Baseline version, Australian Version 1

YR201: Self report Version, 11-17 years, Follow Up version, Australian Version 1

Notes: Domain values align with those collected in the NOCC dataset as defined at
<https://webval.validator.com.au/spec/NOCC/current/SDQ/SDQVer>

2.3.4.81. SDQ - Conduct Problem Scale

Field name: sdq_conduct_problem

Data type: integer

Required: yes

Domain: 0 - 10, 99 = Not stated / Missing

See [SDQ items and Scale Summary scores](#) for instructions on scoring the Conduct Problem Scale.

Notes:

When reporting individual item scores use '99 - Not stated / Missing'.

2.3.4.82. SDQ - Emotional Symptoms Scale

Field name: sdq_emotional_symptoms

Data type: integer

Required: yes

Domain: 0 - 10, 99 = Not stated / Missing

See [SDQ items and Scale Summary scores](#) for instructions on scoring the Emotional Symptoms Scale.

Notes:

When reporting individual item scores use '99 - Not stated / Missing'.

2.3.4.83. SDQ - Hyperactivity Scale

Field name: sdq_hyperactivity

Data type: integer

Required: yes

Domain: 0 - 10, 99 = Not stated / Missing

See [SDQ items and Scale Summary scores](#) for instructions on scoring the Hyperactivity Scale.

Notes:

When reporting individual item scores use '99 - Not stated / Missing'.

2.3.4.84. SDQ - Impact Score

Field name: sdq_impact

Data type: integer

Required: yes

Domain: 0 - 10, 99 = Not stated / Missing

See [SDQ items and Scale Summary scores](#) for instructions on scoring the Impact Score.

Notes:

When reporting individual item scores use '99 - Not stated / Missing'.

2.3.4.85. SDQ - Peer Problem Scale

Field name: sdq_peer_problem

Data type: integer

Required: yes

Domain: 0 - 10, 99 = Not stated / Missing

See [SDQ items and Scale Summary scores](#) for instructions on scoring the Peer Problem Scale.

Notes:

When reporting individual item scores use '99 - Not stated / Missing'.

2.3.4.86. SDQ - Prosocial Scale

Field name: sdq_prosocial

Data type: integer

Required: yes

Domain: 0 - 10, 99 = Not stated / Missing

See [SDQ items and Scale Summary scores](#) for instructions on scoring the Prosocial Scale.

Notes:

When reporting individual item scores use '99 - Not stated / Missing'.

2.3.4.87. SDQ - Question 1

Parent Report: Considerate of other people's feelings.

Youth Self Report: I try to be nice to other people. I care about their feelings.

Field name: sdq_item1

Data type: string

Required: yes

0: Not True

1: Somewhat True

2: Certainly True

Domain:

7: Unable to rate (insufficient information)

9: Not stated / Missing

Required Versions: All

Notes:

When reporting subscale and total scores use '9 - Not stated / Missing'.

2.3.4.88. SDQ - Question 2

Parent Report: Restless, overactive, cannot stay still for long.

Youth Self Report: I am restless, I cannot stay still for long.

Field name: sdq_item2

Data type: string

Required: yes

0: Not True

1: Somewhat True

2: Certainly True

Domain:

7: Unable to rate (insufficient information)

9: Not stated / Missing

Required Versions: All

Notes:

When reporting subscale and total scores use '9 - Not stated / Missing'.

2.3.4.89. SDQ - Question 3

Parent Report: Often complains of headaches, stomach-aches or sickness.

Youth Self Report: I get a lot of headaches, stomach-aches or sickness.

Field name: sdq_item3

Data type: string

Required: yes

0: Not True

1: Somewhat True

2: Certainly True

Domain:

7: Unable to rate (insufficient information)

9: Not stated / Missing

Required Versions: All

Notes:

When reporting subscale and total scores use '9 - Not stated / Missing'.

2.3.4.90. SDQ - Question 4

Parent Report: Shares readily with other children {for example toys, treats, pencils} / young people {for example CDs, games, food}.

Youth Self Report: I usually share with others, for examples CDs, games, food.

Field name: sdq_item4

Data type: string

Required: yes

0: Not True

1: Somewhat True

2: Certainly True

Domain:

7: Unable to rate (insufficient information)

9: Not stated / Missing

Required Versions: All

Notes:

When reporting subscale and total scores use '9 - Not stated / Missing'.

2.3.4.91. SDQ - Question 5

Parent Report: Often loses temper.

Youth Self Report: I get very angry and often lose my temper.

Field name: sdq_item5

Notes:

When reporting subscale and total scores use '9 - Not stated / Missing'.

2.3.4.120. SDQ - Question 34

Parent Report: Since coming to the services, are your child's problems:

Youth Self Report: 'Since coming to the service, are your problems:

Field name: sdq_item34

Data type: string

Required: yes

- 0: Much worse
 - 1: A bit worse
 - 2: About the same
 - 3: A bit better
- Domain:**
- 4: Much better
 - 7: Unable to rate (insufficient information)
 - 8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)
 - 9: Not stated / Missing

Required Versions:

- PC201

- Notes:**
- PY201
 - YR201

When reporting subscale and total scores use '9 - Not stated / Missing'.

2.3.4.121. SDQ - Question 35

Has coming to the service been helpful in other ways eg. providing information or making the problems bearable?

Field name: sdq_item35

Data type: string

Required: yes

- 0: Not at all
 - 1: A little
 - 2: A medium amount
 - 3: A great deal
- Domain:**
- 7: Unable to rate (insufficient information)
 - 8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)
 - 9: Not stated / Missing

Required Versions:

- PC201

Notes:

- PY201
- YR201

When reporting subscale and total scores use '9 - Not stated / Missing'.

2.3.4.122. SDQ - Question 36

Over the last 6 months have your child's teachers complained of fidgetiness, restlessness or overactivity?

Field name: sdq_item36

Data type: string

Required: yes

0: No

1: A little

2: A lot

Domain: 7: Unable to rate (insufficient information)

8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)

9: Not stated / Missing

Required Versions:

- Notes:
- PC101
 - PY101

When reporting subscale and total scores use '9 - Not stated / Missing'.

2.3.4.123. SDQ - Question 37

Over the last 6 months have your child's teachers complained of poor concentration or being easily distracted?

Field name: sdq_item37

Data type: string

Required: yes

0: No

1: A little

2: A lot

Domain: 7: Unable to rate (insufficient information)

8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)

9: Not stated / Missing

Required Versions:

• PC101

Notes: • PY101

When reporting subscale and total scores use '9 - Not stated / Missing'.

2.3.4.124. SDQ - Question 38

Over the last 6 months have your child's teachers complained of acting without thinking, frequently butting in, or not waiting for his or her turn?

Field name: sdq_item38

Data type: string

Required: yes

0: No

1: A little

2: A lot

Domain: 7: Unable to rate (insufficient information)

8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)

9: Not stated / Missing

Required Versions:

• PC101

Notes: • PY101

When reporting subscale and total scores use '9 - Not stated / Missing'.

2.3.4.125. SDQ - Question 39

Does your family complain about you having problems with overactivity or poor concentration?

Field name: sdq_item39

Data type: string

Required: yes

0: No

1: A little

2: A lot

Domain: 7: Unable to rate (insufficient information)

8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)

9: Not stated / Missing

Required Versions:

Notes: • YR101

When reporting subscale and total scores use '9 - Not stated / Missing'.

2.3.4.126. SDQ - Question 40

Do your teachers complain about you having problems with overactivity or poor concentration?

Field name: sdq_item40

Data type: string

Required: yes

0: No

1: A little

2: A lot

Domain: 7: Unable to rate (insufficient information)

8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)

9: Not stated / Missing

Required Versions:

Notes: • YR101

When reporting subscale and total scores use '9 - Not stated / Missing'.

2.3.4.127. SDQ - Question 41

Does your family complain about you being awkward or troublesome?

Field name: sdq_item41

Data type: string

Required: yes

0: No

1: A little

2: A lot

Domain: 7: Unable to rate (insufficient information)

8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)

9: Not stated / Missing

Required Versions:

Notes: • YR101

When reporting subscale and total scores use '9 - Not stated / Missing'.

2.3.4.128. SDQ - Question 42

Do your teachers complain about you being awkward or troublesome?

Field name: sdq_item42

Data type: string

Required: yes

0: No

1: A little

2: A lot

Domain: 7: Unable to rate (insufficient information)

8: Not applicable (collection not required - item not included in the version collected, or SDQ Item 26 = 0)

9: Not stated / Missing

Required Versions:

Notes: • YR101

When reporting subscale and total scores use '9 - Not stated / Missing'.

2.3.4.129. SDQ - Tags

List of tags for the collection occasion.

Field name: sdq_tags

Data type: string

Required: no

A comma separated list of tags.

Organisations can use this field to tag records in order to partition them as per local requirements.

Notes: Tags can contain lower case letters (or will get lowercased), numbers, dashes, spaces, and !. Leading and trailing spaces will be stripped. e.g. priority!, nurse required, pending-outcome-1 would all be legitimate.

Tags beginning with an exclamation mark (!) are reserved for future use by the Department. e.g. !reserved, ! reserved, !department-use-only .

2.3.4.130. SDQ - Total Difficulties Score

Field name: sdq_total

Data type: integer

Required: yes

Domain: 0 - 40, 99 = Not stated / Missing

See [SDQ items and Scale Summary scores](#) for instructions on scoring the Total Difficulties Score.

Notes:

When reporting individual item scores use '99 - Not stated / Missing'.

2.3.4.131. Service Contact - Client Participation Indicator

An indicator of whether the client participated, or intended to participate, in the service contact, as represented by a code.

Field name: service_contact_participation_indicator

Data type: string

Required: yes

1: Yes

Domain: 2: No

Service contacts are not restricted to in-person communication but can include telephone, video link or other forms of direct communication.

1 - Yes

This code is to be used for service contacts between a mental health service provider and the patient/client in whose clinical record the service contact would normally warrant a dated entry, where the patient/client is participating.

Notes: 2 - No

This code is to be used for service contacts between a mental health service provider and a third party(ies) where the patient/client, in whose clinical record the service contact would normally warrant a dated entry, is not participating.

Note: Where a client intended to participate in a service contact but failed to attend, [Service Contact - Client Participation Indicator](#) should be recorded as '1: Yes' and [Service Contact - No Show](#) should be recorded as '1: Yes'.

METeOR: 494341

2.3.4.132. Service Contact - Copayment

The co-payment is the amount paid by the client per session.

Field name: service_contact_copayment

Data type: number

Required: yes

Domain: 0 - 999999.99

Up to 6 digits before the decimal point; up to 2 digits after the decimal point.

Notes: The co-payment is the amount paid by the client per service contact, not the fee paid by the project to the practitioner or the fee paid by the project to the practitioner plus the client contribution. In many cases, there will not be a co-payment charged and therefore zero should be entered. Where a co-payment is charged it should be minimal and based on an individual's capacity to pay.

2.3.4.133. Service Contact - Date

The date of each mental health service contact between a health service provider and patient/client.

Field name: service_contact_date

Data type: date

Required: yes

For Date fields, data must be recorded in compliance with the standard format used across the National Health Data Dictionary; specifically, dates must be of fixed 8 column width in the format DDMMYYYY, with leading zeros used when necessary to pad out a value. For instance, 13th March 2008 would appear as 13032008.

Notes:

- The service contact date must not be before 1st January 2014.
- The service contact date must not be in the future.

METeOR: [494356](#)

2.3.4.134. Service Contact - Duration

The time from the start to finish of a service contact.

Field name: service_contact_duration

Data type: string

Required: yes

- 0: No contact took place
 - 1: 1-15 mins
 - 2: 16-30 mins
 - 3: 31-45 mins
 - 4: 46-60 mins
- Domain:**
- 5: 61-75 mins
 - 6: 76-90 mins
 - 7: 91-105 mins
 - 8: 106-120 mins
 - 9: over 120 mins

Notes:

For group sessions the time for client spent in the session is recorded for each client, regardless of the number of clients or third parties participating or the number of service providers providing the service. Writing up details of service contacts is not to be reported as part of the duration, except if during or contiguous with the period of client or third party participation. Travel to or from the location at which the service is provided, for example to or from outreach facilities or private homes, is not to be reported as part of the duration of the service contact.

0 - No contact took place

Only use this code where the service contact is recorded as a no show.

2.3.4.135. Service Contact - Final

An indication of whether the Service Contact is the final for the current Episode of Care

Field name: service_contact_final

Data type: string

Required: yes

- 1: No further services are planned for the client in the current episode
- 2: Further services are planned for the client in the current episode

Domain:

- 3: Not known at this stage

Service providers should report this item on the basis of future planned or scheduled contacts with the client. Where this item is recorded as 1 (No further services planned), the episode should be recorded as completed by:

- Notes:**
- the date of the final Service Contact should be recorded as the Episode End Date
 - the Episode Completion Status field should be recorded as 'Treatment concluded.'

Note that no further Service Contacts can be recorded against an episode once it is marked as completed. Where an episode has been marked as completed prematurely, the Episode End Date can be manually corrected to allow additional activity to be recorded.

2.3.4.136. Service Contact - Interpreter Used

Whether an interpreter service was used during the Service Contact

Field name: service_contact_interpreter

Data type: string

Required: yes

1: Yes

2: No

Domain:

9: Not stated

Interpreter services includes verbal language, non-verbal language and languages other than English.

1 - Yes

Use this code where interpreter services were used during the Service Contact. Use of interpreter services for any form of sign language or other forms of non-verbal communication should be coded as Yes.

Notes:

2 - No

Use this code where interpreter services were not used during the Service Contact.

9 - Not stated

Indicates that the item was not collected. This item should not appear as an option for clinicians, it is for administrative use only.

2.3.4.137. Service Contact - Modality

How the service contact was delivered, as represented by a code.

Field name: service_contact_modality

Data type: string

Required: yes

0: No contact took place

1: Face to Face

2: Telephone

Domain:

3: Video

4: Internet-based

0 - No contact took place

Only use this code where the service contact is recorded as a no show.

1 - Face to Face

- If 'Face to Face' is selected, a value other than 'Not applicable' must be selected for Service Contact Venue
- If 'Face to Face' is selected a valid Australian postcode must be entered for Service Contact Postcode. The unknown postcode is not valid.

Notes:

4 - Internet-based

Includes email communication, that would normally warrant a dated entry in the clinical record of the client, involving a third party, such as a carer or family member, and/or other professional or mental health worker, or other service provider.

Note: If Service Contact Modality is not 'Face to Face' the postcode must be entered as unknown 9999.

2.3.4.138. Service Contact - No Show

Where an appointment was made for an intended participant(s), but the intended participant(s) failed to attend the appointment, as represented by a code.

Field name: service_contact_no_show

Data type: string

Required: yes

1: Yes

Domain: 2: No

1 - Yes

The intended participant(s) failed to attend the appointment.

Notes: 2 - No

The intended participant(s) attended the appointment.

2.3.4.139. Service Contact - Participants

An indication of who participated in the Service Contact.

Field name: service_contact_participants

Data type: string

Required: yes

- 1: Individual client
- 2: Client group
- 3: Family / Client Support Network

Domain:

- 4: Other health professional or service provider
- 5: Other
- 9: Not stated

1 - Individual

Code applies for Service Contacts delivered individually to a single client without third party participants. Please refer to the Note below.

2 - Client group

Code applies for Service Contacts delivered on a group basis to two or more clients.

3 - Family / Client Support Network

Code applies to Service Contacts delivered to the family/social support persons of the client, with or without the participation of the client.

4 - Other health professional or service provider

Notes: Code applies for Service Contacts that involve another health professional or service provider (in addition to the Practitioner), with or without the participation of the client.

5 - Other

Code applies to Service Contacts delivered to other third parties (e.g., teachers, employer), with or without the participation of the client.

Note: This item interacts with [Service Contact - Client Participation Indicator](#). Where [Service Contact - Participants](#) has a value of '1: Individual', [Service Contact - Client Participation Indicator](#) must have a value of '1: Yes'. [Service Contact - No Show](#) is used to record if the patient failed to attend the appointment.

2.3.4.140. Service Contact - Postcode

The Australian postcode where the service contact took place.

Field name: service_contact_postcode

Data type: string

Required: yes

A valid Australian postcode or 9999 if the postcode is unknown. The full list of Australian Postcodes can be found at [Australia Post](#).

- Notes:**
- If Service Contact Modality is not 'Face to Face' enter 9999
 - If Service Contact Modality is 'Face to Face' a valid Australian postcode must be entered
 - As of 1 November 2016, PMHC MDS currently validates that postcodes are in the range 0200-0299 or 0800-9999.

METeOR: [429894](#)

2.3.4.141. Service Contact - Tags

List of tags for the service contact.

Field name: service_contact_tags

Data type: string

Required: no

A comma separated list of tags.

Organisations can use this field to tag records in order to partition them as per local requirements.

Notes: Tags can contain lower case letters (or will get lowercased), numbers, dashes, spaces, and !. Leading and trailing spaces will be stripped. e.g. priority!, nurse required, pending-outcome-1 would all be legitimate.

Tags beginning with an exclamation mark (!) are reserved for future use by the Department. e.g. !reserved, ! reserved, !department-use-only .

2.3.4.142. Service Contact - Type

The main type of service provided in the service contact, as represented by the service type that accounted for most provider time.

Field name: service_contact_type

Data type: string

Required: yes

- 0: No contact took place
 - 1: Assessment
 - 2: Structured psychological intervention
 - 3: Other psychological intervention
 - 4: Clinical care coordination/liaison
- Domain:**
- 5: Clinical nursing services
 - 6: Child or youth specific assistance NEC
 - 7: Suicide prevention specific assistance NEC
 - 8: Cultural specific assistance NEC
 - 98: ATAPS

Describes the main type of service delivered in the contact, selected from a defined list of categories. Where more than service type was provided select that which accounted for most provider time. Service providers are required to report on Service Type for all Service Contacts.

Note: NEC is used for 'Not Elsewhere Classified'. For these records, only use these service types if they cannot be classified by any of the other service options.

0 - No contact took place

Only use this code where the service contact is recorded as a no show.

1 - Assessment

Determination of a person's mental health status and need for mental health services, made by a suitably trained mental health professional, based on the collection and evaluation of data obtained through interview and observation, of a person's history and presenting problem(s). Assessment may include consultation with the person's family and concludes with formation of problems/issues, documentation of a preliminary diagnosis, and a treatment plan.

2 - Structured psychological intervention

Those interventions which include a structured interaction between a client and a service provider using a recognised, psychological method, for example, cognitive behavioural techniques, family therapy or psycho education counselling. These are recognised, structured or published techniques for the treatment of mental ill-health. Structured psychological interventions are designed to alleviate psychological distress or emotional disturbance, change maladaptive behaviour and foster mental health. Structured psychological therapies can be delivered on either an individual or group basis, typically in an office or community setting. They may be delivered by trained mental health professionals or other individuals with appropriate competencies but who do not meet the requirements for registration, credentialing or recognition as a mental health professional. Structured Psychological Therapies include but are not limited to:

- Psycho-education (including motivational interviewing)
- Cognitive-behavioural therapies
- Relaxation strategies
- Skills training
- Interpersonal therapy

3 - Other psychological intervention

Psychological interventions that do not meet criteria for structured psychological intervention.

4 - Clinical care coordination/liaison

Activities focused on working in partnership and liaison with other health care and service providers and other individuals to coordinate and integrate service delivery to the client with the aim of improving their clinical outcomes. Consultation and liaison may occur with primary health care providers, acute health, emergency services, rehabilitation and support services, family, friends, other support people and carers and other agencies that have some level of responsibility for the client's treatment and/or well being.

5 - Clinical nursing services

Services delivered by mental health nurses that cannot be described elsewhere. Typically, these aim to provide clinical support to clients to effectively manage their symptoms and avoid unnecessary hospitalisation. Clinical nursing services include:

- monitoring a client's mental state;
- liaising closely with family and carers as appropriate;

- administering and monitoring compliance with medication;
- providing information on physical health care, as required and, where appropriate, assist in addressing the physical health inequities of people with mental illness; and
- improving links to other health professionals/clinical service providers.

6 - Child or youth-specific assistance NEC

Services delivered to, or on behalf, of a child or young person that cannot be described elsewhere. These can include, for example, working with a child's teacher to provide advice on assisting the child in their educational environment; working with a young person's employer to assist the young person to their work environment.

Note: This code should only be used for Service Contacts that cannot be described by any other Service Type. It is expected that the majority of Service Contacts delivered to children and young people can be assigned to other categories.

7 - Suicide prevention specific assistance NEC

Services delivered to, or on behalf, of a client who presents with risk of suicide that cannot be described elsewhere. These can include, for example, working with the person's employers to advise on changes in the workplace; working with a young person's teacher to assist the child in their school environment; or working with relevant community-based groups to assist the client to participate in their activities.

Note: This code should only be used for Service Contacts that cannot be described by any other Service Type. It is expected that the majority of Service Contacts delivered to clients who have a risk of suicide can be assigned to other categories.

8 - Cultural specific assistance NEC

Culturally appropriate services delivered to, or on behalf, of an Aboriginal or Torres Strait Islander client that cannot be described elsewhere. These can include, for example, working with the client's community support network including family and carers, men's and women's groups, traditional healers, interpreters and social and emotional wellbeing counsellors.

Note: This code should only be used for Service Contacts that cannot be described by any other Service Type. It is expected that the majority of Service Contacts (see domains below) delivered to Aboriginal or Torres Strait Islander clients can be assigned to other categories.

98 - ATAPS

Services delivered as part of ATAPS funded referrals that are recorded and/or migrated into the PMHC MDS.

Note: This code should only be used for Service Contacts that are migrated from ATAPS MDS sources that cannot be described by any other Service Type. It is expected that the majority of Service Contacts delivered to clients from 1st July, 2017 can be assigned to other categories.

This response will not be allowed on service contacts delivered after 30 June 2018. (All ATAPS referrals should have concluded by that date).

This response will only be allowed on service contacts with the !ATAPS flag.

2.3.4.143. Service Contact - Venue

Where the service contact was delivered, as represented by a code.

Field name: service_contact_venue

Data type: string

Required: yes

- 1: Client's Home
- 2: Service provider's office
- 3: GP Practice
- 4: Other medical practice
- 5: Headspace Centre
- 6: Other primary care setting
- 7: Public or private hospital
- Domain:**
- 8: Aged care centre
- 9: School or other educational centre
- 10: Client's Workplace
- 11: Other
- 98: Not applicable (Service Contact Modality is not face to face)
- 99: Not stated

Values other than 'Not applicable' only to be specified when Service Contact Modality is 'Face to Face'.

Notes:

Note that 'Other primary care setting' is suitable for primary care settings such as community health centres.

2.3.4.144. Service Contact Key

This is a number or code assigned to each service contact. The Service Contact Key is unique and stable for each service contact at the level of the organisation.

Field name: service_contact_key

Data type: string (2,50)

Required: yes

2.3.5. Download Specification Files

Available for software developers designing extracts for the PMHC MDS, please click the link below to download the PMHC MDS Specification files:

- [Specification zip](#)

2.4. Upload specification

2.4.1. File types

Files will be accepted in the following types:

- Comma Separated Values (CSV)
- Excel (XLSX)

2.4.1.1. Comma Separated Values (CSV)

The CSV files must conform to [RFC 4180](#).

In addition, CSV files must be created using UTF-8 character encoding.

CSV files must have the file extension .csv

Multiple CSV files must be uploaded - one CSV file for each format described [below](#).

The CSV files must be compressed into a single file by zipping before upload. The filename of the zip file doesn't matter as long as it has the file extension .zip

2.4.1.2. Excel (XLSX)

Excel files must be in XLSX format. The following versions of Excel support this format:

- Excel 2007 (v12.0)
- Excel 2010 (v14.0)
- Excel 2013 (v15.0)
- Excel 2016 (v16.0)

One XLSX file must be uploaded containing multiple worksheets - one worksheet for each format described [below](#).

When saving your file, please choose the filetype 'Excel Workbook (.xlsx)'.

The filename of the Excel file doesn't matter as long as it has the file extension .xlsx

2.4.2. Files or worksheets to upload

The following files/worksheets can be uploaded to the PMHC MDS:

Table 2.9 Summary of files to upload

File Type	CSV filename	Excel worksheet name	Required
Client	clients.csv	Clients	Required
Episodes	episodes.csv	Episodes	Required
Service Contacts	service-contacts.csv	Service Contacts	Required
K10+ Collection Occasions	k10p.csv	K10+	Required
K5 Collection Occasions	k5.csv	K5	Required
SDQ Collection Occasions	sdq.csv	SDQ	Required
Practitioners	practitioners.csv	Practitioners	Required for first upload and when practitioner information changes. Optional otherwise
Organisation	organisations.csv	Organisations	Optional

Each of the example files assumes the following organisation structure:

Organisation Key	Organisation Name	Organisation Type	Parent Organisation
PHN999	Test PHN	Primary Health Network	None
NFP01	Test Provider Organisation	Private Allied Health Professional Practice	PHN999

2.4.3. File format

The first row in each file/worksheet must include the following columns:

Version	1.0
---------	-----

The second row must contain the column headings as defined for each file type. The third and subsequent rows must contain the data.

Data elements for each file/worksheet are defined at [Record formats](#).

Each item is a column in the file/worksheet. The 'Field Name' must be used for the column headings. The columns must be kept in the same order.

All files must be internally consistent. An example of what this means is that for every row in the episode file/worksheet, there must be a corresponding client in the client file/worksheet.

It also means that for every episode included in an upload file, you must include ALL service contacts and measures for that episode.

2.4.3.1. Client format

The client file/worksheet is required to be uploaded each time.

Data elements for the client upload file/worksheet are defined at [Client](#).

Example client data:

- [CSV client file](#).
- [XLSX client worksheet](#).

2.4.3.2. Episode file format

The episode file/worksheet is required to be uploaded each time.

Data elements for the episode upload file/worksheet are defined at [Episode](#).

Example episode data:

- [CSV episode file](#).
- [XLSX episode worksheet](#).

2.4.3.3. Service Contact file format

The service contact file/worksheet is required to be uploaded each time.

Data elements for the service contact upload file/worksheet are defined at [Service Contact](#).

Example service contact data:

- [CSV service contact file](#).
- [XLSX service contact worksheet](#).

2.4.3.4. K10+ Collection Occasion file format

The K10+ file/worksheet is required to be uploaded each time.

Data elements for the K10+ collection occasion upload file/worksheet are defined at [K10+](#).

Example K10+ data:

- [CSV K10+ file](#).
- [XLSX K10+ worksheet](#).

2.4.3.5. K5 Collection Occasion file format

The K5 file/worksheet is required to be uploaded each time.

Data elements for the K5 collection occasion upload file/worksheet are defined at [K5](#).

Example K5 data:

- [CSV K5 file](#).
- [XLSX K5 worksheet](#).

2.4.3.6. SDQ Collection Occasion file format

The SDQ file/worksheet is required to be uploaded each time.

Data elements for the SDQ collection occasion upload file/worksheet are defined at [SDQ](#).

Example SDQ data:

- [CSV SDQ file](#).
- [XLSX SDQ worksheet](#).

2.4.3.7. Practitioner file format

The practitioner file/worksheet is required for the first upload and if there is a change in practitioners. It is optional otherwise. There is no harm in including it in every upload.

Data elements for the practitioner upload file/worksheet are defined at [Practitioner](#).

Example practitioner data:

- [CSV practitioner file](#).
- [XLSX practitioner worksheet](#).

2.4.3.8. Organisation file format

This file is for PHN use only. The organisation file/worksheet is optional. It can be included to upload Provider Organisations in bulk or if there is a change in Provider Organisation details. There is no harm in including it in every upload.

Data elements for the Provider Organisation upload file/worksheet are defined at [Provider Organisation](#).

Example organisation data:

- [CSV organisation file](#).
- [XLSX organisation worksheet](#).

2.4.3.9. Deleting records

- Records of the following type can be deleted via upload:

- Client
- Episode
- Service Contact
- K10+
- K5
- SDQ
- Practitioner

Organisation records *cannot* be deleted via upload. Please email support@pmhc-mds.com if you need to delete an organisation.

- An extra optional “delete” column can be added to each of the supported upload files/worksheets.
- If included, this column must be the third column in each file, after the organisation path and the record’s entity key.
- To delete a record, include its organisation path and its entity key, leave all other fields blank and put “delete” in the “delete” column. Please note that case is important. “DELETE” will not be accepted.
- Marking a record as deleted will require all child records of that record also to be marked for deletion. For example, marking a client as deleted will require all episodes, service contacts and collection occasions of that client to be marked for deletion.
- While deletions can be included in the same upload as insertions/updates, we recommend that you include all deletions in a separate upload that is uploaded before the insertions/updates.

Example files showing how to delete via upload:

- [XLSX file containing all the worksheets](#).
- [CSV delete client file](#).
- [CSV delete episode file](#).
- [CSV delete service contact file](#).
- [CSV delete K10+ file](#).
- [CSV detete K5 file](#).
- [CSV delete SDQ file](#).
- [CSV delete practitioner file](#).

2.4.4. Frequently Asked Questions

Please also refer to [Uploading data](#) for answers to frequently asked questions about uploading data.

2.5. Data item summary

Table 2.10 Summary of data items

Provider Organisation	Practitioner	Client	Episode	Service Contact	K10+ Collection Occasion
Organisation Path	Organisation Path	Organisation Path	Organisation Path	Organisation Path	Organisation Path
Organisation Key	Practitioner Key	Client Key	Episode Key	Service Contact Key	Collection Occasion Key
Provider Organisation - Name	Practitioner - Category	Client - Statistical Linkage Key	Client Key	Episode Key	Episode Key
Provider Organisation - Legal Name	Practitioner - ATSI Cultural Training	Client - Date of Birth	Episode - End Date	Practitioner Key	Collection Occasion - Measure Date
Provider Organisation - ABN	Practitioner - Year of Birth	Client - Estimated Date of Birth Flag	Episode - Client Consent to Anonymised Data	Service Contact - Date	Collection Occasion - Reason
Provider Organisation - Type	Practitioner - Gender	Client - Gender	Episode - Completion Status	Service Contact - Type	K10+ - Question 1
Provider Organisation - State	Practitioner - Aboriginal and Torres Strait Islander Status	Client - Aboriginal and Torres Strait Islander Status	Episode - Referral Date	Service Contact - Postcode	K10+ - Question 2
Provider Organisation - Status	Practitioner - Active	Client - Country of Birth	Episode - Principal Focus of Treatment Plan	Service Contact - Modality	K10+ - Question 3
Provider Organisation - Tags	Practitioner - Tags	Client - Main Language Spoken at Home	Episode - GP Mental Health Treatment Plan Flag	Service Contact - Participants	K10+ - Question 4
		Client - Proficiency in Spoken English	Episode - Homelessness Flag	Service Contact - Venue	K10+ - Question 5
		Client - Tags	Episode - Area of usual residence, postcode	Service Contact - Duration	K10+ - Question 6
			Episode - Labour Force Status	Service Contact - Copayment	K10+ - Question 7

Provider Organisation	Practitioner	Client	Episode	Service Contact	K10+ Collection Occas
			Episode - Employment Participation	Service Contact - Client Participation Indicator	K10+ - Question 8
			Episode - Source of Cash Income	Service Contact - Interpreter Used	K10+ - Question 9
			Episode - Health Care Card	Service Contact - No Show	K10+ - Question 10
			Episode - NDIS Participant	Service Contact - Final	K10+ - Question 11
			Episode - Marital Status	Service Contact - Tags	K10+ - Question 12
			Episode - Suicide Referral Flag		K10+ - Question 13
			Episode - Principal Diagnosis		K10+ - Question 14
			Episode - Additional Diagnosis		K10+ - Score
			Episode - Medication - Antipsychotics (N05A)		K10+ - Tags
			Episode - Medication - Anxiolytics (N05B)		
			Episode - Medication - Hypnotics and sedatives (N05C)		
			Episode - Medication - Antidepressants (N06A)		
			Episode - Medication - Psychostimulants and nootropics (N06B)		
			Episode - Referrer Profession		
			Episode - Referrer Organisation Type		

2.6. Using the data specification to create client forms

Some consideration needs to be taken when designing forms based on this data specification.

2.6.1. Not stated/missing codes

Not stated/missing codes (normally code 9, 99, 999 or 9999) are not to be available as a valid answers to questions but is intended for use:

- Primarily when importing data from other data collections that do not contain mappable data.
- Where an answer was refused.
- Where the question was not able to be asked prior to completion of assistance because the client was unable to communicate or a person who knows the client was not available.

2.6.2. Country of Birth

[Client - Country of Birth](#) has a large permitted domain. It is not feasible to provide all allowed responses on a form.

The Australian Bureau of Statistics recommends two standard question modules for Country of Birth:

- [Detailed question module](#)
- [Short question module](#)

2.6.2.1. Detailed question module

The detailed question module is the recommended module for Country of Birth. An example is:

Q. In which country [were you][was the person] born?
Australia q
England q
New Zealand q
India q
Italy q
Vietnam q
Philippines q
South Africa q
Scotland q
Malaysia q
Other - Please specify.....

Form designers do not need to use the countries shown in this example. They should choose countries relevant to the population for their region. The “Other” response can then be mapped to a [Client - Country of Birth](#) during data entry.

2.6.2.2. Short question module

The short question module can be used where there are space constraints. An example is:

Q. In which country [were you][was the person] born?

Australia q

Other - please specify.....

The “Other” response can then be mapped to a country code during data entry. This form has higher overheads as each response will need to be matched to a [Client - Country of Birth](#) during data entry.

2.6.3. Main Language Spoken at Home

[Client - Main Language Spoken at Home](#) has a large permitted domain. It is not feasible to provide all allowed responses on a form. The Australian Bureau of Statistics recommends two standard question modules for Main Language Spoken at Home:

- [Detailed question module](#)
- [Short question module](#)

2.6.3.1. Detailed question module

The detailed question module is the recommended module for Main Language Spoken at Home. An example is:

Q. [Do you][Does the person] speak a language other than English at home?
(If more than one language, indicate the one that is spoken most often.)

No, English q

Yes, Mandarin q

Yes, Italian q

Yes, Arabic q

Yes, Cantonese q

Yes, Greek q

Yes, Vietnamese q

Yes, Spanish q

Yes, Hindi q

Yes, Tagalog q

Yes, Other - Please Specify.....

For self enumerated questionnaires, respondents should be instructed to mark one box only.

Form designers do not need to use the languages shown in this example. They should choose languages relevant to the population for their region. The “Other” response can then be mapped to a [Client - Main Language Spoken at Home](#) during data entry.

2.6.3.2. Short question module

The short question module can be used where there are space constraints. An example is:

Q. [Do you] [Does the person] speak a language other than English at home?

No, English only q
Yes, Other - please specify.....

The “Other” response can then be mapped to a country code during data entry. This form has higher overheads as each response will need to be matched to a [Client - Main Language Spoken at Home](#) during data entry.

2.7. Validation Rules

This document defines validation rules between items and record types. The domain of individual items is defined in [Record formats](#).

2.7.1. 1. Current Validations

2.7.1.1. Practitioner

1. [Practitioner - ATSI Cultural Training](#) must only be set to ‘3 - Not required’ where [Practitioner - Aboriginal and Torres Strait Islander Status](#) is one of
 - ‘1: Aboriginal but not Torres Strait Islander origin’
 - ‘2: Torres Strait Islander but not Aboriginal origin’
 - ‘3: Both Aboriginal and Torres Strait Islander origin’or

The organisation to which the practitioner belongs has [Provider Organisation - Type](#) set to ‘8: Aboriginal Health/Medical Service’

2.7.1.2. Client

1. [Client - Date of Birth](#) must not be before 1 January 1900

2.7.1.3. 3. Episode

1. The **Episode - End Date** must not be before the **Episode - Referral Date**
2. **Episode - Referrer Organisation Type** must be set to '98: N/A - Self referral' if and only if **Episode - Referrer Profession** is also '98: N/A - Self referral'
3. A maximum of one episode shall be open per client
4. Where the **Episode - Completion Status** has been recorded using one of the 'Episode closed' responses (Response items 1-6), the episode must have an **Episode - End Date**, and/or episodes that have an **Episode - End Date** must have an **Episode - Completion Status** recorded using one of the 'Episode closed' responses (Response items 1-6)
5. On **Episode - Principal Diagnosis** and **Episode - Additional Diagnosis** the values:
 - '100: Anxiety disorders (ATAPS)'
 - '200: Affective (Mood) disorders (ATAPS)'
 - '300: Substance use disorders (ATAPS)'
 - '400: Psychotic disorders (ATAPS)'must only used where data has been migrated from ATAPS. The above responses must only be used under the following conditions:
 - The **Episode - Referral Date** was before 1 July 2017
 - The **Episode - Tags** field must contain the **!ATAPS** flag
6. The '4: Complex care package' response for **Episode - Principal Focus of Treatment Plan** must only be used by selected PHN Lead Sites
7. The **!ATAPS** tag must only be included in the **Episode - Tags** field where the **Episode - Referral Date** was before 1 July 2017
8. **Episode - End Date** must not be before 1 January 2016
9. **Episode - Referral Date** must not be before 1 January 2014

2.7.1.4. 4. Service Contact

1. Where **Service Contact - Final** is recorded as '1: No further services are planned for the client in the current episode', the **Episode - Completion Status** must be recorded using one of the 'Episode closed' responses (Response items 1-6)
2. Where **Service Contact - Final** is recorded as '1: No further services are planned for the client in the current episode', the date of the **Service Contact - Final** must be recorded as the Episode End Date
3. Where an **Episode - End Date** has been recorded, a later **Service Contact - Date** must not be added
4. If **Service Contact - Modality** is '0: No contact took place', **Service Contact - No Show** must be '1: Yes'
5. If **Service Contact - Modality** is '0: No contact took place', **Service Contact - Postcode** must be 9999
6. If **Service Contact - Modality** is '1: Face to Face', **Service Contact - Postcode** must not be 9999
7. If **Service Contact - Modality** is '1: Face to Face', **Service Contact - Venue** must not be '98: Not applicable (Service Contact Modality is not face to face)'
8. If **Service Contact - Modality** is not '1: Face to Face', **Service Contact - Postcode** must be 9999
9. On **Service Contact - Type** the value '98: ATAPS' must only be used where data has been migrated from ATAPS. The above response must only be used under the following conditions:
 - The **Service Contact - Date** was before 30 June 2018
 - The **Service Contact - Tags** field must contain the **!ATAPS** flag
10. If **Service Contact - Participants** is '1: Individual client' **Service Contact - Client Participation Indicator** must be '1: Yes'
11. The **!ATAPS** tag must only be included in the **Service Contact - Tags** field where the **Service Contact - Date** was before 30 June 2018
12. **Service Contact - Date** must not be before 1 January 2014

2.7.1.5. 5. K10+

1. **Collection Occasion - Measure Date** must not be before **Episode - Referral Date**
2. **Collection Occasion - Measure Date** must not be after **Episode - End Date**
3. If both item scores and a total score are specified, the item scores must add up to the total score
4. **Collection Occasion - Measure Date** must not be before 1 January 2016

2.7.1.6. 6. K5

1. **Collection Occasion - Measure Date** must not be before **Episode - Referral Date**
2. **Collection Occasion - Measure Date** must not be after **Episode - End Date**
3. If both item scores and a total score are specified, the item scores must add up to the total score
4. **Collection Occasion - Measure Date** must not be before 1 January 2016

2.7.1.7. 7. SDQ

1. **Collection Occasion - Measure Date** must not be before **Episode - Referral Date**
2. **Collection Occasion - Measure Date** must not be after **Episode - End Date**
3. **Collection Occasion - Measure Date** must not be before 1 January 2016

2.7.2. 2. Future Validations

2.7.2.1. SDQ

1. Use the table at [SDQ](#) to validate the items that are used in each version of the SDQ.
2. If both item scores, subscales and total score are specified, the item scores must agree with the subscales/total score.

2.8. ATAPS MDS to PMHC MDS data mapping

2.8.1. Practitioner

See [Practitioner](#) for the definition of a practitioner.

The low completion rate of MHPro profile data within the ATAPS MDS results in many practitioner records being populated with mostly “missing” values.

Table 2.11 Practitioner record mapping

Data Element (Field Name)	Type (min,max)	Format / Values
Organisation Path (organisation_path)	string	No comparable concept in ATAPS MDS. PHN's will be required to populate this field.
Practitioner Key (practitioner_key)	string (2,50)	The MHPro nickname from the ATAPS MDS

Data Element (Field Name)	Type (min,max)	Format / Values		
		Populated from ATAPS MHPro profile <i>profession</i> data using the following mapping:		
Practitioner - Category (practitioner_category)	string	ATAPS MHP Profession	PMHC Practitioner category	
		1: Psychologist (Clinical)	1: Clinical Psychologist	
		2: Psychologist (Generalist/ Other)	2: General Psychologist	
		3: Social worker	3: Social Worker	
		4: Occupational Therapist	4: Occupational Therapist	
		5: Mental Health Nurse	5: Mental Health Nurse

Data Element (Field Name)	Type (min,max)	Format / Values								
Practitioner - ATSI Cultural Training (atsi_cultural_training)	string	<p>Not part of ATAPS MDS. All practitioner records populated with</p> <p>9: Missing / Not recorded</p>								
Practitioner - Year of Birth (practitioner_year_of_birth)	gYear	<p>Populated from ATAPS MHPro profile data. Missing values mapped to</p> <p>9999: Date of birth is totally unknown</p>								
Practitioner - Gender (practitioner_gender)	string	<p>Mapped from ATAPS to PMHC gender codes. Note that Female/Male codes are swapped between the two MDS systems.</p> <table border="1"> <thead> <tr> <th>ATAPS gender</th><th>PMHC gender</th></tr> </thead> <tbody> <tr> <td>0: (Blank)</td><td>0: Not stated/Inadequately described</td></tr> <tr> <td>1: Female</td><td>1: Male</td></tr> <tr> <td>2: Male</td><td>2: Female</td></tr> </tbody> </table>	ATAPS gender	PMHC gender	0: (Blank)	0: Not stated/Inadequately described	1: Female	1: Male	2: Male	2: Female
ATAPS gender	PMHC gender									
0: (Blank)	0: Not stated/Inadequately described									
1: Female	1: Male									
2: Male	2: Female									
Practitioner - Aboriginal and Torres Strait Islander Status (practitioner_atsi_status)	string	<p>Populated from ATAPS MHPro profile data. Codes 1 to 4 map to the same values. All other values are mapped to</p> <p>9: Not stated/inadequately described</p>								
Practitioner - Active (practitioner_active)	string	<p>MHPros in the ATAPS MDS are considered active practitioners for data migration. i.e. all records are mapped to</p> <p>1: Active</p>								

Data Element (Field Name)	Type (min,max)	Format / Values
Practitioner - Tags (practitioner_tags)	string	No comparable concept in the ATAPS MDS. All records will be populated with the reserved tag !ATAPS

2.8.2. Client

See [Client](#) for the definition of a client.

Table 2.12 Client record mapping

Data Element (Field Name)	Type (min,max)	Format / Values
Organisation Path (organisation_path)	string	No comparable concept in ATAPS MDS. PHN's will be required to populate this field.
Client Key (client_key)	string (2,50)	ATAPS patient_key
Client - Statistical Linkage Key (slk)	string (14,40)	ATAPS slk or slk_hash
Client - Date of Birth (date_of_birth)	date	Only the patients' year of birth is recorded in ATAPS. The date_of_birth field is populated with an estimated date of birth, being 1st January in the recorded year of birth. For example, if a patient's year of birth is 1975, the PMHC client date_of_birth is mapped to 01011975.
Client - Estimated Date of Birth Flag (est_date_of_birth)	string	All clients have an estimated date of birth. Mapped to option 2 for all clients. 2: Date of birth is an estimate

Data Element (Field Name)	Type (min,max)	Format / Values								
Client - Gender (client_gender)	string	<p>Mapped from ATAPS to PMHC gender codes. Note that Female/Male codes are swapped between the two MDS systems.</p> <table border="1"> <thead> <tr> <th>ATAPS gender</th> <th>PMHC gender</th> </tr> </thead> <tbody> <tr> <td>0: (Blank)</td> <td>0: Not stated/Inadequately described</td> </tr> <tr> <td>1: Female</td> <td>1: Male</td> </tr> <tr> <td>2: Male</td> <td>2: Female</td> </tr> </tbody> </table>	ATAPS gender	PMHC gender	0: (Blank)	0: Not stated/Inadequately described	1: Female	1: Male	2: Male	2: Female
ATAPS gender	PMHC gender

		!ATAPS	

2.8.3. Episode

See [Episode](#) for the definition of a episode.

Table 2.13 Episode record mapping

Data Element (Field Name)	Type (min,max)	Format / Values
Organisation Path (organisation_path)	string	No comparable concept in ATAPS MDS. PHN's will be required to populate this field.

Data Element (Field Name)	Type (min,max)	Format / Values
Episode Key (episode_key)	string (2,50)	A unique identifier for each episode generated by concatenating the string 'E', an internal ATAPS identifier (integer), and the string 'ATAPS'. For example E12345ATAPS
Client Key (client_key)	string (2,50)	ATAPS patient_key
Episode - End Date (episode_end_date)	date	When the ATAPS referral has a conclusion, the date of the most recent session date for this referral.
Episode - Client Consent to Anonymised Data (client_consent)	string	All ATAPS patients are assumed to have consented to their data being collected. Mapped to option 1 for all episodes: 1: Yes

Data Element (Field Name)	Type (min,max)	Format / Values	
		Mapped from ATAPS referral conclusion	
Episode - Completion Status (episode_completion_status)	string	ATAPS referral conclusion	PMHC episode completion status
		1: Treatment complete	1: Episode closed - treatment concluded
		2: Patient could not be contacted	3: Episode closed administratively - client declined further contact
		3: Patient refused treatment	3: Episode closed administratively - client declined further contact
		4: Patient referred elsewhere	5: Episode closed administratively - client referred elsewhere
		5: Treatment incomplete but referral closed	6: Episode closed administratively - other reason
Episode - Referral Date (referral_date)	date	ATAPS referral_date	

Data Element (Field Name)	Type (min,max)	Format / Values	
		Determined from ATAPS referral type using the following mapping	
Episode - Principal Focus of Treatment Plan (principal_focus)	string	ATAPS referral type	PMHC episode principal focus
		1: General ATAPS	1: Psychological therapy
		2: Telephone CBT	7: Other
		3: Suicide Prevention	7: Other
		4: Perinatal Depression	7: Other
		5: Bushfire	7: Other
		6: Homelessness	7: Other
		7: Aboriginal & TSI	6: Indigenous-specific mental health services
		8: Rural & remote	1: Psychological therapy
		9: Children	5: Child and youth-specific mental health services
		10: 2010-11 Floods and Cyclone Yasi	7: Other
		11: ATSI Suicide prevention	6: Indigenous-specific mental health services

Data Element (Field Name)	Type (min,max)	Format / Values	
		ATAPS referral type	PMHC episode principal focus
		12: Tier 2 ECE - Flood/Cyclone	7: Other
		13: Tier 2 ECE - Bushfire	7: Other
		14: Tier 2 ECE - Other	7: Other
		15: MHSRRA	1: Psychological therapy
Episode - GP Mental Health Treatment Plan Flag (mental_health_treatment_plan)	string	Not part of ATAPS MDS. All episode records populated with 9: Not stated/inadequately described	
Episode - Homelessness Flag (homelessness)	string	Not part of ATAPS MDS. All episode records populated with 9: Not stated / Missing	
Episode - Area of usual residence, postcode (client_postcode)	string	ATAPS referral postcode	
Episode - Labour Force Status (labour_force_status)	string	Not part of ATAPS MDS. All episode records populated with 9: Not stated/inadequately described	
Episode - Employment Participation (employment_participation)	string	Not part of ATAPS MDS. All episode records populated with 9: Not stated/inadequately described	

Data Element (Field Name)	Type (min,max)	Format / Values
Episode - Source of Cash Income (income_source)	string	Not part of ATAPS MDS. All episode records populated with 9: Not stated/inadequately described
Episode - Health Care Card (health_care_card)	string	Not part of ATAPS MDS. All episode records populated with 9: Not stated
Episode - NDIS Participant (ndis_participant)	string	Not part of ATAPS MDS. All episode records populated with 9: Not stated/inadequately described
Episode - Marital Status (marital_status)	string	Not part of ATAPS MDS. All episode records populated with 6: Not stated/inadequately described
Episode - Suicide Referral Flag (suicide_referral_flag)	string	<p>Derived from the ATAPS referral type.</p> <p>Referrals with an ATAPS referral_type of either 'Suicide Prevention (3)' or 'ATSI Suicide prevention (11)' are coded as</p> <p>1: Yes</p> <p>All other referral types map to</p> <p>2: No</p>

Data Element (Field Name)	Type (min,max)	Format / Values	
		The ATAPS specifications allowed multiple diagnosis to be specified for a referral. Those referrals where no diagnosis or a single diagnosis were specified are mapped as follows:	
Episode - Principal Diagnosis (principal_diagnosis)	string	ATAPS referral diagnosis	PMHC episode principal diagnosis
		No diagnosis field defined	999: Missing
		icd_f1: Alcohol & Drug Use	300: Substance use disorders (ATAPS)
		icd_f2: Psychotic Disorders	400: Psychotic disorders (ATAPS)
		icd_f3: Depression	200: Affective (Mood) disorders (ATAPS)
		icd_f4: Anxiety Disorders	100: Anxiety disorders (ATAPS)
		icd_f5: Unexplained Somatic	603: Somatoform disorder
		icd_no_formal_diagnosis: No formal diagnosis	905: Other
		icd_unknown: Unknown	999: Missing
		icd_other: Other	905: Other
		icd_f10_f11: F10 & F11 Substance use disorders	300: Substance use disorders

Data Element (Field Name)	Type (min,max)	Format / Values	
		ATAPS referral diagnosis	PMHC episode principal diagnosis
		icd_f32: F32 Depression	200: Affective (Mood) disorders
		icd_f40_f41_f41_1: F40, F41, F41.1 Anxiety	100: Anxiety disorders
		icd_f43_2: F43.2 Adjustment disorder	601: Adjustment disorder
		icd_f44: F44 Dissociative (conversion) disorder	605: Other mental disorder
		icd_f45: F45 Unexplained somatic disorder	603: Somatoform disorder
		icd_f48: F48 Neurasthenia (chronic fatigue syndrome)	605: Other mental disorder
		icd_f50: F50 Eating disorders	602: Eating disorder
		icd_f51: F51 Sleep problems	605: Other mental disorder
		icd_f52: F52 Sexual disorders	605: Other mental disorder
		icd_f90: F90 Hyperkinetic (attention deficit) disorder	Attention deficit hyperactivity disorder (ADHD) 502: hyperactivity disorder (ADHD)
		icd_f91: F91 Conduct disorder	503: Conduct disorder

Data Element (Field Name)	Type (min,max)	Format / Values	
		ATAPS referral diagnosis icd_f98: F98 Enuresis	PMHC episode principal diagnosis 506: Other disorder of childhood and adolescence
Referrals where TWO diagnosis fields were specified, the principal diagnosis is determined using the following hierarchies.			
ATAPS referral diagnosis hierarchy: icd_f3: Depression, then			
icd_f4: Anxiety Disorders, then			
icd_f5: Unexplained Somatic.			
For pairs of children diagnoses			
ATAPS children referral diagnosis hierarchy: icd_f32: F32 Depression, then			
icd_f40_f41_f41_1:			
F40, F41, F41.1 Anxiety, then			
icd_f43_2: F43.2 Adjustment disorder, then			
icd_f44: F44 Dissociative (conversion) disorder, then			
icd_f50: F50 Eating disorders, then			
icd_f51: F51 Sleep problems, then			
icd_f90: F90 Hyperkinetic (attention deficit) disorder, then			
icd_f91: F91 Conduct disorder.			
For example, if a referral was flagged as being for Depression and Unexplained Somatic, the principal diagnosis would be Depression and mapped to code 200, as if specified as a single diagnosis above.			
All other referrals will be mapped to			
905: Other			

Data Element (Field Name)	Type (min,max)	Format / Values
<p>Episode - Additional Diagnosis (additional_diagnosis)</p>	string	<p>Mapped from ATAPS referral diagnosis fields</p> <p>For referrals where NO diagnosis field was specified, the additional diagnosis is mapped to</p> <p style="text-align: center;">999: Missing</p> <p>Referrals where exactly ONE diagnosis field was specified, the additional diagnosis is mapped to</p> <p style="text-align: center;">000: No additional diagnosis</p> <p>For referrals where TWO diagnosis fields were specified, the additional diagnosis is determined using the same hierarchies as described in the principal diagnosis when two diagnoses were specified for the referral. The diagnosis NOT selected as the principal diagnosis is mapped as the additional diagnosis.</p> <p>For example, if a referral was flagged as being for Depression and Unexplained Somatic, the additional diagnosis would be Unexplained Somatic and mapped to code 603, using the table above for a single principal diagnosis.</p> <p>Similarly for the children diagnosis options. If a referral was recorded with F32 Depression and F43.2 Adjustment disorder, the principal diagnosis would be F32 Depression and mapped to code 200, while the additional diagnosis would be F43.2 Adjustment disorder and mapped to code 601.</p> <p>For all other referrals, the additional diagnosis is mapped to</p> <p style="text-align: center;">905: Other</p>
<p>Episode - Medication - Antipsychotics (N05A) (medication_antipsychotics)</p>	string	<p>If ATAPS referral med_pheno is TRUE (or 1) then</p> <p style="text-align: center;">1: Yes</p> <p>Otherwise</p> <p style="text-align: center;">2: No</p>

Data Element (Field Name)	Type (min,max)	Format / Values
Episode - Medication - Anxiolytics (N05B) (medication_anxiolytics)	string	<p>If ATAPS referral med_benzo is TRUE (or 1) then</p> <p>1: Yes</p> <p>Otherwise</p> <p>2: No</p>
Episode - Medication - Hypnotics and sedatives (N05C) (medication_hypnotics)	string	<p>If ATAPS referral med_mood is TRUE (or 1) then</p> <p>1: Yes</p> <p>Otherwise</p> <p>2: No</p>
Episode - Medication - Antidepressants (N06A) (medication_antidepressants)	string	<p>If ATAPS referral med_antidep is TRUE (or 1) then</p> <p>1: Yes</p> <p>Otherwise</p> <p>2: No</p>
Episode - Medication - Psychostimulants and nootropics (N06B) (medication_psychostimulants)	string	<p>Not part of ATAPS MDS. All episode records populated with</p> <p>9: Unknown</p>

Data Element (Field Name)	Type (min,max)	Format / Values	
		Mapped from ATAPS referral referrer type:	
Episode - Referrer Profession (referrer_profession)	string	ATAPS referral referrer type	PMHC episode referrer profession
		1: GP	1: General Practitioner

Service Contact - No Show (service_contact_no_show)	string	<p>If ATAPS session.no_show is TRUE (or 1) then</p> <p>1: Yes</p> <p>Otherwise</p> <p>2: No</p>
Service Contact - Final (service_contact_final)	string	<p>No comparable concept in ATAPS MDS. All service contact will be populated with</p> <p>3: Not known at this stage</p>

Data Element (Field Name)	Type (min,max)	Format / Values
Service Contact - Tags (service_contact_tags)	string	No comparable concept in the ATAPS MDS. All records will be populated with the reserved tag !ATAPS

2.8.5. Outcome Collection Occasion

See [Outcome Collection Occasion](#) for definition of an outcome collection occasion.

2.8.5.1. K10+

Table 2.15 K10+ record mapping

Data Element (Field Name)	Type (min,max)	Format / Values
Organisation Path (organisation_path)	string	No comparable concept in ATAPS MDS. PHN's will be required to populate this field.
Collection Occasion Key (collection_occasion_key)	string (2,50)	A unique identifier for each collection occasion generated by concatenating the string 'CO', an internal ATAPS identifier (integer), and the string 'ATAPS'. For example CO12345ATAPS
Episode Key (episode_key)	string (2,50)	A unique identifier for each episode generated by concatenating the string 'E', an internal ATAPS identifier (integer), and the string 'ATAPS'. For example E12345ATAPS
Collection Occasion - Measure Date (measure_date)	date	The ATAPS collection occasion date (measure_taken), or the date 0909999 when missing

Data Element (Field Name)	Type (min,max)	Format / Values
Collection Occasion - Reason (reason_for_collection)	string	<p>ATAPS only collected 'initial' and/or 'final' measures for an episode.</p> <p>Any K10+ 'initial' measures are mapped to</p> <p>1: Episode start</p> <p>while 'final' K10+ measures are mapped to</p> <p>3: Episode end</p>
K10+ - Question 1 (k10p_item1)	string	ATAPS K10+ collection occasion item 1 score (k01)
K10+ - Question 2 (k10p_item2)	string	ATAPS K10+ collection occasion item 2 score (k02)
K10+ - Question 3 (k10p_item3)	string	ATAPS K10+ collection occasion item 3 score (k03)
K10+ - Question 4 (k10p_item4)	string	ATAPS K10+ collection occasion item 4 score (k04)
K10+ - Question 5 (k10p_item5)	string	ATAPS K10+ collection occasion item 5 score (k05)
K10+ - Question 6 (k10p_item6)	string	ATAPS K10+ collection occasion item 6 score (k06)
K10+ - Question 7 (k10p_item7)	string	ATAPS K10+ collection occasion item 7 score (k07)
K10+ - Question 8 (k10p_item8)	string	ATAPS K10+ collection occasion item 8 score (k08)
K10+ - Question 9 (k10p_item9)	string	ATAPS K10+ collection occasion item 9 score (k09)

Data Element (Field Name)	Type (min,max)	Format / Values
K10+ - Question 10 (k10p_item10)	string	ATAPS K10+ collection occasion item 10 score (k10)
K10+ - Question 11 (k10p_item11)	integer	Item score not recorded in ATAPS. All K10+ collection occasions mapped to 99: Not stated / Missing
K10+ - Question 12 (k10p_item12)	integer	Item score not recorded in ATAPS. All K10+ collection occasions mapped to 99: Not stated / Missing
K10+ - Question 13 (k10p_item13)	integer	Item score not recorded in ATAPS. All K10+ collection occasions mapped to 99: Not stated / Missing
K10+ - Question 14 (k10p_item14)	string	Item score not recorded in ATAPS. All K10+ collection occasions mapped to 9: Not stated / Missing
K10+ - Score (k10p_score)	integer	ATAPS K10+ collection occasion total score (ktot10)
K10+ - Tags (k10p_tags)	string	No comparable concept in the ATAPS MDS. All records will be populated with the reserved tag !ATAPS

2.8.5.2. K5

Table 2.16 K5 record mapping

Data Element (Field Name)	Type (min,max)	Format / Values
Organisation Path (organisation_path)	string	No comparable concept in ATAPS MDS. PHN's will be required to populate this field.
Collection Occasion Key (collection_occasion_key)	string (2,50)	A unique identifier for each collection occasion generated by concatenating the string 'CO', an internal ATAPS identifier (integer), and the string 'ATAPS'. For example CO12345ATAPS
Episode Key (episode_key)	string (2,50)	A unique identifier for each episode generated by concatenating the string 'E', an internal ATAPS identifier (integer), and the string 'ATAPS'. For example E12345ATAPS
Collection Occasion - Measure Date (measure_date)	date	The ATAPS collection occasion date (measure_taken), or the date 0909999 when missing
Collection Occasion - Reason (reason_for_collection)	string	ATAPS only collected 'initial' and/or 'final' measures for an episode. Any K5 'initial' measures are mapped to 1: Episode start while 'final' K5 measures are mapped to 3: Episode end
K5 - Question 1 (k5_item1)	string	ATAPS K5 collection occasion item 1 score (k01)

Data Element (Field Name)	Type (min,max)	Format / Values
K5 - Question 2 (k5_item2)	string	ATAPS K5 collection occasion item 2 score (k02)
K5 - Question 3 (k5_item3)	string	ATAPS K5 collection occasion item 3 score (k03)
K5 - Question 4 (k5_item4)	string	ATAPS K5 collection occasion item 4 score (k04)
K5 - Question 5 (k5_item5)	string	ATAPS K5 collection occasion item 5 score (k05)
K5 - Score (k5_score)	integer	ATAPS K5 collection occasion total score (ktot5)
K5 - Tags (k5_tags)	string	No comparable concept in the ATAPS MDS. All records will be populated with the reserved tag !ATAPS

2.8.5.3. SDQ

Table 2.17 SDQ record mapping

Data Element (Field Name)	Type (min,max)	Format / Values
Organisation Path (organisation_path)	string	No comparable concept in ATAPS MDS. PHN's will be required to populate this field.
Collection Occasion Key (collection_occasion_key)	string (2,50)	A unique identifier for each collection occasion generated by concatenating the string 'CO', an internal ATAPS identifier (integer), and the string 'ATAPS'. For example CO12345ATAPS

Data Element (Field Name)	Type (min,max)	Format / Values
Episode Key (episode_key)	string (2,50)	A unique identifier for each episode generated by concatenating the string 'E', an internal ATAPS identifier (integer), and the string 'ATAPS'. For example E12345ATAPS
Collection Occasion - Measure Date (measure_date)	date	The ATAPS collection occasion date (measure_taken), or the date 09099999 when missing
Collection Occasion - Reason (reason_for_collection)	string	ATAPS only collected 'initial' and/or 'final' measures for an episode. Any SDQ 'initial' measures are mapped to 1: Episode start while 'final' SDQ measures are mapped to 3: Episode end

Data Element (Field Name)	Type (min,max)	Format / Values											
SDQ Collection Occasion - Version (sdq_version)	string	<p>ATAPS recorded the three variants of SDQ as separate measures.</p> <p>The SDQ version is mapped from the SDQ measure type and the reason for collection:</p> <table border="1"> <thead> <tr> <th>ATAPS measure + collection</th> <th>PMHC SDQ version</th> </tr> </thead> <tbody> <tr> <td>SDQ PC + Initial collection</td> <td> PC101: Parent Report Measure 4-10 yrs, Baseline version, Australian Version 1 </td> </tr> <tr> <td>SDQ PC + Final collection</td> <td> PC201: Parent Report Measure 4-10 yrs, Follow Up version, Australian Version 1 </td> </tr> <tr> <td>SDQ PY + Initial collection</td> <td> PY101: Parent Report Measure 11-17 yrs, Baseline version, Australian Version 1 </td> </tr> <tr> <td>SDQ PY + Final collection</td> <td> PY201: Parent Report Measure 11-17 yrs, Follow Up version, Australian Version 1 </td> </tr> </tbody> </table>		ATAPS measure + collection	PMHC SDQ version	SDQ PC + Initial collection	PC101: Parent Report Measure 4-10 yrs, Baseline version, Australian Version 1	SDQ PC + Final collection	PC201: Parent Report Measure 4-10 yrs, Follow Up version, Australian Version 1	SDQ PY + Initial collection	PY101: Parent Report Measure 11-17 yrs, Baseline version, Australian Version 1	SDQ PY + Final collection	PY201: Parent Report Measure 11-17 yrs, Follow Up version, Australian Version 1

SDQ - Emotional Symptoms Scale (sdq_emotional_symptoms)	integer	ATAPS SDQ collection occasion emotional symptoms scale (sess)
SDQ - Conduct Problem Scale (sdq_conduct_problem)	integer	ATAPS SDQ collection occasion conduct problem scale (scps)
SDQ - Hyperactivity Scale (sdq_hyperactivity)	integer	ATAPS SDQ collection occasion hyperactivity scale (shs)
SDQ - Peer Problem Scale (sdq_peer_problem)	integer	ATAPS SDQ collection occasion peer problem scale (spss)
SDQ - Prosocial Scale (sdq_prosocial)	integer	ATAPS SDQ collection occasion prosocial scale (sps)

Data Element (Field Name)	Type (min,max)	Format / Values
SDQ - Total Difficulties Score (sdq_total)	integer	ATAPS SDQ collection occasion total difficulties score (stds)
SDQ - Impact Score (sdq_impact)	integer	ATAPS SDQ collection occasion impact score (sis)
SDQ - Tags (sdq_tags)	string	No comparable concept in the ATAPS MDS. All records will be populated with the reserved tag !ATAPS

2.9. Test Data Sets

2.9.1. SLK Test Data Set

We are providing the following test data to allow developers to test their implementation of the SLK specification as defined at <https://docs.pmhc-mds.com/data-specification/data-model-and-specifications.html#client-statistical-linkage-key>.

2.9.1.1. SLK Generation Test Data

Table 2.18 Summary of files to upload

Explanation	First name	Last name	Birth Day	Birth Month	Birth Year	Gender	Expected SLK
Everything there	John	Stevens	7	6	1954	1	TEEOH070619541
Everything there, padded day and month	John	Stevens	07	06	1954	2	TEEOH070619542
A short last name	John	Bo	7	6	1954	3	O22OH070619543
A short first name	Jo	Stevens	7	6	1954	9	TEEO2070619549
No last name	John		7	6	1954	1	999OH070619541
No first name		Stevens	7	6	1954	2	TEE99070619542
No names at all			7	6	1954	3	99999070619543
No gender	John	Stevens	7	6	1954	9	TEEOH070619549

Explanation	First name	Last name	Birth Day	Birth Month	Birth Year	Gender	Expected SLK
Non-alpha characters in the name	Jo,hn	St' e-vens	7	6	1954	1	TEEOH070619541
No birth day	John	Stevens		6	1954	1	
No birth month	John	Stevens	7		1954	1	
No birth year	John	Stevens	7	6		1	
Non numeric inputs for dates	John	Stevens	a	b	1997`	z	
Default date of birth	John	Stevens	9	9	9999	1	TEEOH090999991
UTF8 character in the name	John	Amélie	7	6	1954	3	MEIOH070619543

[Download SLK Generation Test Data as CSV.](#)

2.9.1.2. SLK Validation Test Data

Table 2.19 Summary of files to upload

Explanation	SLK	Valid/Invalid
Every component valid	TEEOH070619541	Valid
Valid with padded 2s	O22N2070619543	Valid
Valid with unknown names	99999070619543	Valid
Too short	TEEOH07061954	Invalid
Too long	99999010119993x	Invalid
Gender not valid	99999010119935	Invalid
Invalid date	99999999999999	Invalid

[Download SLK Validation Tests as CSV.](#)

2.10. Data Specification Change log

2.10.1. 25/7/2018

- [Episode - Principal Diagnosis](#) to make plurality of the 7 major categories consistent.

2.10.2. 25/6/2018

- [Upload specification](#)
 - Updated to use 'must' and 'should' as defined in [RFC 2119](#).

2.10.3. 30/5/2018

- [Download Specification Files](#)
 - Added a zip download of PMHC MDS Specification files for developers to access.

2.10.4. 13/3/2018

- [Upload specification](#)
 - Updated [File format](#) to specify that '... you should include ALL service contacts and measures for that episode' and removing the text 'Any service contacts and measures that are not included will be removed from the PMHC MDS'
- [Validation Rules](#)
 - Updated [2. Client](#) to remove the age based validations for Client - Proficiency in Spoken English. These validations will be replaced with data quality reports.

2.10.5. 19/1/2018 - Version 1.0.12

- [Data model and specifications](#)
 - [Record formats](#)
 - [Client](#)
 - Updated [Client - Date of Birth](#) to specify that the date of birth must not be before 1 January 1900.
 - [Episode](#)
 - Updated [Episode - End Date](#) to specify that the episode end date must not be before 1 January 2016.
 - Updated [Episode - Referral Date](#) to specify that the episode referral date must not be before 1 January 2014.
 - [Service Contact](#)
 - Updated [Service Contact - Date](#) to specify that the service contact date must not be before 1 January 2014.
 - [Outcome Collection Occasion](#)
 - Updated [Collection Occasion - Measure Date](#) to specify that the measure date must not be before 1 January 2016.
- [Validation Rules](#)
 - Updated [2. Client](#) to add specify that the date of birth must not be before 1 January 1900.
 - Updated [3. Episode](#) to add specify that the episode end date must not be before 1 January 2016.
 - Updated [3. Episode](#) to add specify that the episode referral date must not be before 1 January 2014.

- Updated [4. Service Contact](#) to add specify that the service contact date must not be before 1 January 2014.
- Updated [5. K10+](#) to add specify that the measure date must not be before 1 January 2016.
- Updated [6. K5](#) to add specify that the measure date must not be before 1 January 2016.
- Updated [7. SDQ](#) to add specify that the measure date must not be before 1 January 2016.

2.10.6. 29/11/2017

- [Validation Rules](#)
 - Fixed spelling error in [1. Practitioner](#) point 1.

2.10.7. 28/11/2017

- [Validation Rules](#)
 - Rewrote the validation rules to follow the guidelines in RFC 2119.
 - Changed bullet lists to enumerated lists to make rules easier to identify.
 - Updated [3. Episode](#) to clarify how [Episode - Completion Status](#) and [Episode - End Date](#) interact (Point 4.)

2.10.8. 25/10/2017

- [Upload specification](#)
 - Updated [Deleting records](#)

2.10.9. 16/10/2017

- [Validation Rules](#)
 - Updated [3. Episode](#) to clarify which episode closed responses are allowed to be recorded when [Service Contact - Final](#) is recorded as '1: No further services are planned for the client in the current episode'
 - Updated [2. Client](#) to make the final point clearer.

2.10.10. 11/10/2017

- [Identifier management](#)
 - Updated [Managing Practitioner, Episode, Service Contact and Outcome Collection Occasion Keys](#)
- [Data model and specifications](#)
 - [Record formats](#)
 - [Service Contact](#)
 - Added notes for [Service Contact - Modality](#) response code 4: 'Internet-based'

2.10.11. 03/10/2017

- Added [Test Data Sets](#)
- [Validation Rules](#)
 - Updated [3. Episode](#) to specify when the [!ATAPS](#) flag can be used in [Episode - Tags](#)

- Updated [4. Service Contact](#) to remove the validation ‘Where an [Episode - End Date](#) has been recorded, there must be a service contact with [Service Contact - Final](#) set to ‘1: No further services are planned for the client in the current episode’’
- Updated [4. Service Contact](#) to specify when the [!ATAPS](#) flag can be used in [Service Contact - Tags](#)
- Updated [5. K10+](#) to specify that [Collection Occasion - Measure Date](#) must not be after [Episode - End Date](#)
- Updated [6. K5](#) to specify that [Collection Occasion - Measure Date](#) must not be after [Episode - End Date](#)
- Updated [7. SDQ](#) to specify that [Collection Occasion - Measure Date](#) must not be after [Episode - End Date](#)

2.10.12. 25/9/2017 - Version 1.0.11

- [Upload specification](#)
 - Added [Deleting records](#)
- [Data model and specifications](#)
 - [Record formats](#)
 - [Episode](#)
 - Updated [Episode - Completion Status](#) to allow either 0 or blank to represent ‘Episode open’
 - [Service Contact](#)
 - Clarified that the upper bound for [Service Contact - Copayment](#) is 999999.99
 - Updated [Service Contact - Participants](#) and [Service Contact - Client Participation Indicator](#) to clarify how [Service Contact - Participants](#) and [Service Contact - Client Participation Indicator](#) interact
- [Validation Rules](#)
 - Updated [Validation Rules](#) to clarify how [Service Contact - Participants](#) and [Service Contact - Client Participation Indicator](#) interact

2.10.13. 29/8/2017

- [Identifier management](#)
 - Updated [Managing Client Keys](#) reference to clarify future development
 - Updated [Managing Practitioner, Episode, Service Contact and Outcome Collection Occasion Keys](#) and specification links

2.10.14. 25/8/2017

- [Upload specification](#)
 - Updated [Upload specification](#) to include provider organisations.

2.10.15. 23/8/2017

- Added [Validation Rules](#)
- Data model and specifications
 - [Record formats](#)
 - [Practitioner](#)

- Updated [Practitioner - Year of Birth](#) to clarify which years are valid.
- Client
 - Updated [Client - Date of Birth](#) to clarify that future dates are not valid.
- Episode
 - Updated [Episode - End Date](#) to clarify that future dates are not valid.
 - Updated [Episode - Area of usual residence, postcode](#) to clarify which postcodes are valid.
 - Updated [Episode - Referral Date](#) to clarify that future dates are not valid.
- Service Contact
 - Updated [Service Contact - Date](#) to clarify that future dates are not valid.
 - Updated [Service Contact - Postcode](#) to clarify the ranges of postcodes that are valid.
- Outcome Collection Occasion
 - Updated [Collection Occasion - Measure Date](#) to clarify that future dates are not valid.

2.10.16. 28/7/2017

- [ATAPS MDS to PMHC MDS data mapping](#)
 - Updated to show the mapping of ATAPS MDS diagnosis fields to PMHC Principal Diagnosis and Additional Diagnosis where two ATAPS diagnosis fields have been specified

2.10.17. 24/7/2017

- Data model and specifications
 - Upload specification
 - Example file updated so that practitioners file/worksheet validates correctly

2.10.18. 6/7/2017 - Version 1.0.10

- Data model and specifications
 - Data model
 - Updated data model diagram following Department of Health communication on 21 June, 2017 regarding the Master Client Index

2.10.19. 30/6/2017 - Version 1.0.9

- Data model and specifications
 - Record formats
 - Provider Organisation
 - Updated [Provider Organisation](#) to add the following field:
 - [Provider Organisation - Status](#)

2.10.20. 26/6/2017 - Version 1.0.8

- Data model and specifications
 - Record formats

- Episode
 - Updated [Episode - Additional Diagnosis](#) to add the following response codes:
 - 000: No additional diagnosis
 - 100: Anxiety disorders (ATAPS)
 - 200: Affective (Mood) disorders (ATAPS)
 - 300: Substance use disorders (ATAPS)
 - 400: Psychotic disorders (ATAPS)
 - Updated [Episode - Principal Diagnosis](#) to add the following response codes:
 - 100: Anxiety disorders (ATAPS)
 - 200: Affective (Mood) disorders (ATAPS)
 - 300: Substance use disorders (ATAPS)
 - 400: Psychotic disorders (ATAPS)
- Service Contact
 - Updated [Service Contact - Type](#) to add the following response code:
 - 98: ATAPS
- Added [ATAPS MDS to PMHC MDS data mapping](#)

2.10.21. 14/6/2017 - Version 1.0.7

- Data model and specifications
 - Record formats
 - Service Contact
 - Updated [Service Contact - Duration](#) to add response 0: 'No contact took place'.
 - Updated [Service Contact - Duration](#) response 1 from '0-15 mins' to '1-15 mins'.
 - Updated [Service Contact - Type](#) to add response 0: 'No contact took place'.
 - Updated [Service Contact - Modality](#) to add response 0: 'No contact took place'.

2.10.22. 18/5/2017 - Version 1.0.6

- Data model and specifications
 - Record formats
 - Practitioner
 - Updated [Organisation Path](#) to specify the Provider Organisation providing a service to the client.
 - Updated [Organisation Key](#) to specify the key uniquely identifies the Provider Organisation to the Primary Health Network.
 - Client
 - Updated [Organisation Path](#) to specify the Provider Organisation providing a service to the client.
 - Updated [Organisation Key](#) to specify the key uniquely identifies the Provider Organisation to the Primary Health Network.
 - Episode
 - Updated [Organisation Path](#) to specify the Provider Organisation providing a service to the client.
 - Updated [Organisation Key](#) to specify the key uniquely identifies the Provider Organisation to the Primary Health Network.

- Collection Occasion
 - Updated [Organisation Path](#) to specify the Provider Organisation providing a service to the client.
 - Updated [Organisation Key](#) to specify the key uniquely identifies the Provider Organisation to the Primary Health Network.
- Service Contact
 - Updated [Organisation Path](#) to specify the Provider Organisation providing a service to the client.
 - Updated [Organisation Key](#) to specify the key uniquely identifies the Provider Organisation to the Primary Health Network.

 - Updated [Upload specification](#) to specify practitioners.csv filename in zipped CSV uploads.

2.10.23. 1/5/2017 - Version 1.0.5

- Data model and specifications
 - Record formats
 - Episode
 - Added more description to [Episode - Client Consent to Anonymised Data](#)
 - Service Contact
 - Changed wording of [Service Contact - No Show](#) to specify 'intended participant(s)' instead of 'client'
 - Outcome Collection Occasion
 - [K10+](#) updated reference to Q11-14 'missing' replacing 'not applicable'.

2.10.24. 8/2/2017 - Version 1.0.4

- Data model and specifications
 - [Data model](#) - Updated the data model diagram to explicitly show Primary Health Organisations and Provider Organisations.
 - Record formats
 - Client
 - Added more description to [Organisation Path](#)
 - Episode
 - Added more description to [Organisation Path](#)
 - [Episode - Homelessness Flag](#) updated to include missing/not stated value of 9
 - Service Contact
 - Added more description to [Organisation Path](#)
 - Collection Occasion
 - Added more description to [Organisation Path](#)
 - Practitioner
 - Added more description to [Organisation Path](#)

2.10.25. 21/10/2016 - Version 1.0.3

- Data model and specifications
 - Record formats
 - Outcome Collection Occasion
 - [Collection Occasion - Measure Date](#) updated to include missing value of 09099999

2.10.26. 14/10/2016 - Version 1.0.2

- Data model and specifications
 - Record formats
 - Outcome Collection Occasion
 - Updated [SDQ](#) by adding [SDQ items and Scale Summary scores](#) subsection

2.10.27. 6/10/2016 - Version 1.0.1

- Data model and specifications
 - Record formats
 - [Episode - Principal Focus of Treatment Plan](#) - Updated response 4 from 'Complex care package for adults' to 'Complex care package'
 - [Episode - Source of Cash Income](#) - Added 0 as a valid response for when the client is aged less than 16 years
 - Definitions
 - Added required field to all definitions

2.10.28. 18/9/2016 - Updates between final draft version and Version 1

- Reporting arrangements
 - [Uploading data](#) section expanded
 - 'Upload frequency' section renamed [Reporting timeliness](#) and expanded
- Data model and specifications
 - Updated [Data model](#) diagrams including addition of collection occasion total and sub scores
 - Added [Key concepts](#) section
 - Record formats
 - Added lengths to all string types
 - Added minimum and maximum values to number types
 - Added links to Australian Bureau of Statistics (ABS) definitions
 - [Provider Organisation - Type](#) updated domain
 - [Client - Country of Birth](#) - Fully specified domain
 - [Client - Main Language Spoken at Home](#) - Fully specified domain
 - Episode - Client Consent to De-identified Data renamed [Episode - Client Consent to Anonymised Data](#)
 - [Episode - Completion Status](#) - Added blank as a valid response to mean that the episode is still open

- [Episode - Principal Focus of Treatment Plan](#) - 4 = 'Complex care package for adults' renamed 'Complex Care Package' and notes updated.
- [Episode - Principal Diagnosis](#) - 999 = 'Missing' response option added
- [Service Contact - Participants](#) - 4 = 'Other health professional or service provider' response option added
- [Service Contact - Participants](#) - 5 = 'Other' response option added
- [Service Contact - Venue](#) - 99 = 'Not stated' response option added
- [Outcome Collection Occasion](#)
 - Total scores and sub scores will be accepted in the short term Individual item scores will eventually be required
 - [K10+](#) - Score added
 - [K5](#) - Score added
 - [SDQ - Emotional Symptoms Scale](#) added
 - [SDQ - Conduct Problem Scale](#) added
 - [SDQ - Hyperactivity Scale](#) added
 - [SDQ - Peer Problem Scale](#) added
 - [SDQ - Prosocial Scale](#) added
 - [SDQ - Total Difficulties Score](#) added
 - [SDQ - Impact Score](#) added
- [Upload specification](#)
 - CSV files must be compressed into a single zip file before uploading
 - Example organisation structure added
 - All files/worksheet must be internally consistent
- Added [Using the data specification to create client forms](#)

2.10.29. 9/8/2016 - Updates since last release

- Updated [Data model](#) diagrams including addition of collection occasions
- Renumbered [Provider Organisation - Type](#) response options
- Updated description of [Practitioner](#) record type
- Removal of Episode - Start Date from the [Episode](#) record layout as it is derived from the first service contact
- Added [Episode - Client Consent to Anonymised Data](#) field
- [Episode - Completion Status:](#)
 - Added option Episode closed administratively - client referred elsewhere
 - Recoded Episode closed administratively - other reason
 - Updated explanations of response options.
- Added [Episode - GP Mental Health Treatment Plan Flag](#)
- [Service Contact - Duration](#) added response options
- [Outcome Collection Occasion](#)
 - Updated definition
 - Added explicit record types for [K10+](#), [K5](#), and [SDQ](#)
- [Client - Country of Birth](#) now refers to recently released ABS 2016 release

- [Client Key](#) - Updated definition
- [Client - Main Language Spoken at Home](#) now refers to recently released ABS 2016 release
- [Episode Key](#) - Updated definition
- [Organisation Path](#) - Added definition
- [Practitioner - ATSI Cultural Training](#) - updated definition
- [Service Contact - Type](#) - 8 = 'Cultural specific assistance NEC' response option updated definition
- Added "tags" field to all record types. e.g. [Client - Tags](#).

3. Frequently Asked Questions

3.1. Concepts and Processes Frequently Asked Questions

3.1.1. Questions about the scope of the MDS

PHNs raised a number of questions regarding the scope of the MDS and whether specific areas of commissioned activity were intended to be covered. The [Overview paper](#) covers the scope issue (page 4), an extract of which is copied below:

"The new arrangements are designed to capture data on PHN-commissioned mental health services delivered to individual clients, including group-based delivery to individual clients ...

The scope of coverage will not extend to services targeted at communities, such as the community capacity building activities previously funded under projects sourced from National Suicide Prevention Program funding. Collection and reporting of activities of this type requires a different approach to 'counting' and identification of the 'client'. PHNs commissioning activities of this type will have flexibility to establish local data reporting arrangements that suit requirements."

PHNs raised a number of questions to further clarify the scope of the PMHC MDS, summarised below.

3.1.1.1. Coverage of community-based suicide prevention activities

Activities such as mental health and suicide awareness training and whole of community health promotion programs (non-clinical services) (e.g., Farm-Link) targeted at groups or whole communities, are not a good fit for the PMHC MDS They are currently reported to the National Suicide Prevention Program MDS which finishes on the 30th June 2016. What is the mechanism for the future?

PHN-commissioned services of this type are outside the scope of the PMHC MDS.

Regional whole-of-community suicide prevention activities previously funded directly by the Department and now transferred to PHNs (e.g., Farm-Link) have previously reported to the National Suicide Prevention Program MDS managed by Australian Healthcare Associates under contract to the Department. The Department is currently exploring options to continue this collection and will advise PHNs accordingly, with a view to ensuring continuity of reporting of community-based suicide prevention activities.

Suicide prevention oriented services provided to individuals are in scope for collection and reporting to the PMHC MDS.

3.1.1.2. Coverage of digital health services

3.1.1.2.1. Are the PHNs expected to collect and upload all of the data outlined under the 6 Mental Health Priority Areas? If so it will be difficult to collect this data for referrals made to e-mental health sites such as mood gym, mind spot etc. There are also challenges around self-help groups.

As indicated, scope of coverage is all PHN-commissioned mental health services delivered to individual clients, regardless of mode of service delivery.

Digital health services present particular challenges that need to be unbundled to resolve a way forward. Where PHNs refer the consumer to self-help, clinician unmoderated assistance (e.g., Mood Gym), this is not a PHN-commissioned service as such and falls outside of the scope of collection. Similarly, referral to a nationally funded clinician-moderated service such as Mindspot is not a PHN-commissioned services and falls outside of scope, bypassing the need for data collection.

However, there are acknowledged issues where a PHN enters a funding agreement with a digital health provider to provide individually tailored, clinician-moderated services to specific populations within their regions. Such services clearly fall within scope. The Department is considering the options to capture the required data. These include setting up arrangements for digital providers to collect and submit data on behalf of PHNs.

3.1.1.3. Coverage of whole of region services regardless of who funds

3.1.1.3.1. Are we only reporting on services and processes that we are commissioning and undertaking or the region as a whole?

The PMHC MDS is designed to cover only those services commissioned by PHNs.

3.1.1.4. Appropriateness of occasions of service as a counting measure

3.1.1.4.1. This unit of counting is not appropriate for the full range of services that might be commissioned by PHNs, for example, whole of community-oriented prevention activities

This is agreed. The scope of the PMHC MDS does not cover every activity that a PHN may commission.

Where activities are outside the scope of the PMHC MDS, PHNS are expected to set up their own arrangements to collect data suitable for reporting purposes. See also the response above regarding [Coverage of community-based suicide prevention activities](#).

3.1.1.5. Exclusion of 'non clinical' time

3.1.1.5.1. The MDS only captures actual clinical time. Administrative tasks such as arranging for case conferences, updating electronic health information records, undertaking program contractual management tasks, travelling to service provision venue amongst others, are currently not being captured.

The focus of the PMHC MDS collection is on clinical service delivery to individual clients. It is acknowledged that clinician have to undertake other activities to maintain their clinical work and time spent on these can be significant. However, any broadening of scope to include as mandatory other activities would create an unacceptable data reporting burden on clinical service providers, all of whom are practitioners independent of the PHN.

It should be noted however that the PMHC MDS differs from the previous ATAPS collection in allowing a range of services delivered 'on behalf' of the client to be recorded. Section 4.4 of the Overview paper ('Determining what activities are in scope for reporting as service contacts') provides the relevant details.

3.1.1.6. Are headspace services covered by the requirements?

3.1.1.6.1. Are services funded through headspace expected to collect the PHMC MDS?

First-stage development of the MDS will not include existing youth-specific services (headspace, Early Psychosis Youth Services) that currently collect and report a standardised dataset to headspace National Office. Pending the future of these arrangements, and access to data by PHNs, the PHMC MDS can be expanded at a future stage to allow incorporation of headspace and Early Psychosis Youth Services should this be required.

3.1.1.7. Are EPYS centres covered?

3.1.1.7.1. Are services funded as Early Psychosis Centres expected to collect the PHMC MDS?

First-stage development of the MDS will not include existing youth-specific services (headspace, Early Psychosis Youth Services) that currently collect and report a standardised dataset to headspace National Office. Pending the future of these arrangements, and access to data by PHNs, the PHMC MDS can be expanded at a future stage to allow incorporation of headspace and Early Psychosis Youth Services should this be required.

3.1.1.8. Coverage of Mental Health Nursing services

3.1.1.8.1. Are services previously delivered under MHNIP expected to collect the PHMC MDS?

From July 2016, funding has been provided to PHNs through a flexible funding pool to enable commissioning of a wide range of primary mental healthcare and suicide prevention services at regional levels. As such the MHNIP and other programs that have transitioned into the flexible funding pool, and their associated guidelines, are no longer applicable.

All 31 PHNs are required to collect and enter/upload data into the PMHC MDS. The PMHC MDS has been developed to capture the broader range of mental health services now being commissioned by PHNs, including services previously delivered under MHNIP. However, principal responsibility for establishing regional arrangements for data collection and reporting rests with PHNs.

3.1.2. Questions about Specific Data Items and Definitions

3.1.2.1. Provider Organisation

3.1.2.1.1. Provider organisation – solo practitioners: If the organisation is a sole trader private practitioner, does the organisation name become the providers name?

The sole practitioner should use the trading name against which they have registered their ABN.

3.1.2.1.2. Provider Organisation ABN: Why is this needed?

Understanding the characteristics and number of Provider Organisations is important for both regional and national planning purposes, and requires an approach that uniquely identifies organisations. While Provider Organisation identifiers are set up by PHNs, these are only unique at the regional level. They therefore do not allow a national picture of the number and type of organisations engaged in the delivery of primary mental health care.

The ABN provides a simple and nationally unique organisation identifier. Organisation ABNs are also public domain information, being available via the Australian Business Register website.

...

3.1.2.2. Practitioner

3.1.2.2.1. Practitioner category: Should there be separate categories for accredited mental health social workers and occupational therapists in mental health?

The coding options allows for separate identification of social workers and occupational therapists. PHNs are free to add additional details to their local collection on the proviso that any additions are capable of being mapped to the national MDS categories.

3.1.2.2.2. Principal Focus of Treatment Plan – Psychological Therapy: Is the Department going to provide a firm definition of a mental health professional under the new specifications – noting the intent of increased flexibility to provide a workforce of mixed and flexible professional background?

The concept of 'mental health professionals' has a specific meaning defined in the various guidance documentation prepared to support PHNs in implementation of reforms. It refers to service providers who meet the requirements for registration, credentialing or recognition as a qualified mental health professional and includes:

- Psychiatrists

- Registered Psychologists
- Clinical Psychologists
- Mental Health Nurses
- Occupational Therapists
- Social Workers
- Aboriginal and Torres Strait Islander health workers.

...

3.1.2.3. Client

3.1.2.3.1. Gender: Should there be consistency in how Practitioner and Client gender are collected?

Yes. The data coding options are the same for both items and based on the new standards recently released by Australian Government Guidelines on the Recognition of Sex and Gender.

3.1.2.3.2. Statistical Linkage Keys (SLK) - will these be generated in a similar manner to the ATAPS MDS?

Yes.

Details on how the SLKs are created, are currently available on the [PMHC MDS Specifications - SLK](#). An SLK Generator has been developed on the [PMHC MDS - SLK tab](#).

See [SLK](#) for details how to use this feature.

...

3.1.2.4. Episode

3.1.2.4.1. Diagnosis: Is this required across all service delivery areas, including low intensity services?

Yes. While low intensity workers will not be qualified to assign a clinical diagnosis, it is expected that they will be working under the supervision of a clinically qualified mental health professional.

3.1.2.4.2. Diagnosis - DSM-IV: Why isn't DSM-V used as the standard given that that is the most current classification system?

The DSM-IV is the diagnostic classification currently used by the majority of Australian mental health clinicians. Any move to DSM-V would require confidence that most clinicians providing services through PHN commissioning arrangements have had training in, and moved across to, the new system. The Department does not believe that this is the case. Pending uptake of DSM-V, there is scope to change to the new classification in future versions of the PMHC MDS.

Additionally, as the diagnostic codes included in the PMHC MDS represent an abbreviated 'pick list', the decision to use either DSM-IV or DSM-V will not have material impact given the substantial common ground between the two classifications.

3.1.2.4.3. Episode - Completion Status: If the client is referred elsewhere (i.e. not suitable for this service) would this be recorded as "Episode closed administratively-other reason" or should there be an additional code to capture this information?

Under the new PMHC MDS, an episode does not formally commence until the client receives their first Service Contact. For referrals that do not lead to a Service Contact, and where the person is referred elsewhere, there is no need to open an Episode. However, based on previous experience with the ATAPS system, the Department understands that many PHNs are likely to want to do this as a means to track referrals that do not lead to Service Contacts, or to begin entering data prior to the first Service Contact. Therefore, there will be scope in the system to set up an Episode even if it does not lead to a Service Contact. Standard reports to be developed will build in capacity to monitor these and ensure that they are not counted in service delivery indicators. Where a referral is followed by an initial Service Contact, and the person is referred elsewhere due to being assessed as not suitable, or requires an alternative service, a new code for Episode- Completion Status has been added ('Episode closed administratively - client referred elsewhere').

3.1.2.4.4. GP mental health treatment plan: Can we include an item to capture whether the client has GP mental health treatment plan? Would be very useful from a planning and commissioning perspective.

The Department agrees that this is a useful item for both PHN and national purposes. It has been added to the final Version 1 specifications and is to be reported at the level of Episodes of Care.

3.1.2.4.5. Source of Cash Income, Income range: What is the rationale for these items? They are not relevant to PHNs and providers may not be comfortable in asking the questions.

Both items were intended to address key indicators of socioeconomic disadvantage of the consumers using PHN-commissioned services. The intent is to replace the previous 'low income' data item of the previous ATAPS/MHSRRA dataset which was poorly defined and of doubtful reliability.

Based on discussions we believe the intent of these data items is understood by most PHNs.

'Source of cash income' is a standard Meteor item that importantly, identifies whether the consumer is receiving government income support through a Disability Support Pension or other means. It is used in a number of data collections covering Australia Government funded human services.

Income range was intended as a supplementary measure to identify low income consumers. The Department has considered the feedback and agrees this data item is not the appropriate approach. It has been replaced by an alternative item - 'Health Care Card holder'.

The Department considers it essential for the data collection to have a reliable approach to identifying consumers who are economically challenged.

3.1.2.4.6. One episode of care at a time: We have clients who are receiving treatment at multiple programs and require multiple episodes with different 'Principal Focus of Treatment Plan'. The PMHC MDS only allows one episode at a time for each client, defined at the level of the provider organisation. What do we do?

The 'one episode at a time per organisation' rule is fundamental to the concepts underpinning the MDS. This rule has important implications, and is based on the long standing principle that, in bringing together all the various services used by an individual during their healthcare for a particular illness, the episode of care should be bundled to the highest level possible. This allows for a more accurate approach to understanding costs and outcomes at the patient level. A single episode of care may entail multiple service types, and service events which in some systems are bundled together under the concept of 'service episodes'. This situation is common in mental health care; for example where a consumer is simultaneously under the care of a community mental health team and a separate day program. Typically, the patient is registered at both centres and contacts are separately recorded by each service or team. But it's important to not confuse such 'service episodes', which are based on service characteristics, with the episode of care concept, which is patient based.

So the short response to the query is that no, the 'one episode of care at a time per organisation rule' should not be breached. The fact that the person is receiving multiple service types during the course of their episode is not a reason to break their care down into multiple episodes. Doing so would have consequences of subjecting the person to two sets of data collection and outcome measures (noting outcomes are needed for each episode).

It is essential the following aspects of the way episode types (as denoted by the Principal Focus of Treatment Plan) are conceptualised:

1. A single episode may include heterogeneous services, as outlined above.
2. The mix of services provided during a single episode is captured by the Service Type data item - collected at each Service Contact.
3. Classifying the episode type by Principal Focus of Treatment Plan requires a judgement to be made about the main focus of the services to be delivered to the client for the current episode of care following initial assessment. It is important to note that can be modified at a later stage if the initial judgement made proved to be incorrect.
4. Episodes are not defined by the source of funding.

Further detail on the concepts underpinning the PMHC MDS are outlined in the Overview paper at
<https://www.pmhc-mds.com/doc/pmhcmds-overview.pdf>

Several PHN organisations have also queried whether a new and separate episode can be opened when a client is shifted to a significantly different type of care from that originally envisaged. The PMHC does not require this, but also the PMHC does not prevent it. It's a clinical decision that can be made - i.e. a new episode can be opened (after the previous one is closed) when there is a significant shift in the type of care provided e.g., the client begins with a Low Intensity episode, because it was envisaged that the episode would be relatively brief/inexpensive, but in the course of treatment it became clear that the client had complex mental health issues that would warrant

higher intensity services and over a more prolonged period. In such instances, the original episode can be closed, and a new one opened. However, the department does not believe this to be the best alternative as it artificially segments a continuous course of treatment into multiple episodes.

One innovation suggested by some PHNs is to establish a mechanism in the MDS collection to identify where an episode is closed to allow the person to be stepped up, or down, to a lower level of care. Specifically, the suggestion has been made that a new coding option should be added to the Episode Completion Status field to identify episodes that end due to a change in the type of care. The department will consider this as part of any changes made to the MDS in the future.

...

3.1.2.5. Service Contact

3.1.2.5.1. Service contact - Definition: Does the definition extend to the writing of reports to assist the client in accessing appropriate services etc (although this may not involve 2 people)?

No. See response to [Exclusion of 'non clinical' time](#).

As stated in the Overview paper, Service contacts are defined as “the provision of a service by a PHN commissioned mental health service provider for a client where the nature of the service would normally warrant a dated entry in the clinical record of the client and:

- must involve at least two persons, one of whom must be a mental health service provider, and
- can be either with the client or with a third party, such as a carer or family member, and/or other professional or mental health worker, or another service provider.

3.1.2.5.2. Service Contact - Duration: It is unclear if the expectation is to calculate all occasions of contact for an individual consumer over an entire 24-hour day or every individual contact recorded separately. A 24-hour or full work day summation of time would be useful.

In general, it is expected that each Service Contact is reported separately. However, PHNs have discretion on how to handle multiple contacts on a single day. The approach taken will depend on how PHNs commission and remunerate service providers. We have assumed that most services will be paid on a service contacts-as-delivered basis, and thus PHNS will want to track these. But where PHNs opt to remunerate at whole-of-episode of care basis, aggregating Service Contact-Duration to whole days may be a more efficient approach.

3.1.2.5.3. Service Contact – No Show: When item “Service Contact - No Show” is selected as “Yes”, it would be useful to capture how that time of appointment was used.

The creation of the ‘No Show’ item represents a carry-over from the previous ATAPS collection, and was created at the request of the former Medicare Locals to monitor the extent to which this was impacting. As it does not represent a service contact as such, the Department does not believe it to be reasonable to require practitioners to report on how they used the ‘no show’ time.

3.1.2.5.4. Service Contact – Type: This item includes limited options of the actual service function delivered e.g., more detailed information - CBT, ACT, DBT, mindfulness etc. These are all grouped under the category of structured psychological

The approach taken in the PMHC MDS is to use a higher level grouping of interventions provided at each contact, designed to provide a simpler set of options for the practitioner to select from. More detailed lists of intervention types, where the provider is required to select from a long list of options, creates 'selection burden' on the provider and has proved of doubtful reliability. The former ATAPS system used a more detailed reporting on interventions, with practitioners reporting on the types of psychological interventions used, but this has not proved to be useful for regional or national purposes.

3.1.2.5.5. Service Contact – Type: Is it possible to obtain further examples of "structured psychological interventions" and "other psychological interventions"? e.g., where would narrative therapy fit?

The rationale for this item is explained in the Overview paper, along with definitions of the following major categories:

- Assessment
- Structured psychological intervention
- Other psychological intervention
- Clinical care coordination/liaison
- Clinical nursing services
- Child or youth specific assistance NEC
- Suicide prevention specific assistance NEC
- Cultural specific assistance NEC

Exhaustive inclusion lists are not provided, but structured psychological interventions are indicated to include, but not be limited to:

- Psycho-education (including motivational interviewing)
- Cognitive-behavioural therapies
- Relaxation strategies
- Skills training
- Interpersonal therapy

Narrative therapy would best fit in the category 'Other Psychological interventions', defined as those psychological interventions that do meet criteria for structured psychological intervention.

...

3.1.3. Questions about Standard Outcome Measures

3.1.3.1. Consumer experience measures

3.1.3.1.1. Why isn't a measure of consumer experience of services added to the PMHC MDS? This is needed to capture a person centred approach to commissioned services. Is the Department planning on developing a standard measure for use by PHNs?

The Department has previously acknowledged the importance of capturing consumer experience of service delivery as an essential measure of service quality. Considerable work has been funded by the Department since 2010 to develop the 'Your Experience of Services' (YES) consumer survey instrument that is currently being rolled out in several state and territory mental health services and non-government agencies. However, this instrument will need modification to enable a better fit to primary mental health care services and the Department will give this consideration. It is agreed that a nationally consistent tool is highly desirable.

An important caveat is that, assuming a national tool is developed, any collection would sit outside a routine minimum data set collection. Consumer experience measures are usually offered to consumers on a voluntary, opt-in basis and are completed anonymously in way that is not linked to MDS data. They are also usually collected on a periodic basis (e.g., annually) rather than as a routine requirement of service delivery, unlike standard outcome measures.

Further work on this will be considered as a component of establishing a quality framework for primary mental health care services.

3.1.3.2. Alternative outcome measures – for severe mental illness

3.1.3.2.1. The K10 has been selected as the outcome tool across all populations. Is there scope to include an alternative measure for those with severe mental illness?

The issues entailed in the specification of mandatory outcome measures are covered in section 4.7 of the Overview paper. Key selection criteria include that the core measures should be meaningful and applicable across all client groups, be capable of being used by all service providers, and reflect the client's perspective – that is, be based on self-report. The K10 is regarded as meeting all these essential elements. An important note is that the K10 is the mandatory measure used by four state and territory jurisdictions' specialised mental health services which predominantly focus on consumers with severe mental illness. Nationally, the K10+ is the consumer self-report outcome measure that has the highest level of consumer uptake across state and territory mental health services.

Each PHN has the capacity to add additional outcome measures to their own regional data collection systems to meet local requirements but these are not necessary for reporting the national data PMHC minimum data set.

3.1.3.3. Alternative measures – additional measures set by PHNS

3.1.3.3.1. Can the measures be extended to include the Depression, Anxiety Stress Scale (DASS) and Modified Scale Suicide Ideation (MSSI)?

As per [Capturing additional data](#), each PHN has the capacity to add additional outcome measures to their own regional data collection systems to meet local requirements but these are not necessary for reporting the national data PMHC minimum data set.

3.1.3.4. Mandatory measures – applicable to all priority areas?

3.1.3.4.1. Is the K10 and SDQ for children going to be required across all priority areas?

Yes – noting that the K5 is included as an alternative to the K10 for use with Aboriginal and Torres Strait Islander clients.

3.1.3.5. Use of collection reported by Referrer

3.1.3.5.1. Does the collection occasion date (for the first outcome measure) need to correspond to the first service contact date? It is possible that the referrer may have already completed this measure with the client at time of referral.

The first Collection Occasion for the outcome measure should correspond as closely as possible to the Episode Start date. If the measure has been collected and reported by the Referrer shortly before this date, it is acceptable for those scores to be used even though it will predate the Episode Start date.

3.1.3.6. K5 for Aboriginal and Torres Strait Islander population

3.1.3.6.1. The definitions document details the K10+, K5 and SDQ as the possible measures but the PMHC MDS overview document only mentions the K10+ for adults and the SDQ for children and young people. Is the K5 recommended for an Aboriginal and Torres Strait Islander population?

The K5 is included as an alternative to the K10 for use with Aboriginal and Torres Strait Islander clients. A version of the instrument will be made available on the PMHC MDS website. The overview document will be amended accordingly to include the K5.

3.1.3.7. SDQ for 2-4 year olds

3.1.3.7.1. We collect data for younger children using the SDQ 2-4 year olds. Please clarify whether we should continue this, given that the SDQ is listed as covering only 4- 11 year olds.

There are no mandated measures for children less than 4 years of age simply because there is not yet a nationally agreed standard for this age group. Work is under way to redesign the HoNOSCA but that is not yet complete. PHNs do however have the flexibility to add additional measures to meet local requirements but these are not included in the PMH MDS.

3.1.3.8. Multiple collection occasions

3.1.3.8.1. It is essential that the PMHC MDS have capacity for numerous outcome measure scores to be recorded against a single episode.

The new arrangements will allow this. Collection Occasions between Episode Start and Episode End are termed 'Review'. There is no limit in the number of Review Collection Occasions.

3.1.3.9. Outcome measure date

3.1.3.9.1. To gather meaningful clinical outcome data, the PMHC MDS needs to allow a date to be added against each measure administered.

The data item Collection Occasion Date is included in the PMHC MDS to achieve this.

3.1.3.10. Low intensity workers

3.1.3.10.1. Use of clinical outcome measure for low intensity interventions is questionable given non-mental health professionals will deliver this service.

The mandated measures are based on consumer self-report rather than clinician-completed. They can be offered and collected by low intensity workers.

3.1.3.11. Reporting individual item scores versus subscale totals and total score

3.1.3.11.1. The ATAPS system only required totals and subscale scores to be reported but the PMHC MDS requires all individual scores to be reported. This may not be practical for many service providers because it adds a significant reporting burden.

The PMHC MDS requires individual item scores because these provide a stronger basis for understanding outcomes, and avoid the necessity for providers having to calculate subscale scores (on the SDQ). However, it is acknowledged that this may not be possible in the short term for all providers. Therefore, as a transitional step, reporting overall scores/subscales is allowed. This means:

- For the K10+, providers can either report all 14 item scores or report the K10 total score as well as item scores for the 4 extra items in the K10+.
- For the K5, providers can either report all 5 item scores or report the K5 total score.
- For the SDQ, providers can either report all 42 item scores or report the SDQ subscale scores.

The Department will advise PHNs of when this transitional arrangement will be ceased and individual item scores required for all measures.

Additionally, the Department is giving consideration to developing a web-based reporting arrangement that would allow the client to complete and submit the outcomes data, bypassing the need for practitioners to undertake collection and reporting.

3.1.3.12. Statistical significance

3.1.3.12.1. Please specify whether measured changes should be statistically significant.

No, the data required for the immediate future by the PMHC MDS are individual item scores, or as noted above, subscale scores and totals. These will be used to derive a range of change indicators.

3.1.3.13. MHNIP outcome measures

3.1.3.13.1. The PHMC MDS requires the K10+, K5 or SDQ to be captured, however for MHNIP the DoH 2015-16 guidelines requires providers to capture the HoNOS. Can we record HoNOS through PMHC MDS?

The PMHC MDS is designed to monitor and evaluate regional service delivery against key mental health performance indicators. The PMHC MDS does not confine PHNs to the data specified. Rather, it sets the minimum and common ground for what data are to be collected and reported for mental health services commissioned by PHNs. It is anticipated that many PHNs will seek to collect an enhanced set of data to meet local needs, however this data will not be submitted to the MDS. Therefore, a PHN can of course continue to collect additional outcome measures such as the HoNOS in relation to specific service/episode types but this is at their discretion and will not form part of the MDS at this time.

3.1.4. Questions about privacy protections and patient consent

3.1.4.1. Privacy and patient consent

The Commonwealth Privacy Act 1988 and associated Australian Privacy Principles (APPs) in Schedule 1 of that Act set the overarching requirements for the collection and use of all personal information by organisations and entities involved in the Primary Mental Health Care Minimum Data Set (PMHC MDS). A key feature to the operation of the PMHC MDS is based on obtaining client consent to the collection, use and disclosure of their personal information.

Specific responses to two issues commonly raised are provided below.

3.1.4.1.1. (a) Can PHNs collect the required MDS data?

Under Australian Privacy Principle (APP) 3, an organisation can collect health information where it is reasonably necessary for its functions or activities, and the individual concerned consents to the collection, or another exception applies.

As commissioners and regional planners, PHNs require a range of data to remunerate service providers as well as monitor overall regional service provision and plan future service improvements. These are all core functions of PHNs and require that PHNs collect and analyse data on what services are delivered, to what clients, at what costs and with what outcomes. Without data, PHNs cannot undertake these functions.

Additionally, most PHNs have set up centralised referral coordination points to which the GP or other referrer forwards client and referral details. This centralised function allows referrals to be processed and services selected to match the client's needs as well as giving the PHN an efficient method for managing demand.

Client consent is critical to the process. While APP 3 includes provision for health information to be collected without consent under the 'health management activities exception', the conditions for this are limited and may not be applicable (see <https://www.oaic.gov.au/engage-with-us/consultations/healthprivacy-guidance/business-resource-collecting-using-and-disclosing-health-information-for-healthmanagement-activities>). Under the previous ATAPS/MHSRRA programs, PHNs set up appropriate consent processes for clients to agree to information being provided to the PHN. For most PHNs, specific forms are available on their websites for use by referrers or health practitioners, including versions that can be downloaded and integrated into GP clinical software, enabling secure electronic transmission to referral triage teams.

Most forms currently available on PHN websites relate only to the former ATAPS program and do not reflect the wider range of services to be delivered from mental health flexible funding. It is therefore recommended that PHNs review and update as required their consent processes to reflect the wider range of services that they are now responsible for commissioning.

3.1.4.1.2. (b) Can PHNs supply the data to the Department of Health?

Provision of information to the Department is necessary for government to undertake its role in funding, monitoring and planning future national service delivery.

Supply of PMHC MDS data by PHNs to the Department of Health is governed by APP 6 which regulates how an organisation may use and disclose the health information that it collects. Under APP 6, if an organisation collects health information for a particular or 'primary purpose', it generally cannot use or disclose that information for a 'secondary purpose' unless an exception applies. A specific exception under APP6 allows personal information to be used or disclosed for a 'secondary purpose' where there is client consent.

A new item has been added to PMHC MDS to confirm that client consent for data supply to the Department has been obtained. Any records attached to clients for whom the consent flag is not checked as 'yes' will not be passed to the Department.

PHNs should therefore ensure that the consent processes they establish include client consent to the provision of data to the Australian Government Department of Health.

The Department has prepared a set of standard words that can be used, or adapted as necessary, in any locally developed forms. These are available on the resources section of the PMHC MDS website (<https://www.pmhcmds.com/resources/>).

3.1.5. Questions about Unique Identifiers and 'Keys'

PHNs raised a number of queries about the assignment of unique keys. Client Keys must be unique and persistent for an individual across the entire PHN. It is the responsibility of the PHN to derive a format for these fields to be used across their commissioned organisations. Practitioner, Episode, Service Contact and Outcome Collection Occasion Keys will be managed by provider organisations and will be unique at the level of the provider organisation.

An important requirement to note is that Keys (or identifiers) are strings that can have a minimum length of 1 characters and a maximum length of 50 characters. Once assigned keys cannot be changed. The purpose of keys on each of the records is to provide a unique and persistent identifier in order to allow addition, update and deletion of each individual record. Responses to specific questions are provided below.

3.1.5.1. Client keys

3.1.5.1.1. Does the Department have any recommendations for assignment of the Client Key? Can the Department provide any further information regarding the process for allocation of region wide unique client identifiers?

Client Keys must be unique and persistent for an individual across the entire PHN. It is the responsibility of the PHN to derive a format for these fields to be used across their commissioned organisations.

Some PHNs have or are already implementing centralised client identifier ('key') allocation in order to facilitate services between their contracted provider organisations. For those PHNs without this capability a master client index will be created during [Stage Two](#) of the PMHC MDS implementation. The master client index will facilitate management of the client keys within the PHN independent of the provider organisation.

In the interim it is recommended that at the very least PHNs ensure that Client Keys issued by provider organisations do not overlap.

3.1.5.2. Episode keys

3.1.5.2.1. Could the Department provide further information about the purpose and creation of episode Keys?

The purpose of keys on each of the records is to provide a unique and persistent identifier in order to allow addition, update and deletion of each individual record without reference to items on that record which might need to change. e.g. correcting a patient key or date. This also applies to the other record types such as client and service contact.

3.1.5.3. Manual data entry via MDS interface

3.1.5.3.1. Do we need to create 'keys' if we intend to enter data directly into the MDS?

Stage One of the PMHC MDS will only allow upload, not direct data entry. Upload files will either be produced automatically from client systems or by hand via Excel spreadsheet. Therefore, all organisations uploading data to the PMHC MDS will need to provide keys for each record. Where data is being exported from client systems, these keys can be auto generated, provided that a key does not change once it is assigned to an item.

3.1.5.4. Practitioner identifiers

3.1.5.4.1. There is currently a jumble of systems for coding service providers, making it difficult to report against the 'delivered by whom' part of the complex multi-part question posed. How will this be improved?

The new MDS specifications include separate unique keys for Provider Organisation and Practitioner which are intended to resolve this problem

3.1.6. Questions about PHN access to the Data Warehouse

3.1.6.1. Data Warehouse

3.1.6.1.1. Data entered into PMHC data set will be stored in a national data warehouse. Will all of the information be accessible by PHN's for benchmarking and service development/collaborative purposes?

PHNs will have access to all de-identified data pertaining to their services but will not have access to the information of other PHNs.

Benchmarking and service development reports will be developed in a subsequent development stage with input from appropriate stakeholders.

3.1.7. Questions about Implementation and Support

3.1.7.1. Support to developers

3.1.7.1.1. Will the Department be providing further support to system developers to ensure that they are able to develop their clinical systems in line with the revised MDS specification?

System developers will have access to the following resources:

- API documentation online
- Test accounts on both staging and production systems
- Offline data validation for ease of testing extracted datasets
- Access to help desk via e-mail. Telephone support will be provided where the issue can't be resolved via email
- Developer announcement mailing list to notify developers of pending changes and issues

3.1.7.2. Staging:

3.1.7.2.1. We would seek assurance from the Department that there is sufficient lead time for system developers to refine systems in line with these new requirements.

The Department is aware that developers will need sufficient lead time to make the required system changes and/or additions.

PMHC MDS upload functionality will be separate from the existing ATAPS/MHSRRA MDS. During this initial stage the existing ATAPS/MHSRRA MDS will be kept operational so that ATAPS/MHSRRA organisations can continue to provide data through that system until they are either ready to export data to the new upload interface or until the new data entry interface is available after a later stage of development. Once all ATAPS/MHSRRA organisations are submitting data to the PMHC MDS, the ATAPS/MHSRRA MDS will be shut down. This date has not yet been specified.

Data for services other than ATAPS/MHSRRA will have to be submitted via the PMHC MDS interface.

Organisations should only submit data via one interface, not both.

Data submitted via the existing ATAPS/MHSRRA MDS will be converted and merged with data submitted via the PMHC MDS in order to produce departmental reports.

3.1.7.2.2. Is year one a baseline data gathering year as opposed to there being any expectation to manage providers against levels of activity not fully understood due to the extended MDS requirements?

The Department is aware that 2016-17 is a transitional year and will not provide sufficiently comprehensive data to serve as a baseline for monitoring future activity. 2017-18 is expected to serve as the baseline year for comprehensive data collection.

3.1.7.3. Support to PHNs to engage providers

3.1.7.3.1. Can the Department offer assistance to PHNs in terms of creation of a spreadsheet suitable for storing and uploading collected data

Yes – Excel data entry templates for submission are provided on the PMHC MDS website. Visit Upload Specifications [File format](#)

3.1.7.3.2. Will there be further clarification on how PHNs will be expected to report on provider performance to allow engagement on how best to undertake the change process?

See responses to [Questions about Standard Reports](#).

3.1.7.3.3. PHNs would desirably see the actual mechanics of the MDS hands-on prior to wider release. Successful roll-out will depend on how well PHNs are able to communicate and support providers. We suggest the department conducts PHN specific webinars and training for key nominated staff

Online support documentation is currently being created around the data specification and online portal. In addition, the Department is currently in negotiations with external providers to supply ongoing support and training for the system. Further details of these arrangements will be made available subsequent to the finalisation of these arrangements.

3.1.7.4. Data capture via the web-based portal

3.1.7.4.1. With the data being submitted via the web based portal – does the web based portal also allow PHN's to use this as their data capture tool as well?

During the initial stage of implementing the PMHC MDS, PHNs and their service providers will be able to either export data from their client systems and upload to the PMHC MDS or manually create spreadsheets that can then be uploaded. Data may be uploaded in either Excel or CSV format.

During phase 2 a full data entry capacity will be added. This is expected to be ready for the 2017-18 financial year.

3.1.8. Questions about Standard Reports

3.1.8.1. Provider Organisations and Practitioners

3.1.8.1.1. The documentation indicates standard reports will be designed to meet PHN and departmental requirements. Will a Provider organisation or Practitioner be able to receive reports for their respective service provision?

The Department will be planning a range of standard reports and will consult with PHNs about their requirements. Standard Reports are expected to be developed for [Stage Two](#).

3.1.8.2. Benchmarking reports

3.1.8.2.1. Are the PHNs going to receive reports on collated data and benchmarked against other PHNs for QI purposes?

The Department will be planning a range of standard reports and will consult with PHNs about their requirements. Standard Reports are expected to be developed for [Stage Two](#).

3.1.9. Miscellaneous Questions

3.1.9.1. Clients/consumer terminology

3.1.9.1.1. The terms 'patient', 'client' and 'consumer' are used interchangeably in the documentation. Consultation indicates a preference for the term "consumer".

The Department acknowledges the importance of language in describing those who use mental health services and that 'consumer' is the current preferred term in the sector. However, for the purpose of specifying the PMHC MDS, the term 'client' is used in the technical specifications. This does not imply that the term 'consumer' should not be used in PHN communications with stakeholders.

3.1.9.2. Provisional Psychologists

3.1.9.2.1. Can provisional psychologists provide services under supervision in priority area 3?

Provisional Psychologists fall within the broader Practitioner category of 'low intensity workers'. These are defined as "individuals with appropriate competencies but who do not meet the requirements for registration, credentialing or recognition as a mental health professional". The deployment of low intensity workers is at the discretion of PHNs, but of course depends on suitable clinical supervisory arrangements being in place.

3.1.9.3. Referrer postcode

3.1.9.3.1. It would also be useful to collect the postcode of the referrer to understand referral patterns across and within regions.

Referrer postcode is not regarded as essential for the national data and thus not included in the PMHC MDS. However, PHNs have the discretion to add this as additional information collected at regional level.

3.1.9.4. Multiple episodes

3.1.9.4.1. When patients receive services under multiple funding areas is the data recorded against a separate episode of care for each service? For eg: a young person is receiving care through a headspace site (priority area 2) yet has an acute episode and requires services for a follow up around a suicide attempt- (Priority area 5) is the MDS data uploaded against both priority areas?

The business rules for Episodes are stated in the MDS specifications. Episodes are defined at the level of the Provider Organisation, not the funding source. A client can only have one episode at a time **for any given Provider Organisation**. Of course, if two Provider Organisations are delivering services simultaneously, one episode would be created by each Provider Organisation.

Each Episode is classified according to a single 'Principal Focus of Treatment Plan'. This may be changed in the course of an episode if the original code entered changes during the course of treatment.

3.1.9.5. Data collection responsibility

3.1.9.5.1. Does the referrer or clinical provider collect the sociodemographic and clinical data? If the former, this may not be acceptable to GPs

While referrers will continue to provide some information as part of the referral process, it is the responsibility of the Practitioner and Provider Organisation to ensure the integrity of data submitted to the PMHC MDS. Most of the data required would normally be collected as part of the assessment process by the Practitioner. GPs are not expected to provide the full set of sociodemographic data.

3.2. System Frequently Asked Questions

3.2.1. Accessing the PMHC Minimum Data Set

3.2.1.1. What internet browser should I use?

You can access the PMHC MDS using the following browsers:

- Chrome (version 30+)
- Firefox (version 38+)
- Internet Explorer 11
- Safari 8 +

3.2.1.2. How do I get started using the MDS?

Refer to [How do I obtain access to the PMHC MDS?](#) for information on getting an account on the MDS.

The PMHC website is available at <https://pmhc-mds.com/>. Here you will find documentation on using the MDS.

The MDS is accessed on the web at the following address: <https://pmhc-mds.net/>

3.2.1.3. How do I obtain access to the PMHC MDS?

Access to the PMHC MDS is based around roles. Each role allows a user to perform specific tasks. A user can have more than one role. Each role is granted for a user against an organisation. An organisation can either be a Primary Health Network (PHN) or a Provider Organisation. If a user is granted a role for a PHN they will also have this role for any Provider Organisations of that PHN. A user can be invited to have a role at more than one organisations.

See [Users Roles](#) for a summary of each of the roles that currently exist within the PMHC MDS.

User accounts can be created by a user at your PHN or Provider Organisation who has the User Management role. If unsure who this is, please contact support@pmhc-mds.com to find out who has this access.

Alternatively, if you cannot contact any users who have the User Management role access can be gained by producing a [letter of authority](#).

3.2.1.4. What is required for the Letter of Authority?

The protocol for setting up a new account to access the MDS requires a written letter of authority. A **letter of authority** is a request made on your Primary Health Network or Provider Organisation's letterhead which must be signed by an authority at the Primary Health Network or Provider Organisation who holds a position that is higher than the person for whom the account is being created (i.e., the person's manager or the CEO).

This letter must contain the following details (for the person for whom the MDS access is being requested):

1. Name.
2. Email address.
3. Contact telephone number.
4. Mobile phone number.
5. The exact Primary Health Network or Provider Organisation's name in the MDS you are seeking to access.
6. The roles required for the user. The user can have any combination of these roles. (See [Users Roles](#) for a summary of each of the roles that currently exist within the PMHC MDS.)

This letter must be faxed or scanned then emailed to:

- Strategic Data Fax: (03) 9340 9090
- PMHC Helpdesk Email: support@pmhc-mds.com

The same protocol applies if an MDS user no longer requires MDS access and needs to hand over their MDS access to another person. However, in this case it is advised that the new MDS user has a new username and password issued to protect the privacy and security of the organisation's data.

This process will also apply where a user is requesting a password re-set. However, the auto [password recovery](#) process available to you via the MDS login screen is the preferred method of password retrieval.

This process will also apply where a user is requesting an update to their details. However, the [Updating your details](#) process available to you via the MDS login screen is the preferred method for a user to update their own details.

3.2.1.5. What can a user see in the MDS?

What you see once you login will depend upon what roles you have been assigned.

Refer to [Users Roles](#) for more information.

3.2.1.6. I do not have a work mobile. What do I do?

A user can use their personal mobile. Users' mobile phone numbers are not listed or able to be viewed by other users within the PMHC MDS.

The mobile is only used by the PMHC MDS profile management system to deliver the verification code via SMS. This is used to activate their profile, reset their password or if a password is forgotten or expires.

Refer to [How can I recover my password or username?](#)

3.2.1.7. Can I invite different users by using the same mobile?

It is not advised for multiple PMHC users to share using the same mobile number.

Refer to [I do not have a work mobile, letter of authority](#) and [How can I recover my password or username?](#)

3.2.1.8. Can I pass on my username and password to my organisation's IT person or evaluator if they are entering data?

No, each user should be issued with their own username and password.

Refer to [How do I obtain access to the PMHC MDS?](#)

3.2.1.9. Can I add an existing user to another PHN or Provider Organisation?

Yes, a user can have role/s at more than one organisation.

By ensuring you enter the same email and mobile number when completing the invitation steps in [Adding an existing user](#), the system will automatically pick up if a user already exists in the PMHC MDS and will grant them access to the additional organisation.

3.2.1.10. Why did I get this message when inviting a user - '500 Internal Server Error: Inviting user failed: An outstanding PMHC MDS invite exists'?

This user has previously been invited and has not yet completed the required steps for [Accepting an invitation to become a PMHC MDS User](#). An invitation will be valid for 7 days and you can not resend an invitation within this time whilst a token is still valid.

Why are you trying to re-invite this user? For further assistance refer to:

- [What should I do if a user didn't receive the email invitation?](#)
- [What should I do if a user didn't receive the invitation SMS token?](#)
- [What should I do if a user deleted the email invitation or the SMS token?](#)
- How can I change the users roles? When the user has accepted the invitation you will be sent an email and after this you can then [Editing a user's roles](#).

3.2.1.11. What should I do if a user didn't receive the email invitation?

You will not be able to re-invite this user using the same email within 7 days, as an [outstanding PMHC MDS invite exists](#).

Firstly confirm that you have their correct email address. Ask the user to double check their junk mail folder and search for an email sent from noreply@strategicdata.com.au. Otherwise, please contact the Helpdesk on support@pmhc-mds.com.

If an incorrect email was entered, you will be able to re-invite the user using the correct email.

3.2.1.12. What should I do if a user didn't receive the invitation SMS token?

You will not be able to re-invite this user within 7 days, as an [outstanding PMHC MDS invite exists](#).

Firstly confirm that you have their correct mobile phone number. If an incorrect number was entered, please contact the Helpdesk on support@pmhc-mds.com as we can reissue it to the preferred number. When contacting please inform the Helpdesk of both the incorrect number, along with the correct number where possible.

See [What should I do if a user deleted the email invitation or the SMS token?](#)

3.2.1.13. What should I do if a user deleted the email invitation or the SMS token?

You will not be able to re-invite this user within 7 days, as an [outstanding PMHC MDS invite exists](#).

If a user deleted the email invitation or the SMS token please contact the Helpdesk on support@pmhc-mds.com as we can reissue it.

3.2.1.14. Can GPs or Mental Health Providers (MHPs) access the MDS to upload data themselves?

Yes, GPs and MHPs can access the MDS to upload their data directly into the system. However, it is not possible to limit their data access to the select data fields that they would normally manage. For example, MHPs would normally only need to enter or edit their own client information and the episodes and service contacts associated with these clients.

However, it is not possible to restrict their access only to their own clients' data. They will be able to modify data for clients across their entire provider organisation. Therefore, MHPs who access the MDS could potentially change data for a client that is not their own.

Refer to [Users Roles](#).

3.2.1.15. I'm a third-party software developer developing software to assist with uploading data to the MDS. Can I have an account to test my data uploads?

Yes, we can supply you with an account that has access to a test Primary Health Network. In order to set up the test Primary Health Network account we need to follow a similar procedure to setting up a proper Primary Health Network account, by producing a [letter of authority](#).

On company letterhead, this letter must be signed by an authority at your company who holds a position that is higher than the person for whom the account is being created (i.e., the person's manager or the CEO).

This letter must contain the following details (for the person for whom the MDS access is being requested):

1. The name of the person the account is for
2. The email address of the person
3. Contact telephone number
4. Mobile phone number
5. Request access to the 'Test [Your Company Name]' Organisation

This letter must be faxed or scanned then emailed to:

- Strategic Data Fax: (03) 9340 9090
- PMHC Helpdesk Email: support@pmhc-mds.com

Base your letter on the details listed in [What is required for the Letter of Authority?](#)

3.2.1.16. I forgot my password. What do I do?

See [Forgotten or Expired Password](#).

3.2.1.17. How can I update my user details?

If your email address or mobile number has changed, it is important that you update your account. See [Updating your details](#).

If you can't access your profile, contact the PMHC Helpdesk so that your records can be updated. When contacting the PMHC Helpdesk you will be asked to arrange for a [letter of authority](#) stating the change(s)

Refer to [What is required for the Letter of Authority?](#)

3.2.1.18. How can I recover my password or username?

The system offers an automated password/username recovery feature. The system will email the registered email address on your account and send an SMS to the registered mobile phone on your account.

See [Forgotten or Expired Password](#) for instructions on resetting your password.

It is important to keep your email address and mobile phone current so that you can make use of this facility. If you can no longer access the PMHC MDS please email the PMHC MDS Helpdesk at support@pmhc-mds.com to update your email address/mobile phone.

Please note, when contacting the PMHC Helpdesk you will be asked to arrange for a [letter of authority](#) stating the change(s) required. Refer to [What is required for the Letter of Authority?](#)

3.2.2. Entering data in the PMHC Minimum Data Set

3.2.2.1. What is the best way to manage the client key?

The Client Key needs to be stable for each individual within the Provider Organisation.

Initially the PHN may decide to play a role in coordinating assignment and management of these keys for Provider Organisations, prior to the PMHC MDS implementation a Master Client Index during [Stage Two](#) of development.

See data specifications for [Identifier management](#).

3.2.2.2. Can you suggest a best practice approach to managing client keys?

We understand that PHNs and Provider Organisations will approach [Identifier management](#) in various different ways to best suit their practice. PHNs may decide to manage client keys until the Master Client Index is developed and released in [Stage Two](#). In the interim, we suggest speaking with your PHN or another Provider Organisation in your network to understand their approach to managing their client keys.

Refer to the Department's response to [Questions about Unique Identifiers and 'Keys'](#).

3.2.2.3. Why can't we use the SLK as the client key?

The Client Key is required to be a unique client identifier. The SLK isn't a unique key and therefore not suitable to be used as the Client Key.

Refer to data specifications for [Identifier management](#).

3.2.2.4. How will the Master Client Index work?

The previous PMHC MDS specification requires a Client Key that is unique and stable at the PHN regional level, not at the Provider Organisation level. The purpose of the Master Client Index is to help PHNs and their Provider Organisations manage client information across the PHN region. This requirement has proven problematic for PHNs and is being worked through by the PMHC MDS Working Group.

To determine what issues exist with managing the client key and possible solutions, nine PHNs worked with Strategic Data to describe their models for triaging patients, the information systems being used by PHNs and Provider Organisations, the ease of updating information systems and resources available for manual reconciliation of clients.

As a result of this work, a Master Client Index is not possible at this time, and as such, will not be a requirement for full compliance from 1 July 2017.

See [Master Client Index](#).

3.2.2.5. How often should I enter data into the MDS?

Refer to [Reporting timeliness](#).

3.2.2.6. Can I enter fictitious data as a part of testing?

The MDS is live and data uploads will be recorded. Real PMHC data can be trialled by uploading in test mode, whereas fictitious data should be trialled with a 'Test Organisation' on developers.pmhc-mds.net.

See [PMHC Developers Announcement](#).

3.2.2.7. How do I find or create a Client's Statistical Linkage Key (SLK)?

If you don't have an internal system that can provide you with the client's SLK, an SLK generator is available within the client data entry forms. Refer to the online User Guide [Adding a New Client](#).

There is also a manual Statistical Linkage Key Generator available on the PMHC MDS website, under the SLK tab - <https://pmhc-mds.net/#/slk>. See [SLK](#).

3.2.2.8. How do I find what the Episode Key, Service Contact Key and Outcome Collection Occasion Key is?

The [Episode Key](#), [Service Contact Key](#) and [Outcome Collection Occasion Key](#) are the system [unique identification keys](#) that will need to be manually created and managed by your Provider Organisation.

Each record needs to be assigned a stable unique key within the Provider Organisation, in order to facilitate adding/updating/deleting each item when entering data.

See data specifications for [Identifier management](#).

3.2.2.9. How do I find what my Practitioner Key is?

The Practitioner Key is one of the system [unique identification keys](#) that will need to be manually created and managed by your Provider Organisation.

Data Entry users can add a Practitioner once they know their key. Refer to the online User Guide [Adding a Practitioner](#).

3.2.2.10. How can I edit a record's identifying key?

Each record needs to be assigned a stable unique key within the Provider Organisation, in order to facilitate adding/updating/deleting each item when entering data.

You can edit a record's identifying key you have entered within the data entry interface. There is an edit key button available when editing a records details.

See:

- [Editing a Practitioner Key](#)
- [Editing a Client Key](#)
- [Editing a Episode Key](#)
- [Editing a Service Contact Key](#)
- [Editing a Collection Occasion Key](#)

3.2.2.11. How do I enter a referral?

A referral can be entered as an [Episode](#).

An Episode does not need to be concluded if the client requires as a new referral. If the treatment continues with a client, the service contacts can continue to be recorded to the original Episode until treatment is formally concluded either clinically or administratively.

Refer to the online User Guide [Episodes](#).

3.2.2.12. How do I enter a K10+, or K5?

These measures tools, K10+ and K5, are entered as an [Outcome Collection Occasion](#).

Refer to the online User Guide [Outcome Collection Occasions](#).

3.2.2.13. How do I enter a SDQ measure?

The SDQ development for the Data Entry Interface is on hold, as the Department is currently in licensing negotiation with the SDQ developers to be able to add the complete SDQ online form to the PMHC MDS. Refer to [Data Entry Interface Development](#).

The SDQ paper version is still able to be used and once the development is released can be entered through the Data Entry Interface.

In the interim, however you can currently add the SDQ subscales through the Data Entry Interface - See [Adding a Client's Outcome Collection Occasions data](#).

3.2.2.14. How can I delete a record I incorrectly entered?

You can delete a record you have entered within the data entry interface. There is a delete button available when viewing a records details.

However, if the record you are trying to delete has any dependant records, you will not be able to proceed with deleting the parent record until all the related dependant records have been edited or deleted.

See:

- [Deleting a Practitioner](#)
- [Deleting a Client](#)
- [Deleting an Episode](#)
- [Deleting an Service Contact](#)
- [Deleting an Outcome Collection Occasion](#)

3.2.2.15. Can I go back and enter information if I don't have it at the time?

Yes, the MDS allows you to go back and enter information at a later date.

When data in the upload has the same identification key as recorded in the MDS, (eg Client, Practitioner, Episode, Service Contact, and Outcome Collection Keys) the data will automatically be updated for these files. The number of files present, created, and updated, are summarised on the successful upload notification email.

Refer to upload specification [File format](#).

3.2.2.16. Do I enter a Service Contact when a client doesn't show up for the session?

Yes. A Service Contact record has a 'No Show' field and selecting the value 'Yes' indicates that the intended participant(s) failed to attend the appointment.

Some of the other Service Contact fields have a 'no show' option available to be selected. For any other Service Contact fields, please enter the response that would have been entered if the participant had attended the session.

You can decide to enter as much information as possible within a no show form, as long as it meet the 'No Show' [validation guidelines for a service contact](#).

Refer to [Service Contact](#).

3.2.2.17. If the client is referred elsewhere (e.g. not suitable for this service) should this be recorded?

This decision depends upon your local guidelines.

Under the new PMHC MDS, an episode does not formally commence until the client receives their first Service Contact. For referrals that do not lead to a Service Contact, and where the person is referred elsewhere, there is no need to open an Episode.

However the Department understands that many PHNs are likely to want to do this as a means to track referrals that do not lead to Service Contacts, or to begin entering data prior to the first Service Contact. Therefore, there is scope in the system to set up an Episode even it does not lead to a Service Contact. Standard reports to be developed will build in capacity to monitor these and ensure that they are not counted in service delivery indicators.

Where a referral is followed by an initial Service Contact, and the person is referred elsewhere due to being assessed as not suitable, or requires an alternative service, a new code for Episode- Completion Status has been added ('Episode closed administratively - client referred elsewhere').

3.2.2.18. Why is an episode showing as uncommenced?

The episode definition states that 'Episodes commence at the point of first contact. The episode start date will be derived from the first service contact date.'

When an episode does not have any service contacts added yet, it does not have a start date and the system will report it as 'Uncommenced'.

Refer to [Episode](#).

3.2.2.19. How can I close an episode?

To close an episode, you can edit a Client's Episode details and enter an 'Episode - End Date' and update the 'Episode - Completion Status' value.

Refer to [Editing a Client's Episode data](#).

3.2.2.20. What do I do if the GP / mental health provider has not given an answer to one or more questions in the minimum dataset?

Provider Organisations should make every effort to ensure that the data entered into the MDS is as complete as possible. However, most data items specify a 'Missing' response. Where information is unavailable, please use this response item. The aim is to minimise missing data as much as possible.

Refer to [Record formats](#) for more information. By clicking on the field name this will take you to the field definition which outlines the associated notes that provide guidance on which response to use.

3.2.2.21. What are the options where the information collected does not fit into the available fields?

Each data item has associated notes that provide guidance on which response to use. By clicking on the [Record formats](#) field name this will take you to the field definition which outlines the associated notes.

Refer to [Record formats](#).

3.2.2.22. The PHMC MDS specifications seems limited. Can we capture and record additional data?

PHNs can choose to capture and record additional data outside the PMHC MDS.

See [Can the PMHC MDS capture and record additional data?](#).

3.2.2.23. Where do I enter MHNIPS data collection?

The Department of Health is expecting all commissioned Mental Health Nursing services data from July 2016 to be entered into the PMHC MDS.

Refer to the Department's response to [Are services previously delivered under MHNIP expected to collect the PHMC MDS?](#).

3.2.2.24. I have an error message but no idea what it means or how to fix it. What should I do?

Refer to [Record formats](#) for more information. By clicking on the field name this will take you to the field definition which outlines the associated notes that provide guidance on which response to use. It will also inform you if there are any interrelated field requirements that can cause data errors.

If still unsure, please email the PMHC Helpdesk on support@pmhc-mds.com and provide a description of where the error occurred, a screenshot if possible, and the error log number. The error log number is displayed at the end of the error message, eg [BVDS105Q], and is very important for the Helpdesk to quickly identifying the error and to provide you with a clear response on how to rectify the data issue.

3.2.3. Uploading data

3.2.3.1. How do I obtain a template to upload my data to the MDS?

Upload templates are available from [Upload specification](#).

3.2.3.2. What do I do if I have collected the data in Excel or Access?

Visit the online MDS documentation regarding uploads where a detailed User Guide for data uploads is available.

See [Upload specification](#).

3.2.3.3. Should an upload file only contain new or changed data or should it contain all cumulative data from the start of service delivery?

All data should be uploaded for the first upload, but subsequently only new or changed data should be uploaded. However, parent records of new or changed data also need to be uploaded in order to keep the file internally consistent.

An example of what this means is that if a service contact record is added or changed, there must be a corresponding episode record in the episode file and a client record in the clients file, even if the episode and client data hasn't changed. Also, as service contacts refer to practitioners, there must also be a practitioner record in the practitioner file.

3.2.3.4. How can I edit a record I have previously uploaded?

There is a unique identifying key associated with every record in the PMHC MDS. When you upload a record with the same unique identifying key with updated data, then the MDS will recognise this record's key and update the data already recorded in the system.

When an upload is completed successfully, you will see a summary of the updated records shown in the 'Upload Change Summary' table displayed in the View Upload Details for complete uploads. See [Complete uploads](#).

3.2.3.5. How can I delete a record I have previously uploaded?

You can delete records via upload.

Please refer to [Deleting records](#).

3.2.3.6. How can I review why the status of my upload file shows error?

If the status of your file shows error, you can view the returned errors through Viewing Previous Uploads.

Refer to [Error messages](#).

3.2.3.7. How can I view my uploaded data?

When an upload is completed successfully, you will see a summary of the updated records shown in the 'Upload Change Summary' table. See [Complete uploads](#).

If you have the Reporting role, you can produce system reports or extract recorded data. See [Reports](#).

3.2.3.8. How do I upload the individual CSV files?

The CSV files must be compressed into a single file by zipping before upload. The filename of the zip file doesn't matter as long as it has the file extension .zip All the required CSV files must be included for each upload, even if the file contains no data. If choosing to include any optional CSV files, these must be included with the required files in the single upload zip file.

See [Upload specification](#).

3.2.3.9. How do I fix upload file errors?

Refer to [Error messages](#).

3.2.3.10. How do I fix data errors in an upload?

Refer to [Record formats](#) related to column name for each error. By clicking on the field name this will take you to the field definition which outlines the associated notes that provide guidance on which response to use.

If still unsure, please email the PMHC Helpdesk on support@pmhc-mds.com and provide a copy of the error email, and/or a screenshot if possible. The error email is very important for the Helpdesk to quickly identifying the error and to provide you with a clear response on how to rectify the data issue.

3.2.3.11. Has my data uploaded if my file has an error status?

No. Only 'Complete' uploads that are not in test mode, are recorded in the PMHC MDS.

See [Viewing Previous Uploads](#).

3.2.3.12. Will valid data be accepted if there are errors in the file?

For example, if we upload 200 lines of service contacts, and there are validation errors in 10 lines - will 190 lines be accepted?

No. All files and records in an upload have to validate before any data is accepted.

3.2.3.13. If validation rules change how will you treat legacy data?

When implementing new validation rules or changing existing rules, where possible we prefer to enforce the new rules as of a certain date.

For example, if a data field that is now optional where to be made mandatory, we would specify that it was mandatory as of a particular date. For any data previous to that date the field could still be optional, but for any data after that date the field would be mandatory.

3.2.3.14. I am receiving an upload error that has a code that is not in my records. What should I do now?

We have implemented an upload error log that reports when an error is not providing the relevant details. The error log code will be reported to the user after the error message, for example [ABC123ZY]

The [AW97AZRX] error code refers to our internal error log. With this error code, we will be able to quickly source you the relevant key details for this record. And this error log is also reviewed by our developers to diagnose and fix the specific error to ensure that the system reports the relevant details/keys for future uploads.

If you receive this types of errors message, please email the PMHC Helpdesk on support@pmhc-mds.com and provide a copy of the entire error message along with the error code.

3.2.3.15. I am receiving an unknown error in my records. How can I fix this?

If you receive an 'unknown error' message, please email the PMHC Helpdesk on support@pmhc-mds.com and provide a copy of the error email, and/or a screenshot if possible. The error email is very important for the Helpdesk to quickly identifying the error and to provide you with a clear response on how to rectify the data issue.

3.2.4. Capturing additional data

3.2.4.1. It seems that the data being collected is quite limited, would it not be useful to collect more detailed information?

The development of the minimum dataset balanced the ideal against what was realistic, given that any additional data item places extra burden on those collecting and entering data.

Organisations may collect extra information for their own analysis however this information does not need to be submitted to the PMHC MDS.

Refer to [What are the options where the information collected does not fit into the available fields?](#)

3.2.4.2. The information collected does not fit into the available fields. Can we add another option?

The development of the minimum dataset balanced the ideal against what was realistic, given that any additional data item places extra burden on those collecting and entering data.

See [What are the options where the information collected does not fit into the available fields?](#) and [Can the PMHC MDS capture and record additional data?](#)

3.2.4.3. Can the PMHC MDS capture and record additional data?

The PMHC MDS is designed to monitor and evaluate regional service delivery against key mental health performance indicators and can not capture and record additional data outside the [Data model](#).

The PMHC MDS does not confine PHNs to the data specified. Rather, it sets the minimum and common ground for what data are to be collected and reported for mental health services commissioned by PHNs.

It is anticipated that many PHNs will seek to collect and manage an enhanced set of data to meet local needs, however this data will not be submitted to the MDS.

Refer to [It seems that the data being collected is quite limited, would it not be useful to collect more detailed information?](#)

3.2.5. Checking data

Each individual organisation is responsible for checking their data in the MDS to confirm its accuracy and completion. It is advisable that this review is undertaken regularly to ensure data integrity and avoid widespread errors.

Alternatively, for greater precision and to access your data in full, you can download your data.

Refer to [Data Extract](#).

3.2.6. Storing data relating to the minimum dataset system

3.2.6.1. After entering data in the MDS how long should I store my hardcopy and/or electronic files?

There is no set time limit; however, it is recommended that you archive this data and keep it secure for at least two years. As with all electronic data (including MDS) there is a risk of corruption - whether it is due to a system bug or human error. The MDS stores the original upload files as well as the data that has been imported into the database, however it is always good to keep the original data as a backup to either check details against or re-enter, if needed.

3.2.7. Development of the PMHC Minimum Data Set

3.2.7.1. Stage Two

3.2.7.1.1. When is Stage Two of development going to be implemented?

Stage Two development has been split into several components as outlined below:

- [Data Entry Interface](#)

- [Reporting](#)

Regularly check the announcements on the [PMHC MDS home page](#) to keep informed of development releases.

3.2.7.1.2. Data Entry Interface

In order to get Data Entry functionality to PHNs as soon as possible, the development of this feature was split into several components.

- **Viewing Client Data**, was released in [v0.9.2](#) and Client Search was further refined in [v0.10.0](#).
- **Practitioners Data Entry Interface**, was released in [v0.11.1](#).
- **Client, Episode and Service Contact Data Entry Interface**, was released in [v0.12.0](#).
- **K10+ and K5 Outcome Collection Occasion Data Entry Interface**, was released in [v0.13.2](#).
- Enhanced features to the Data Entry Interface, was released in [v0.15.0](#) and [v0.16.1](#).
- Ability to **delete records**, was released in [v0.17.2](#).
- Ability to **edit identification keys**, was released in [v0.18.0](#).
- Ability to **add SDQ subscales**, was released in [v0.18.0](#) whilst SDQ licensing negotiations are in process.
- Enhanced form errors for duplicate keys to be shown when entering data, was released in [v0.19.0](#).
- Minimise data errors by implemented, minimum dates have been applied to specific fields, was released in [v0.21.0](#).

The remaining features will be rolled out iteratively over the following weeks, and will be:

- SDQ Data Entry Interface (Currently development is on hold until the Department finalises licensing requirements)
- Develop pre-filled fields for interrelated field specifications
- Ability to merge duplicate client records
- An Online K5, K10+, and SDQ Outcome Measures Self-Service Interface

Regularly check the announcements on the [PMHC MDS home page](#) to keep informed.

3.2.7.1.3. Reporting

The [Types of System Reports](#) that are currently available are:

- **Category E: Reports for data managers to monitor data supply**, was released in [v0.14.0](#).
- The start of the **Category A: Monitoring progress of MDS implementation** reports, was released in [v0.20.0](#).
- Additional **Category A: Monitoring progress of MDS implementation** Data Quality reports, was released in [v0.22.1](#).

The following reports will be rolled out iteratively over the following weeks:

- Category A reports: Monitoring progress of MDS implementation
- Category B reports: Monitoring overall service delivery
- Category C reports: Monitoring implementation of stepped care
- Category D reports: Key Performance Indicators

Category A reports will be implemented next.

Regularly check the announcements on the [PMHC MDS home page](#) to keep informed.

3.2.7.1.4. Master Client Index

Current development for the Master Client Index is on hold.

Refer to the recent Department announcement on the [INFORMATION and ACTION: PHN CEO - Primary Mental Health Care Minimum Data Set Update | June 21, 2017](#).

3.2.8. PMHC mailing list

3.2.8.1. How can I be advised of any changes to the MDS?

When changes are made to the MDS we alert all users via an email list. MDS users are automatically added to this list, however sometimes other Primary Health Network or Provider Organisation staff who do not have accounts wish to be informed of updates.

If you would like to be added to the mailing list please email support@pmhc-mds.com.

3.2.8.2. I have an MDS account but don't receive update emails.

Please check that we have your correct email address. Refer to [Updating your details](#)

Mailing list emails will be sent from support@pmhc-mds.com. Please make sure this is not being caught in any spam filters.

3.2.8.3. I no longer wish to receive PMHC update emails. How can I be removed from the list?

Please email support@pmhc-mds.com and ask to be removed from the mailing list.

3.2.8.4. I am a third-party software developer developing code to assist with uploading data to the MDS. Can I be informed of updates to the MDS?

Yes, we have a mailing list specifically for third-party developers.

Please email support@pmhc-mds.com and ask to be added to the developers mailing list. Please provide us with a generic address that will survive staffing changes.

3.2.9. Getting Help

A dedicated **Helpdesk** is available to support Primary Health Networks and Provider Organisations implementing PMHC in relation to the minimum dataset system. All enquiries should be directed to: support@pmhc-mds.com.

3.3. Frequently Asked Questions Change log

3.3.1. 13/3/2018

3.3.1.1. Concepts Processes - Specific Data Items and Definitions

- Added the question [One episode of care at a time: We have clients who are receiving treatment at multiple programs and require multiple episodes with different 'Principal Focus of Treatment Plan'](#). The PMHC MDS only allows one episode at a time for each client, defined at the level of the provider organisation. What do we do?

3.3.2. 19/1/2018

3.3.2.1. Concepts Processes - Outcome Measures FAQs

- Fixed a spelling error in K5 for Aboriginal and Torres Strait Islander population

3.3.3. 22/12/2017

3.3.3.1. System - Development FAQs

- Updated the question to [Reporting](#)

3.3.4. 08/12/2017

3.3.4.1. System - Data Entry FAQs

- Added the question [How can I close an episode?](#)
- Updated the question [How do I enter a referral?](#)

3.3.5. 20/11/2017

3.3.5.1. System - Data Entry FAQs

- Updated the question [How can I delete a record I incorrectly entered?](#)
- Updated the question [How can I edit a record's identifying key?](#)
- Updated the question [How do I enter a SDQ measure?](#)

3.3.5.2. System - Upload FAQs

- Updated the question [How can I delete a record I have previously uploaded?](#)

3.3.5.3. System - Development FAQs

- Updated the question to [Data Entry Interface](#)

3.3.6. 03/10/2017

3.3.6.1. System - Data Entry FAQs

- Updated the question [Do I enter a Service Contact when a client doesn't show up for the session?](#)
- Updated the question [How do I enter a K10+, or K5?](#)
- Added the question [How do I enter a SDQ measure?](#)

3.3.6.2. System - Uploading data FAQs

- Added the question [I am receiving an upload error that has a code that is not in my records. What should I do now?](#)
- Added the question [I am receiving an unknown error in my records. How can I fix this?](#)

3.3.7. 12/9/2017

3.3.7.1. System - Uploading data FAQs

- Added the section [Should an upload file only contain new or changed data or should it contain all cumulative data from the start of service delivery?](#)
- Removed the section 'Should an upload file include all service contacts and measures for an episode every time?'
- Removed the section 'Do I need to include all service contacts and measures for an episode in a file?'
- Added the section [Will valid data be accepted if there are errors in the file?](#)

3.3.8. 30/8/2017

3.3.8.1. System - Data Entry FAQs

- Updated the question [What is the best way to manage the client key?](#)
- Updated the question [Can you suggest a best practice approach to managing client keys?](#)
- Updated the question [How will the Master Client Index work?](#)
- Added the question [How do I find or create a Client's Statistical Linkage Key \(SLK\)?](#)
- Added the question [How do I enter a referral?](#)
- Added the question [How do I enter a K10+, or K5?](#)
- Added the question [Do I enter a Service Contact when a client doesn't show up for the session?](#)
- Added the question [If the client is referred elsewhere \(e.g. not suitable for this service\) should this be recorded?](#)
- Added the question [I have an error message but no idea what it means or how to fix it. What should I do?](#)
- Added the question [How do I find what my Practitioner Key is?](#)

- Added the question [How do I find what the Episode Key, Service Contact Key and Outcome Collection Occasion Key is?](#)
- Added the question [How can I delete a record I incorrectly entered?](#)
- Added the question [How can I edit a record's identifying key?](#)

3.3.8.2. System - Development FAQs

- Updated the section [Development of the PMHC Minimum Data Set](#)

3.3.8.3. System - Upload FAQs

- Added the question 'Do I need to include all service contacts and measures for an episode in an file?'
- Added the question [How can I edit a record I have previously uploaded?](#)
- Added the question [How can I view my uploaded data?](#)
- Added the question [How can I delete a record I have previously uploaded?](#)
- Added the question [How do I upload the individual CSV files?](#)
- Added the question [How do I fix upload file errors?](#)
- Added the question [How do I fix data errors in an upload?](#)
- Added the question [Has my data uploaded if my file has an error status?](#)

3.3.9. 28/7/2017

3.3.9.1. System - Development FAQs

- Updated the section [Development of the PMHC Minimum Data Set](#)

3.3.10. 26/6/2017

3.3.10.1. System - Development FAQs

- Updated the section [Development of the PMHC Minimum Data Set](#)
- Removed the question *What features will be included in Stage Two development?*
- Added the section [Reporting](#)

3.3.11. 21/6/2017

3.3.11.1. System - Development FAQs

- Updated the question to [Data Entry Interface](#)

3.3.12. 6/7/2017

3.3.12.1. System - Data Entry FAQs

- Added the question to [Why is an episode showing as uncommenced?](#)

3.3.12.2. System - Development FAQs

- Added the question to [Data Entry Interface](#)
- Added the question to [Master Client Index](#)

3.3.12.3. System - Upload FAQs

- Added the question to [How can I review why the status of my upload file shows error?](#)

3.3.13. 1/5/2017

3.3.13.1. System - Data Entry FAQs

- Refined the answer to [Can I go back and enter information if I don't have it at the time?](#)

3.3.13.2. System - Development FAQs

- Refined the answer to [When is Stage Two of development going to be implemented?](#)

3.3.14. 10/3/2017

3.3.14.1. Concepts Processes - Outcome Measures FAQs

- Refined the answer to [MHNIP outcome measures](#)

3.3.14.2. Concepts Processes - Scope FAQs

- Added the question [Are services previously delivered under MHNIP expected to collect the PHMC MDS?](#)

3.3.14.3. System - Access FAQs

- Added the question [I do not have a work mobile. What do I do?](#)
- Added the question [Are services previously delivered under MHNIP expected to collect the PHMC MDS?](#)
- Added the question [Can I invite different users by using the same mobile?](#)
- Refined the answer to [What can a user see in the MDS?](#)
- Added the question [What should I do if a user didn't receive the email invitation?](#)
- Added the question [Can I add an existing user to another PHN or Provider Organisation?](#)
- Added the question [Why did I get this message when inviting a user - '500 Internal Server Error: Inviting user failed: An outstanding PMHC MDS invite exists'?](#)
- Added the question [What should I do if a user didn't receive the email invitation?](#)
- Added the question [What should I do if a user didn't receive the invitation SMS token?](#)
- Added the question [What should I do if a user deleted the email invitation or the SMS token?](#)
- Refined the question [I'm a third-party software developer developing software to assist with uploading data to the MDS. Can I have an account to test my data uploads?](#)

3.3.14.4. System - Data Entry FAQs

- Added the question [Can I enter fictitious data as a part of testing?](#)
- Added the question [Where do I enter MHNIPS data collection?](#)
- Added the question [Can the PMHC MDS capture and record additional data?](#)
- Added the question [Why can't we use the SLK as the client key?](#)

3.3.14.5. System - Development FAQs

- Added the question [When is Stage Two of development going to be implemented?](#)
- Added the question [*What features will be included in Stage Two development?*](#)

3.3.14.6. System - Uploading FAQs

- Added the question [How can I view my uploaded data?](#)

3.3.15. 8/2/2017

- Made the 'Department response to issues raised by PHNs' document the [Concepts and Processes Frequently Asked Questions](#) subsection in the online Frequently Asked Questions
- Moved the current Frequently Asked Questions section into the [System Frequently Asked Questions](#) subsection in the online Frequently Asked Questions
